Security & Compliance Pack — iConnect Plus

Product: iConnect Plus
Organisation: Cache Digitech
Classification: Internal — Confidential
Version: 2.0
Date: 2026-11-03
Deployment model: On-premises (Cache Digitech premises) · VPN for remote access

---

1. Purpose

This folder is the **authoritative security and compliance documentation pack** for **iConnect Plus** as operated by **Cache Digitech** on **internal on-premises infrastructure**. It supersedes narratives that treated public cloud SaaS (e.g. AWS RDS/S3 as primary runtime) as the production model for this assessment scope.

---

2. Deployment model (v2.0)

Aspect	Policy
Hosting	Cache Digitech internal server(s) on company premises
Runtime	Docker Compose: web, ESS, API, Celery, PostgreSQL, Redis, RabbitMQ, MinIO (+ ClamAV, optional OpenSearch)
Office access	Corporate LAN → internal reverse proxy (TLS)
Remote access	**Cache Digitech VPN only** — no public internet exposure for application tier
Primary data stores	On-prem PostgreSQL + MinIO volumes
Backups / DR	On-premises dumps, object copies, restore drills — not cloud DB/object as primary
Log retention	≥ **180 days** on-premises within India
Time sync	NTP to NIC/NPL or internal NTP traceable to them
Incident reporting	**CERT-In 6-hour** reporting obligation where applicable; PoC placeholders for Cache Digitech

---

3. Document index

01 — Architecture

Ref	Document
1.1	Solution Architecture (HLD & LLD)
1.2	Data Flow Diagram
1.3	Application Network Diagram
1.5	Asset & Component Inventory
1.6	API Specification
1.7	Infrastructure Shared-Responsibility Matrix

02 — Secure Development

Ref	Document
2.1	Application Security Requirements

2.2	Secure SDLC & Coding Standard
2.3	Environment Separation
2.4	Change & Release Records
2.5	Source Code Access Control
2.6	Security Testing Reports & Remediation Tracker
2.7	Software Bill of Materials

03 — Access Control

Ref	Document
3.1	RBAC Matrix

04 — Data Protection

Ref	Document
4.1	Data Inventory & Classification
4.2	Cryptography & Key Management (CBOM)
4.3	Data Retention & Deletion Schedule
4.4	Backup & Restore Procedure
4.5	Personal Data Processing Record (DPDP)
4.6	Test Data & Data Masking

05 — Operations

Ref	Document
5.1	Logging & Monitoring Specification
5.2	Time Synchronisation Evidence
5.3	Hardening Configuration Baseline
5.4	Incident Response Plan & Playbooks
5.5	BCP / DR Plan & DR Test Report
5.6	Operations Runbook (SOPs)
5.7	Capacity Plan

06 — User Facing

Ref	Document
6.1	User Manual
6.2	Administrator Manual
6.3	Privacy Notice & Terms of Use
6.4	AI Transparency Notice

4. Evidence status

Items marked **Template / Pending sign-off** require owner attestation, dated evidence attachment, or operational records before external audit submission. This pack is **Markdown only** (no PDF exports in-repo).

5. Application security baseline (summary)

Control	Implementation
Password storage	bcrypt
MFA	Optional TOTP
Session	JWT in HttpOnly cookies
Lockout	5 failures / 15 minutes (configurable)
Field encryption	Fernet for designated PII/finance columns
Authorization	RBAC; tenant isolation
Deletion	Soft delete on business tables
Classification	`public` / `internal` / `confidential` / `restricted`

6. Ownership

Function	Owner
Pack maintenance	Platform / connect module owner
Infrastructure & VPN	Cache Digitech IT
CERT-In liaison	**Template / Pending sign-off** (Cache Digitech PoC)

7. Change log

Date	Version	Change
2026-11-03	2.0	On-prem + VPN model; sections 04–06 added
