Asset & Component Inventory

Ref: 1.5
Product: iConnect Plus
Organisation: Cache Digitech
Classification: Internal — Confidential
Version: 2.0
Date: 2026-11-03
Deployment model: On-premises (Cache Digitech premises) · VPN for remote access
Audience: IT asset management, security assessors, platform engineering

1. Purpose

Maintain an inventory of **hardware, software, and logical assets** supporting iConnect Plus on **Cache Digitech premises**. Owners are Cache Digitech roles unless noted.

2. Physical / virtual servers

Asset ID	Role	Location	OS / hypervisor	Owner	Criticality
SRV-ERP-01	Primary Docker application host	Cache Digitech premises (LAN)	Linux (**Template / Pending sign-off** version)	IT Infrastructure	High
SRV-ERP-02	DR / secondary (if provisioned)	Premises or DR site	—	IT Infrastructure	**Template / Pending sign-off**
VPN-01	Remote access concentrator	Premises / DMZ per IT design	Vendor appliance/VM	IT Infrastructure	High

Example production IP documented in ops compose: **`172.16.200.30`**.

3. Application software components

Component	Image / version	Container name	Function	Owner
Admin UI	`enterprise-erp-web:local` (Next.js 16+)	`erp-web`	B2B admin	Platform team
ESS	`enterprise-erp-employee:local`	`erp-employee-app`	Employee self-service	Platform team
API	`enterprise-erp-api:local` (Python 3.13, FastAPI)	`erp-api`	REST API	Platform team
Worker	Same API image	`erp-celery-worker`	Async jobs	Platform team
Beat	Celery beat (if deployed)	**Template / Pending sign-off**	Schedules	Platform team
Reverse proxy	`nginx:1.27-alpine`	`erp-nginx`	TLS, routing	IT + Platform
PostgreSQL	`postgres:16-alpine`	`erp-postgres`	OLTP	Platform + IT
Redis	`redis:7-alpine`	`erp-redis`	Cache, Celery backend	Platform

RabbitMQ	`rabbitmq:3-management-alpine`	`erp-rabbitmq`	Message broker	Platform
MinIO	`enterprise-erp-minio:local`	`erp-minio`	Object storage	Platform
ClamAV	`clamav/clamav:1.4`	`erp-clamav`	Upload scanning	Platform
OpenSearch	`opensearchproject/opensearch:2`	`erp-opensearch`	Search (optional)	Platform

4. Data assets

Asset	Volume name	Contents	Backup owner
OLTP database	`erp_pgdata`	All tenant business data	IT (**Template / Pending sign-off** schedule)
Object store	`erp_minio_data`	Attachments, exports	IT
Redis AOF	`erp_redis_data`	Cache (non-authoritative)	Platform
RabbitMQ	`erp_rabbitmq_data`	Queues (transient)	Platform
Upload scratch	`erp_crm_uploads`, `erp_asset_storage`	Module files	Platform
ClamAV defs	`erp_clamav_data`	AV signatures	Platform

5. Network & logical identifiers

Type	Value	Environment	Notes
Host IP	`172.16.200.30`	Production (example)	Internal only
HTTPS URL	`https://172.16.200.30:8443`	Production	Via nginx
API base	`/api/v1`	All	Versioned REST
Docker network	`erp-net`	All	Bridge
MinIO bucket	`cache-erp-bucket` (default)	Prod	Configurable `S3_BUCKET`
Git remotes	`github.com/ronanop/enterprise-erp.git` (primary)	Source	Runtime on-prem

Internal DNS hostnames (if registered): **Template / Pending sign-off**

6. Cryptographic assets

Asset	Location	Purpose	Rotation
TLS certificate	`docker/nginx/certs/erp.crt`	HTTPS to users	**Template / Pending sign-off**
TLS private key	`docker/nginx/certs/erp.key`	TLS	Restricted access
`JWT_SECRET_KEY`	Host `.env`	JWT signing	**Template / Pending sign-off**
`FIELD_ENCRYPTION_KEYS`	Host `.env`	Column encryption	Platform procedure
`PII_ENCRYPTION_KEY`	Host `.env`	PII fields	Platform procedure
MinIO root credentials	Host `.env`	Object admin	IT + Platform

7. Third-party / external services (non-primary runtime)

Service	Use	Data leaves premises?
GitHub	Source control, CI triggers	Source code only

Microsoft Entra (optional)	OAuth SSO	Auth tokens / profile
SMTP / Brevo (optional)	Email delivery	Message content
FCM (optional)	Push notifications	Device tokens

None of the above replace on-prem PostgreSQL or MinIO as **primary** runtime stores in this deployment model.

8. Ownership matrix

Function	Primary owner	Backup
Server hardware & LAN	Cache Digitech IT	—
VPN	Cache Digitech IT	—
Docker host hardening	IT + Platform	—
Application releases	Platform team	Module leads
Database schema	Platform team	—
Security patches (OS)	IT	—
Security patches (app images)	Platform	—
Backups & restore tests	IT	Platform

9. Change log (inventory)

Date	Change	By
2026-11-03	v2.0 on-prem inventory baseline	Platform

Last verified against production: Template / Pending sign-off
