Infrastructure Shared-Responsibility Matrix (On-Premises)

Ref: 1.7
Product: iConnect Plus
Organisation: Cache Digitech
Classification: Internal — Confidential
Version: 2.0
Date: 2026-11-03
Deployment model: On-premises (Cache Digitech premises) · VPN for remote access
Audience: IT leadership, security assessors, platform engineering, auditors

---

1. Purpose

Clarify **who is responsible** for security and operations when iConnect Plus runs on **Cache Digitech-owned premises infrastructure**, accessed via **corporate LAN** and **VPN**. This matrix **replaces** AWS-style cloud shared-responsibility as the primary framing for this compliance pack.

Filename retained for document numbering continuity: `1.7-Cloud-Shared-Responsibility-Matrix.md`.

2. Parties

Party	Role
Cache Digitech IT / Infrastructure	Physical server, LAN, firewall, VPN, OS patching, backups, TLS certs at edge
Application / Platform team	Docker Compose, application code, schema migrations, RBAC catalog, secrets injection
VPN provider / vendor (if not wholly in-house)	VPN appliance availability per contract
End users	Credential hygiene, MFA devices, acceptable use
Third-party SaaS (optional)	GitHub (source), Microsoft Entra (SSO), SMTP — per vendor terms

3. Responsibility matrix

Legend: **R** = Responsible, **A** = Accountable, **C** = Consulted, **S** = Shared, **—** = Not applicable

Domain	IT / Infra	Platform team	VPN (vendor)	End users
Physical security of server room	**R/A**	C	—	—
Power / cooling / hardware lifecycle	**R/A**	—	—	—
Corporate LAN switching & firewall rules	**R/A**	C	—	—
VPN service availability	C	—	**R/A** (or IT if in-house)	—
VPN user provisioning / deprovisioning	**R/A**	—	C	—
OS hardening on app host	**R/A**	C	—	—
Docker engine security	**S**	**S**	—	—
Container image builds & CVE response	C	**R/A**	—	—
PostgreSQL availability & backup restore	**R/A**	C	—	—
MinIO availability & backup	**R/A**	C	—	—
Redis / RabbitMQ ops	**S**	**R**	—	—

TLS certificate issuance & renewal	**R/A**	C	—	—
Application authentication & MFA	C	**R/A**	—	**R** (protect OTP device)
RBAC / authorization logic	—	**R/A**	—	—
Tenant data isolation in code	—	**R/A**	—	—
Field-level encryption keys	C	**R/A**	—	—
ClamAV / upload malware scanning	C	**R/A**	—	—
Security logging & SIEM forwarding	**R/A**	C	—	—
Incident response coordination	**R/A**	**R**	C	C
Vulnerability scanning (infra)	**R/A**	C	—	—
SAST/DAST/VAPT of application	C	**R/A**	—	—
Source code access (GitHub)	C	**R/A**	—	—
End-user device security (remote)	C	—	—	**R/A**
Acceptable use / training	**R/A**	C	—	**R**

4. Data protection split

Data type	Custodian	Processor notes
Employee PII in ERP	Cache Digitech (employer)	Platform team operates system on behalf of employer
Customer / vendor master (if stored)	Cache Digitech business unit	Same
Audit logs	Cache Digitech	Retention: **Template / Pending sign-off**

Primary storage remains **on-premises PostgreSQL and MinIO** — not outsourced IaaS database/object store in this model.

5. Optional external services (adjacent responsibilities)

Service	IT	Platform	Vendor
GitHub	—	Access control, branch protection	GitHub SOC reports
Microsoft Entra SSO	Identity federation config	App registration, redirect URIs	Microsoft
Email SMTP relay	Mail DNS / relay allowlists	Template content, credentials in env	Provider

6. Evidence and attestations

Control area	Evidence location	Status
VPN configuration review	IT change records	**Template / Pending sign-off**
Firewall rule review	IT	**Template / Pending sign-off**
Backup restore test	IT + Platform	**Template / Pending sign-off**
Production `.env` secret handling	Platform runbook	**Template / Pending sign-off**
Application VAPT report	§2.6 tracker	**Template / Pending sign-off**

7. Escalation contacts

Role	Name	Contact
IT Infrastructure lead	**Template / Pending sign-off**	—
Platform engineering lead	**Template / Pending sign-off**	—
Security officer	**Template / Pending sign-off**	—

8. Related documents

Ref	Document
1.1	Solution Architecture
1.5	Asset & Component Inventory
2.3	Environment Separation
2.6	Security Testing Reports and Remediation Tracker

9. Document control

Version	Date	Change
2.0	2026-11-03	Renamed conceptually to on-prem infrastructure SRM

Approval: Template / Pending sign-off
