# Change and Release Records

**Ref:** 2.4
**Product:** iConnect Plus
**Organisation:** Cache Digitech
**Classification:** Internal — Confidential
**Version:** 2.0
**Date:** 2026-11-03
**Deployment model:** On-premises (Cache Digitech premises) · VPN for remote access
**Audience:** Release managers, platform engineering, IT, auditors

---

## 1. Purpose

Provide a **template and register** for tracking application and infrastructure changes deployed to **on-premises** iConnect Plus hosts.

---

## 2. Release process (on-premises)

| Step | Activity | Owner |
|---|---|---|
| 1 | Merge to `main` on GitHub `origin` | Engineering |
| 2 | Build Docker images on deploy host or CI artifact | Platform |
| 3 | Run Alembic migrations (`RUN_MIGRATIONS=true` on API container) | Platform |
| 4 | Rolling restart via `docker compose` | Platform + IT |
| 5 | Smoke test (health, login, critical module) | QA / Platform |
| 6 | Update change record below | Release manager |

Mirrors ( `iconnectplus` , `iconnectplus-erp` ) sync code refs per org policy — **runtime remains on-prem**.

---

## 3. Change record template

| Field | Value |
|---|---|
| Change ID | CHG-YYYY-NNNN |
| Title | |
| Environment | Dev / UAT / Production |
| Target host | e.g. `172.16.200.30` |
| Requestor | |
| Implementer | |
| Planned window | |
| Risk level | Low / Medium / High |
| Rollback plan | Previous image tag + DB migration downgrade procedure |
| Security impact | None / Auth / Crypto / Network |
| Approver | **Template / Pending sign-off** |
| Status | Planned / In progress / Complete / Rolled back |

## 4. Release register

| Change ID | Version / commit | Environment | Deploy date | Summary | Approver sign-off |
|---|---|---|---|---|---|
| — | — | Production | — | *No signed entries in this pack* | **Template / Pending sign-off** |

> *Do not backfill fictional approval dates. Populate this table from ITSM / change tickets when available.*

## 5. Emergency change procedure

| Step | Action |
|---|---|
| 1 | Notify IT and platform on-call |
| 2 | Document retroactive change record within 24h |
| 3 | Post-incident review if security-related |

Details: **Template / Pending sign-off**

## 6. Database migration controls

| Rule | Detail |
|---|---|
| Tool | Alembic only |
| Review | DBA/platform review for locking migrations |
| Backup | Snapshot before prod migration — **Template / Pending sign-off** |

## 7. Related documents

| Ref | Document |
|---|---|
| 2.3 | Environment Separation |
| 2.5 | Source Code Access Control |

**Approval: Template / Pending sign-off**
