User Manual

Ref: 6.1
Product: iConnect Plus
Organisation: Cache Digitech
Classification: Internal — Confidential
Version: 2.0
Date: 2026-11-03
Deployment model: On-premises (Cache Digitech premises) · VPN for remote access
Audience: End users (employees, business users)

---

1. About iConnect Plus

iConnect Plus is Cache Digitech's internal enterprise resource planning application for HR, finance, operations, and related business modules. It runs on **company servers inside Cache Digitech premises** — not as a public internet SaaS product for this deployment.

---

2. How to access the application

Location	How to connect
Office (corporate LAN)	Open the internal URL provided by IT (example: `https://172.16.200.30:8443`) in a supported browser
Remote (home / travel)	Connect to **Cache Digitech VPN first**, then open the same internal URL

Without VPN, remote access is **not** available. Do not attempt to expose the application on the public internet.

Supported browsers: Current Chrome, Edge, or Firefox — **Template / Pending sign-off** for minimum versions.

---

3. Signing in

1. Navigate to the admin or ESS URL after LAN/VPN connection.
2. Enter your **work email** and **password** provided by your administrator.
3. If your account has **multi-factor authentication (MFA)** enabled, enter the **6-digit code** from your authenticator app when prompted.

3.1 Security features you should know

Feature	What it means for you
Secure password storage	Passwords are stored using strong hashing — IT cannot read your password
Optional MFA (TOTP)	Extra code from phone app for higher-risk accounts
Session cookies	Stay signed in securely; sign out on shared PCs
Account lockout	After **5** failed login attempts, account locks for **15 minutes** — contact admin if needed
Role-based access	You only see menus and data your role allows

---

4. Navigation

- Use the **left sidebar** to move between modules (HR, Finance, etc.) enabled for your tenant.
- Use **search** and **filters** on list pages where available.
- **Help** links inside modules — **Template / Pending sign-off** per module rollout.

5. Common tasks

Task	Where
Update profile	User settings / HR self-service (ESS)
Submit leave / attendance	ESS or HR module (per configuration)
View payslips	Payroll / ESS — **Template / Pending sign-off**
Approve requests	Workflow inbox (if assigned approver)

6. Data handling expectations

- Do not share your password or MFA device.
- Do not copy **confidential** or **restricted** data to personal email or cloud drives unless policy allows.
- Report suspicious login or data issues to IT immediately.

Classification levels used by the platform: **public**, **internal**, **confidential**, **restricted** — see administrator guidance in **6.2**.

7. Sign out

Use **Sign out** from the user menu, especially on shared computers. Closing the browser may end the session depending on settings.

8. Getting help

Issue	Contact
VPN cannot connect	Cache Digitech IT helpdesk — **Template / Pending sign-off**
Forgot password	Tenant administrator
Missing menu / permission	Tenant administrator
Application error	IT / platform support — **Template / Pending sign-off**
