ICONNECT PLUS / CACHE DIGITECH

Platform User Manual

Common orientation for the whole ERP - sign-in, home dashboard, My Jobs, platform pillars, shell navigation, and where each operations module fits

All users | ERP admins | Cross-module

Product	iConnect Plus ERP
Document	Platform User Manual v1.0
Audience	Everyone who signs in to iConnect Plus
Demo user	Techbank
Date	17 October 2026

Part A is the common path. Part B is shell reference. Module-specific SOPs live in separate manuals.

Table of contents

1. Who this manual is for and access
2. Platform map overview
3. Part A - Common walkthrough (steps 00-09)
4. Part B - Shell reference
5. Operations module catalog
6. Related module manuals
7. Roles and typical checkpoints

Who this manual is for and access

This is the **common** manual for iConnect Plus. Read it first. It covers sign-in, the home shell, My Jobs, Foundation / Organization / Master Data pillars, notifications, and how operations modules appear in the sidebar.

> Sign in with **Microsoft Entra SSO** only. If a module is missing from your sidebar or Home departments list, ask an ERP admin to assign you under Organization - Users (or the module's own Users pane).

1. Open iConnect Plus and complete Microsoft sign-in.
2. Land on Dashboard (Home) and confirm your assigned modules.
3. Use My Jobs daily for cross-module approvals.
4. Admins complete Foundation - Organization - Master Data before scaling operations.

Platform map overview

The left ERP shell groups navigation into Overview, Foundation, Organization, Master Data, and Operations. Foundation, Organization, and Master Data stay in the same tab; most Operations modules open in their own workspace.

How you move through iConnect Plus

Demo session: Techbank (techbank@cachedigitech.com)

Left sidebar lists Overview, Foundation, Organization, Master Data, then Operations modules

Detailed how-to for CRM, Projects, Procurement, HRMS, Assets, Marketing, Service - see module manuals

Part A - Common walkthrough

Follow these steps in order. Screenshots use demo session **Techbank** (`techbank@cachedigitech.com`).

Step 00 - Sign in

Open iConnect Plus and choose **Sign in with Microsoft**. Use your organization Microsoft Entra account. ERP admins assign module access under Organization - Users. Passwords are not stored in iConnect Plus for Entra users.

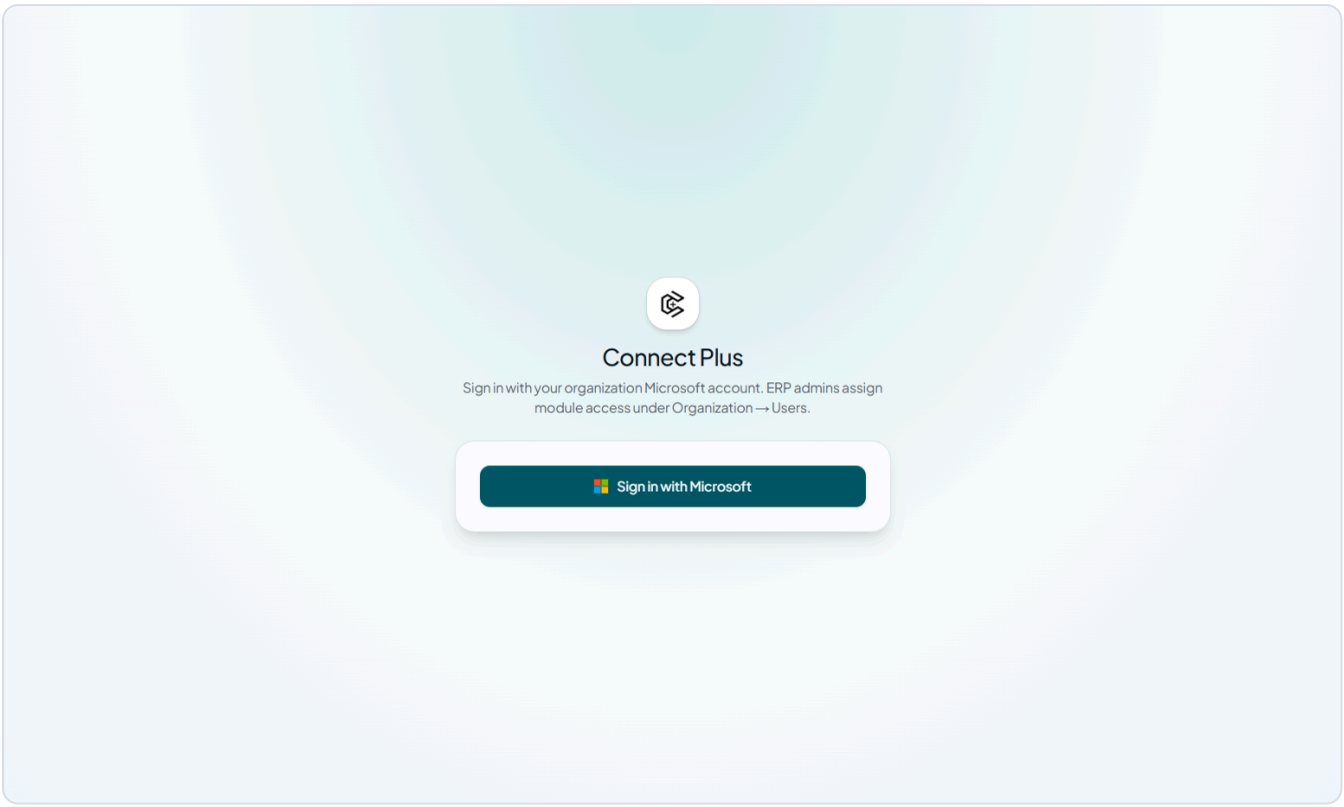

Figure A-00 - Connect Plus sign-in with Microsoft Entra SSO.

Step 01 - Platform Dashboard (Home)

After sign-in you land on **Dashboard** (`/home`). Review KPIs for modules assigned to you (pipeline, AR/AP, open POs), lead-to-delivery stage counts, and module activity. Use Search modules in the top bar to jump quickly.

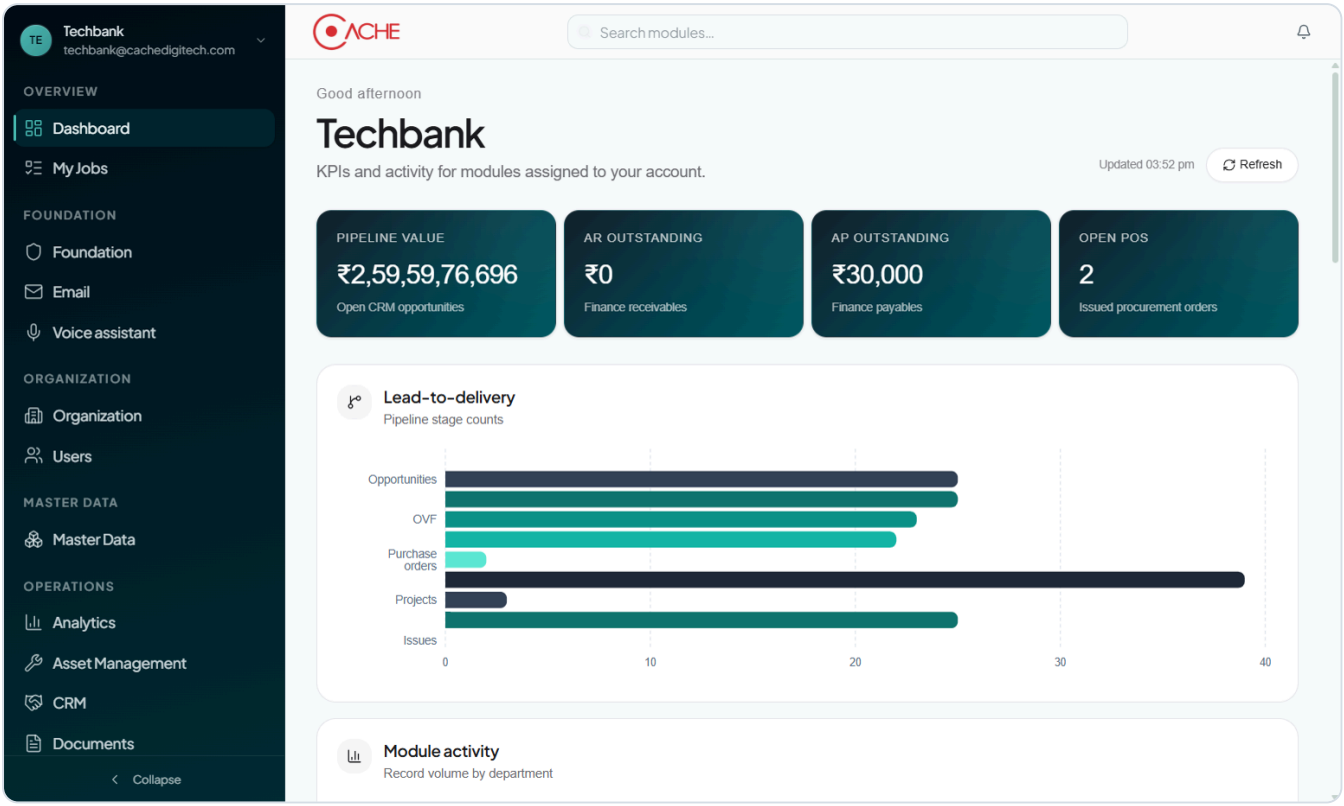

Figure A-01 - Platform home KPIs and lead-to-delivery chart.

Step 02 - Departments catalog

Scroll Home to **Departments** for Live / Partial / Offline status across assigned modules. Open Hub on a row to enter that module. This is the whole-ERP map of what you can access.

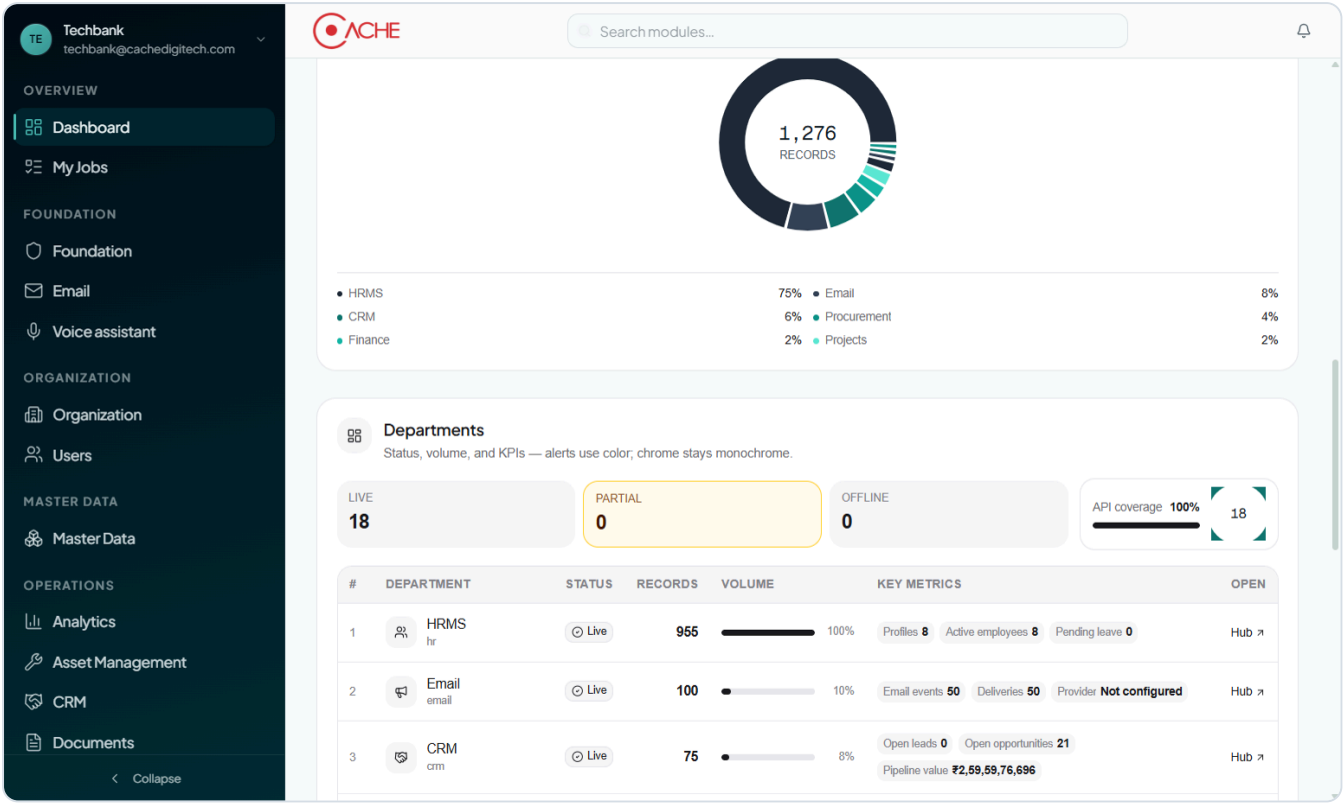

Figure A-02 - Department share and departments status table.

Step 03 - My Jobs

Open **My Jobs** for approvals and assigned work across every module you can access - one table per module. Open a job or Open module to continue in context.

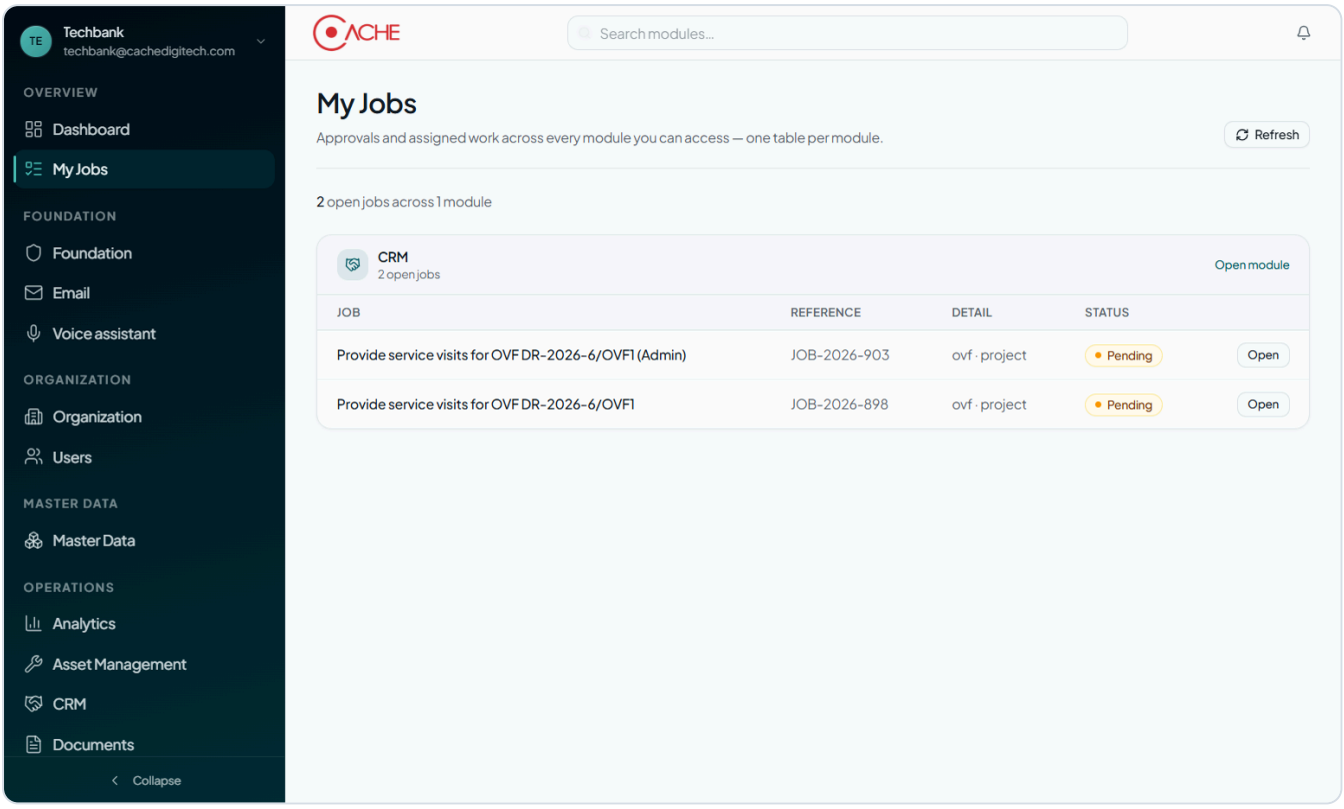

Figure A-03 - My Jobs cross-module inbox (CRM jobs shown).

Step 04 - Foundation setup

Under Foundation, run the **Foundation setup** wizard (Access - Tenant - Users - RBAC - Engines - Settings - Next). Platform sequence is Foundation - Organization - Master Data. Complete readiness checks before inviting more users.

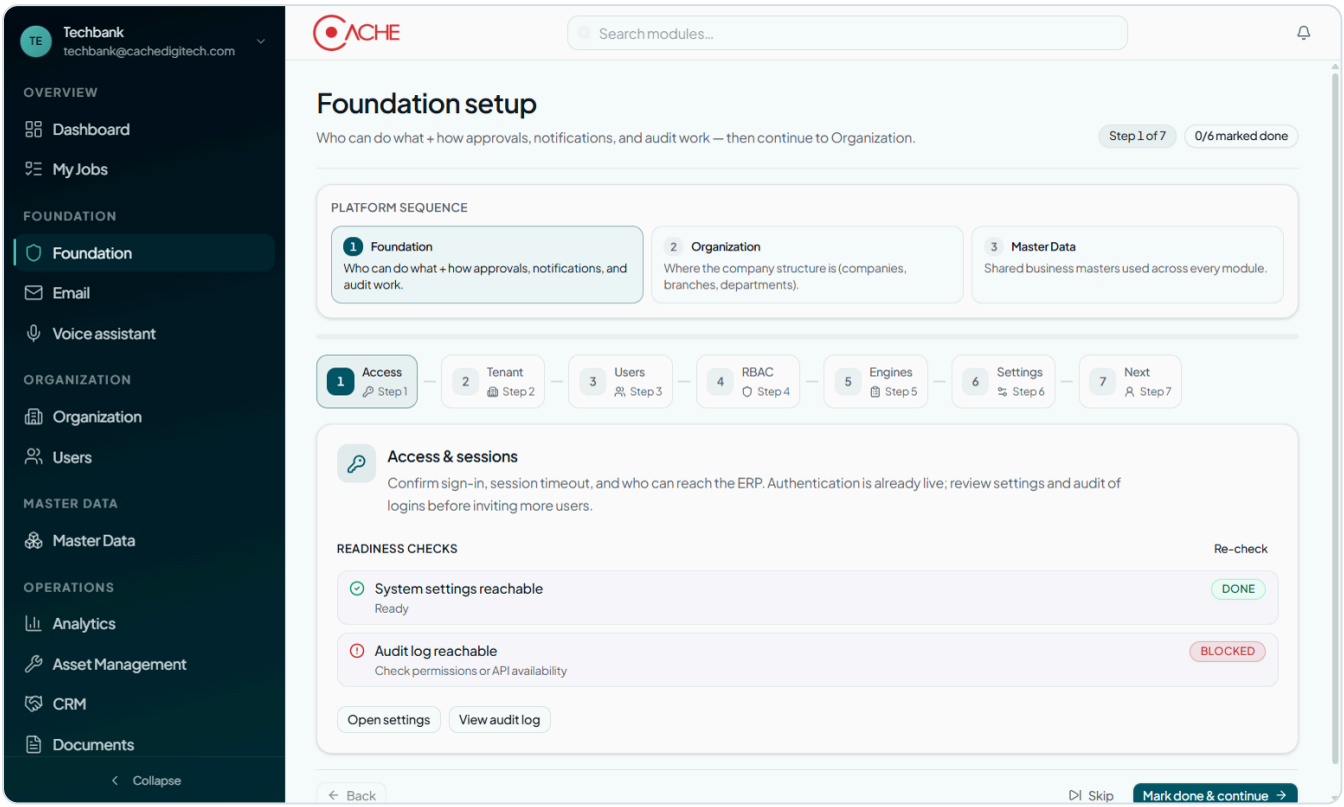

Figure A-04 - Foundation setup wizard - Access & sessions step.

Step 05 - Organization

Configure companies, branches, departments, and the org tree on **Organization**. This is where company structure lives for every operational module.

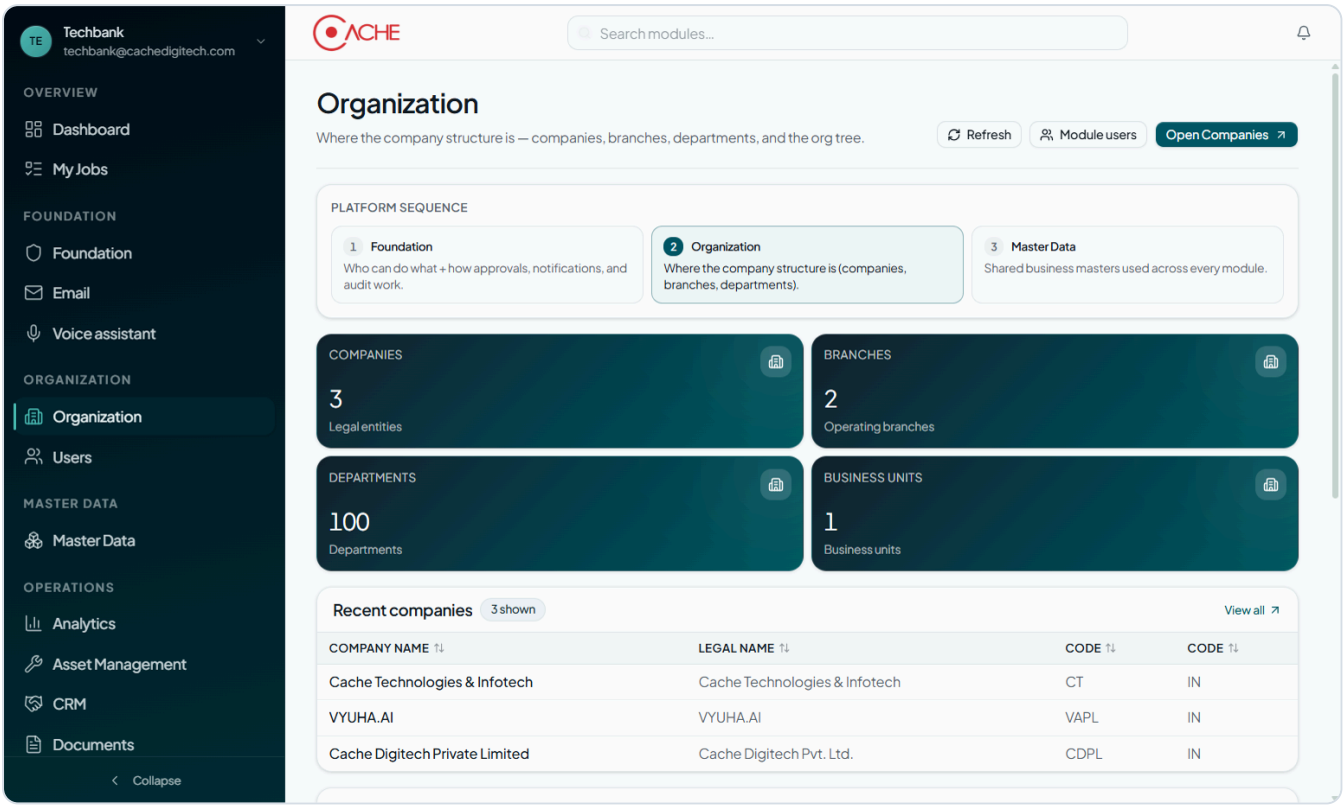

Figure A-05 - Organization hub with company KPIs.

Step 06 - Master Data

Maintain shared masters on **Master Data**: employees, customers, vendors, products, UOM, currencies, taxes, assets, and warehouses. Operational modules consume these.

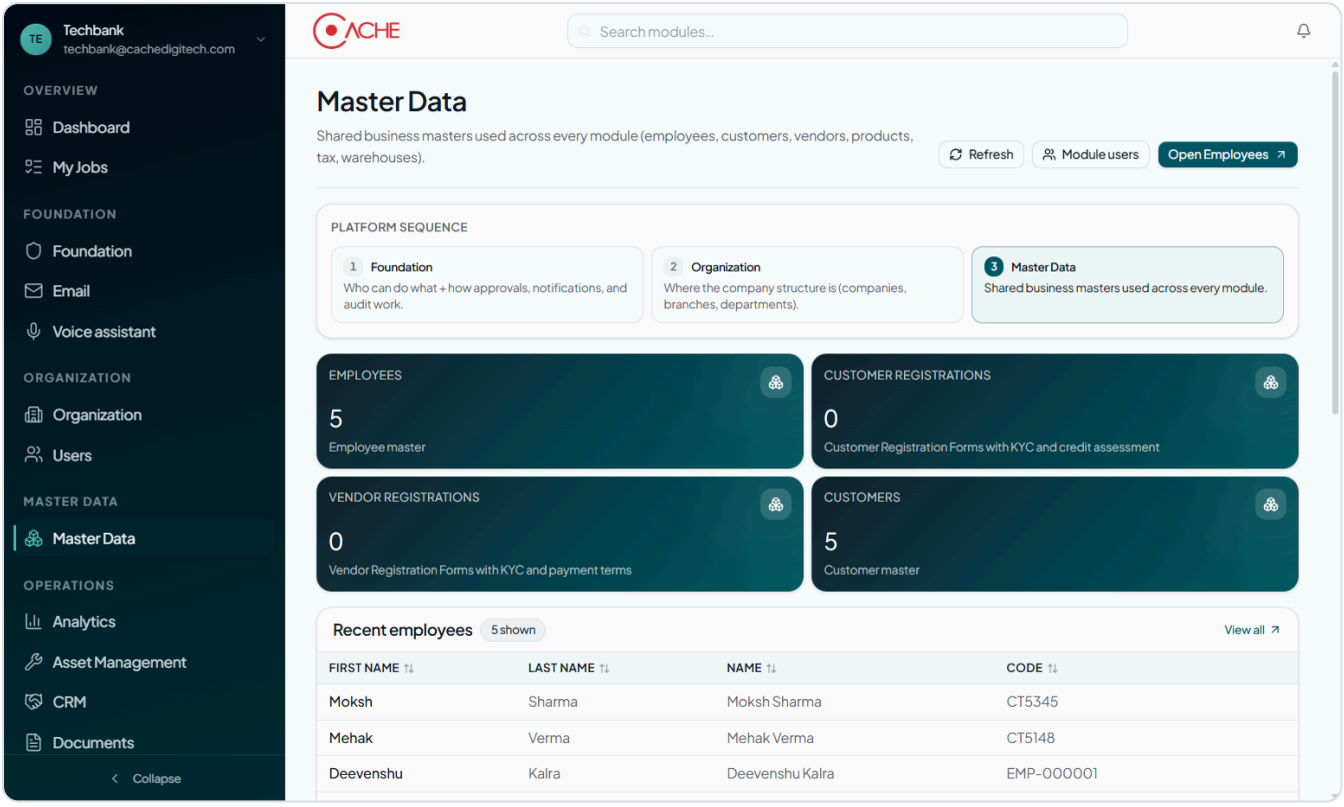

Figure A-06 - Master Data hub and workspace areas.

Step 07 - Organization Users

ERP admins manage access on **Organization - Users**: ERP admins, module admins, module members, and Entra users without assignment. Module-specific panels also assign domain members inside each module.

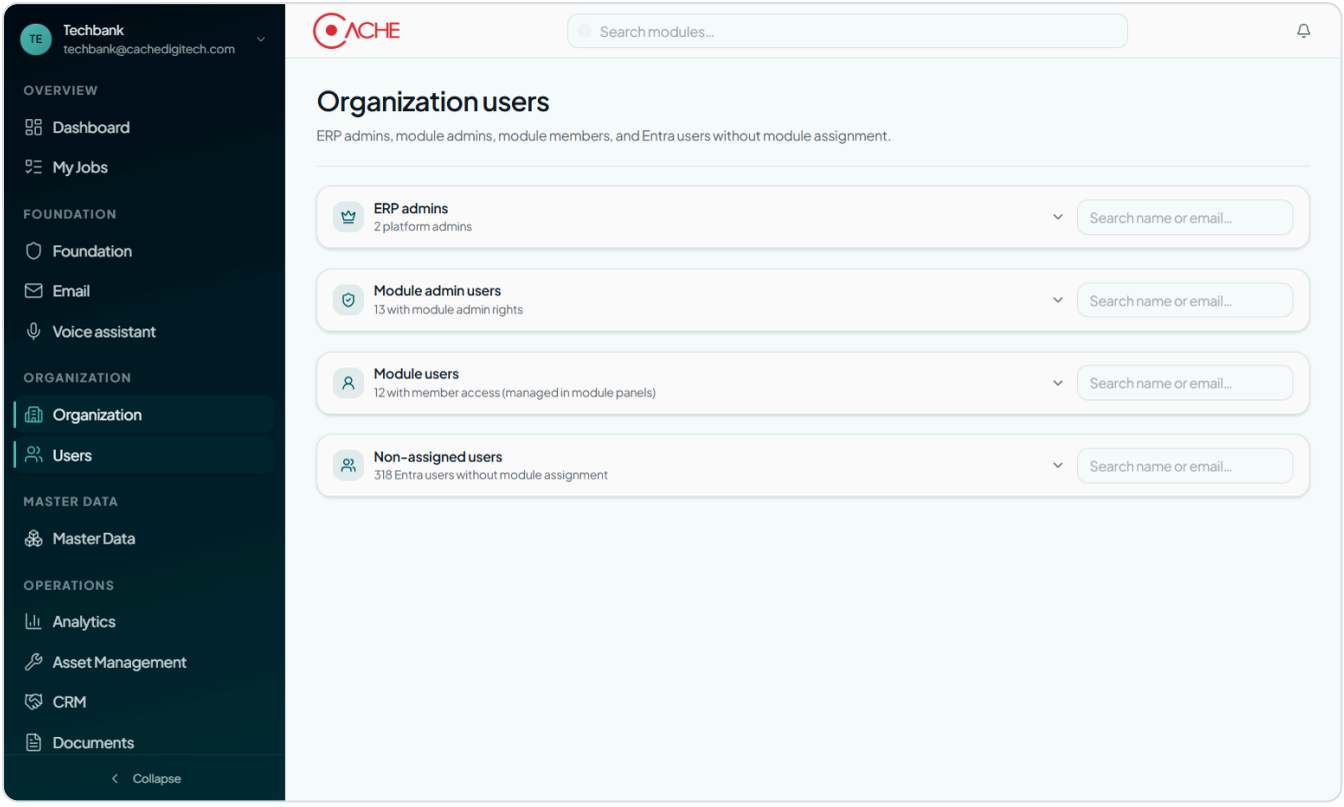

Figure A-07 - Organization users accordion by role tier.

Step 08 - Notifications

Use the top-bar **Notifications** bell for cross-module alerts (freight ready, stage completed, supporting items, and more). Open an item to jump to the related record.

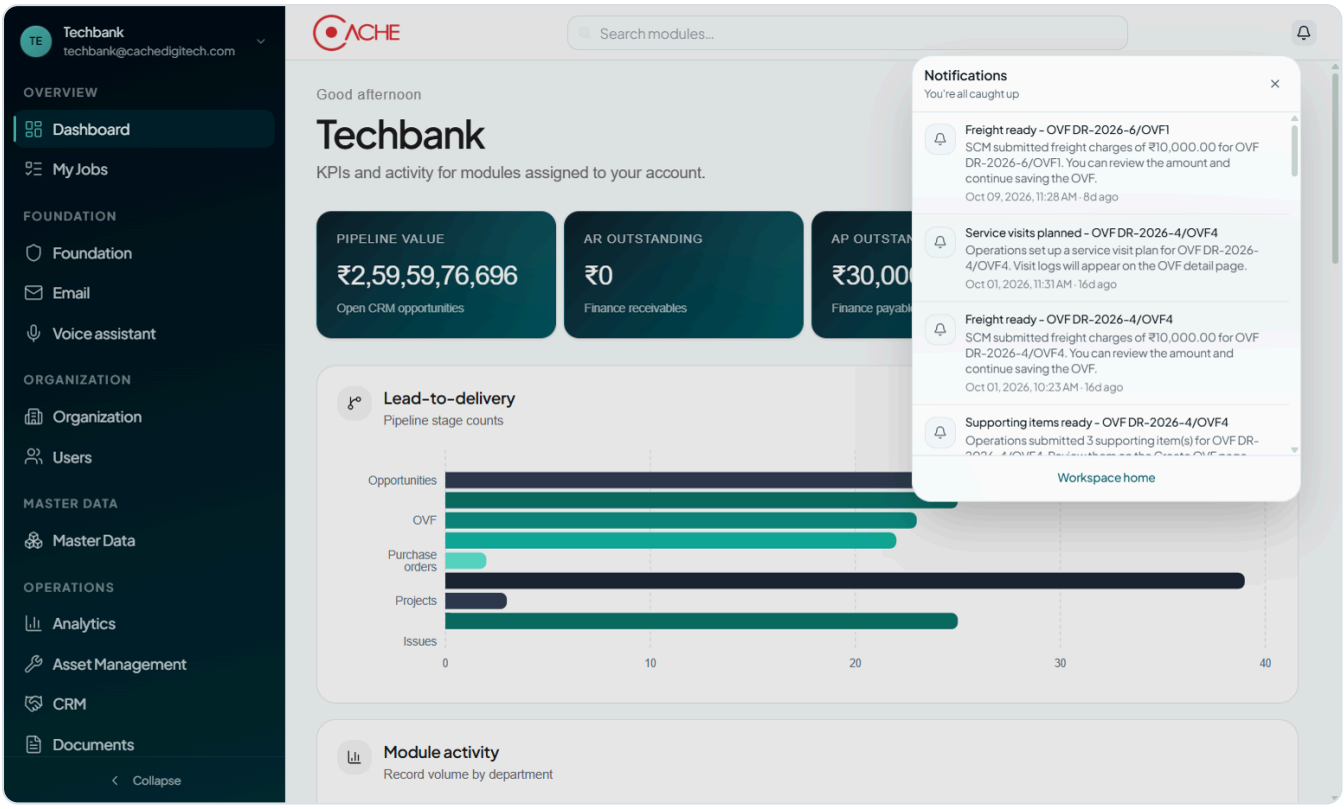

Figure A-08 - Notifications panel over the platform dashboard.

Step 09 - Account menu

Open the sidebar account chip for profile context and **Sign out**. Always sign out on shared workstations.

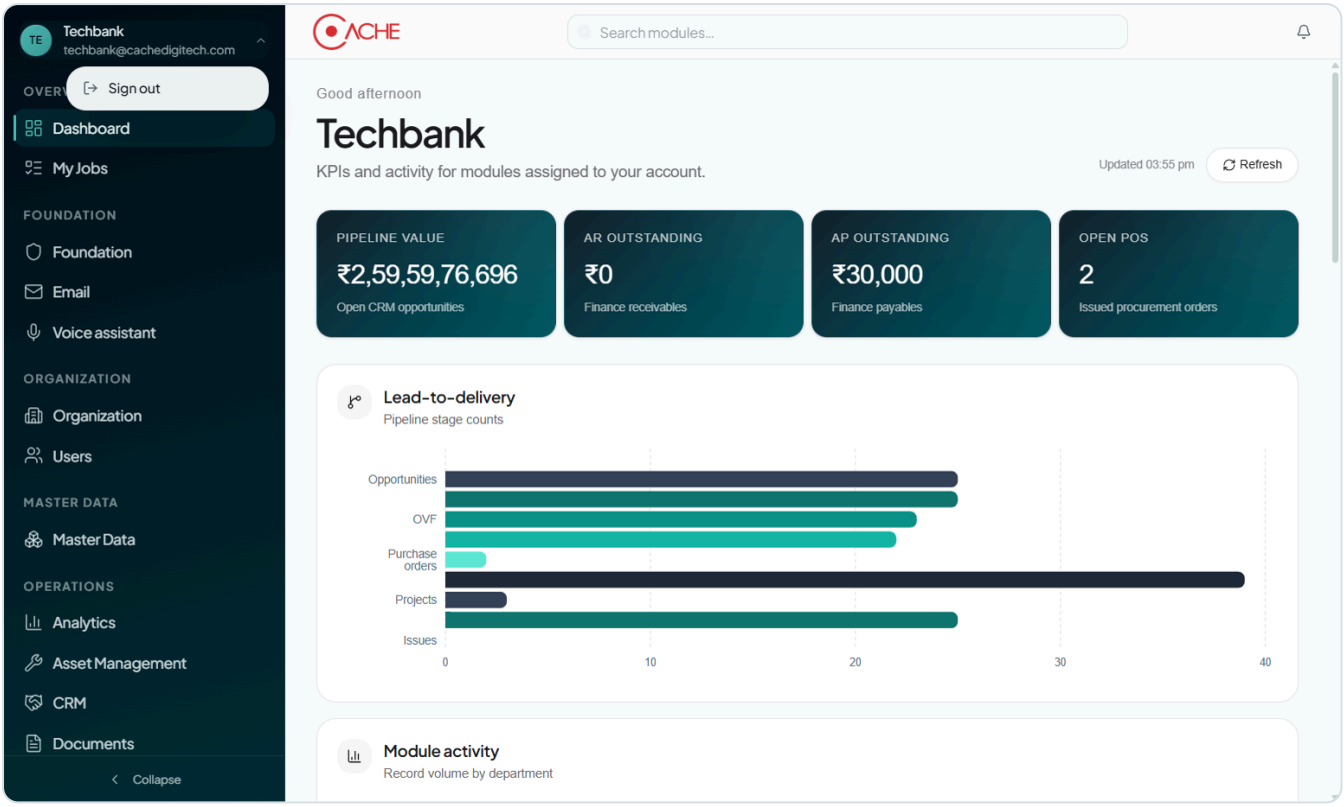

Figure A-09 - Account menu with Sign out.

Part B - Shell reference

Primary platform panes captured for this manual. Operations modules are listed in the catalog below rather than duplicated here.

B.01 Dashboard

Platform home - KPIs and activity for assigned modules.

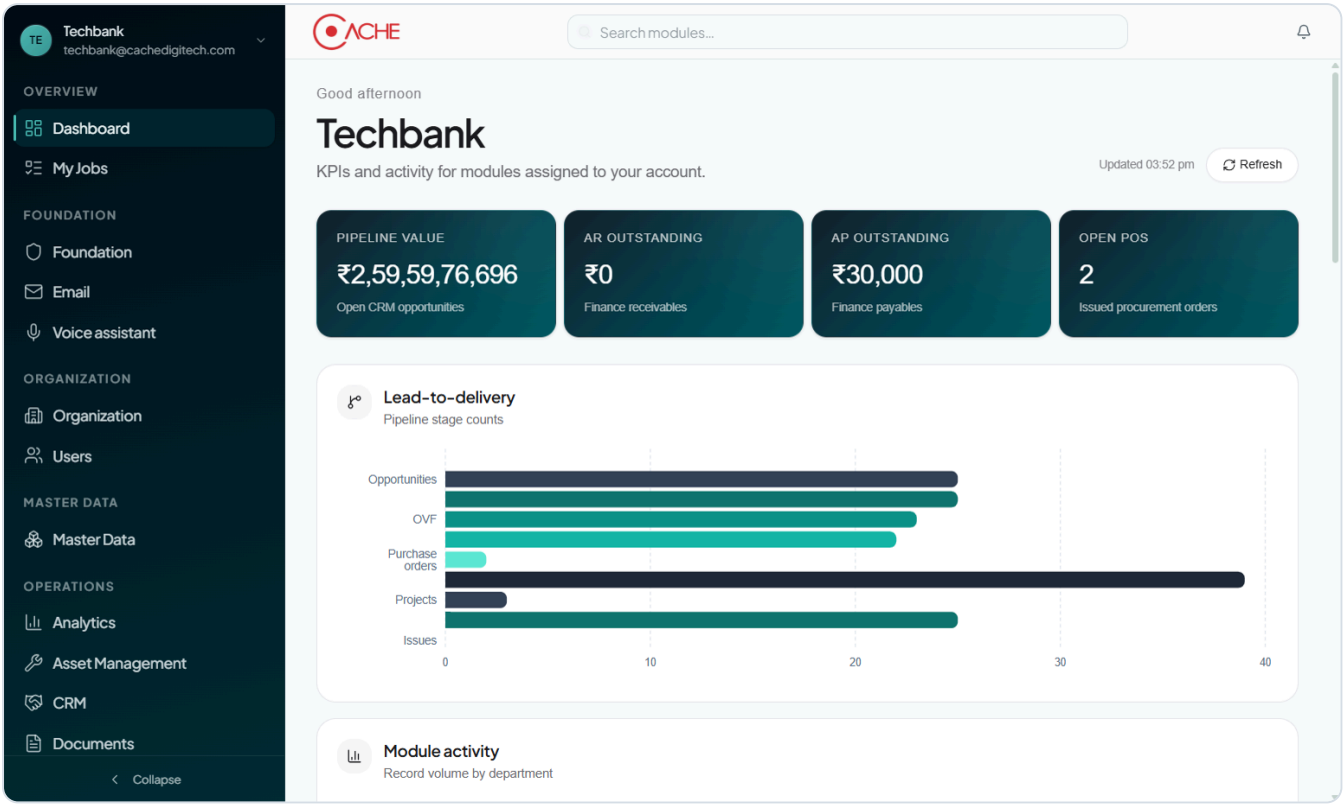

Figure B-01 - Dashboard.

B.02 Departments catalog

Live module health and Hub links on Home.

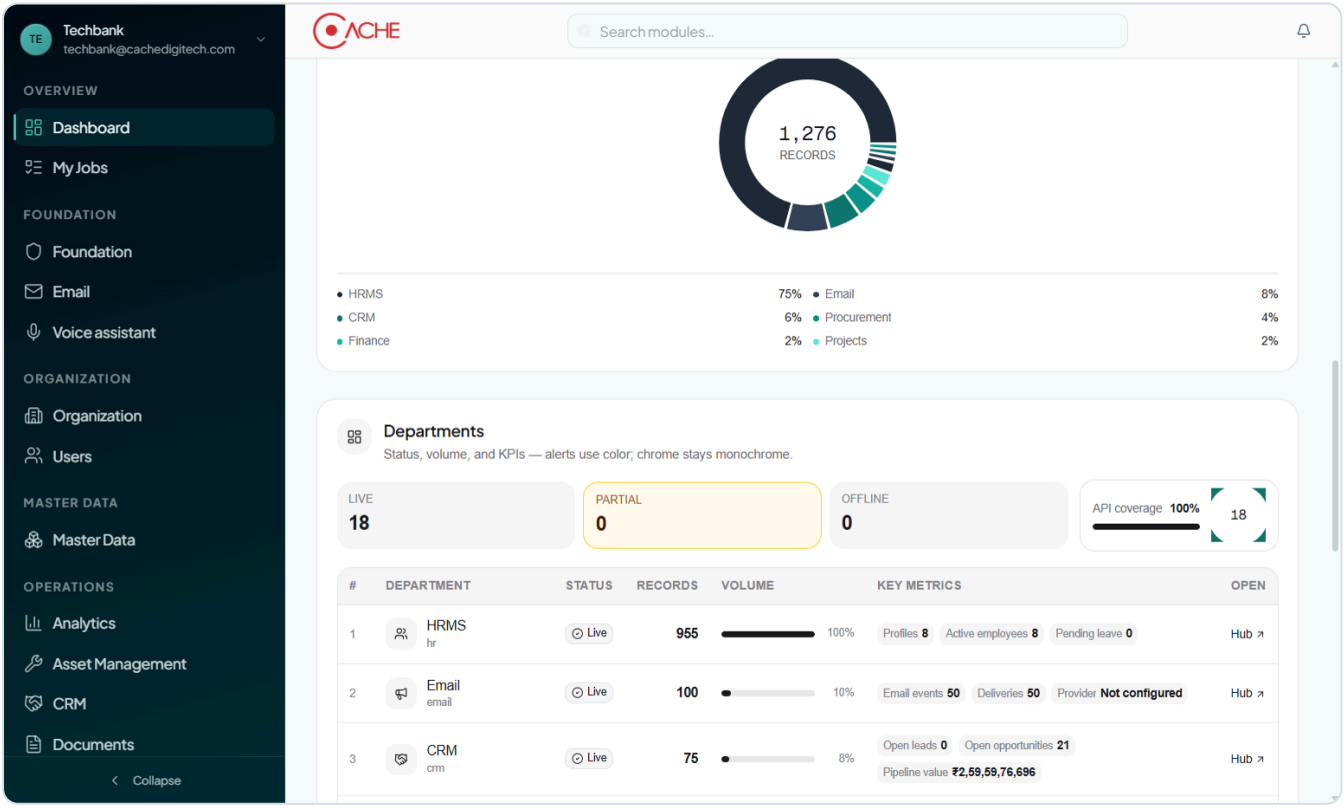

Figure B-02 - Departments catalog.

B.03 My Jobs

Cross-module approvals and assigned work.

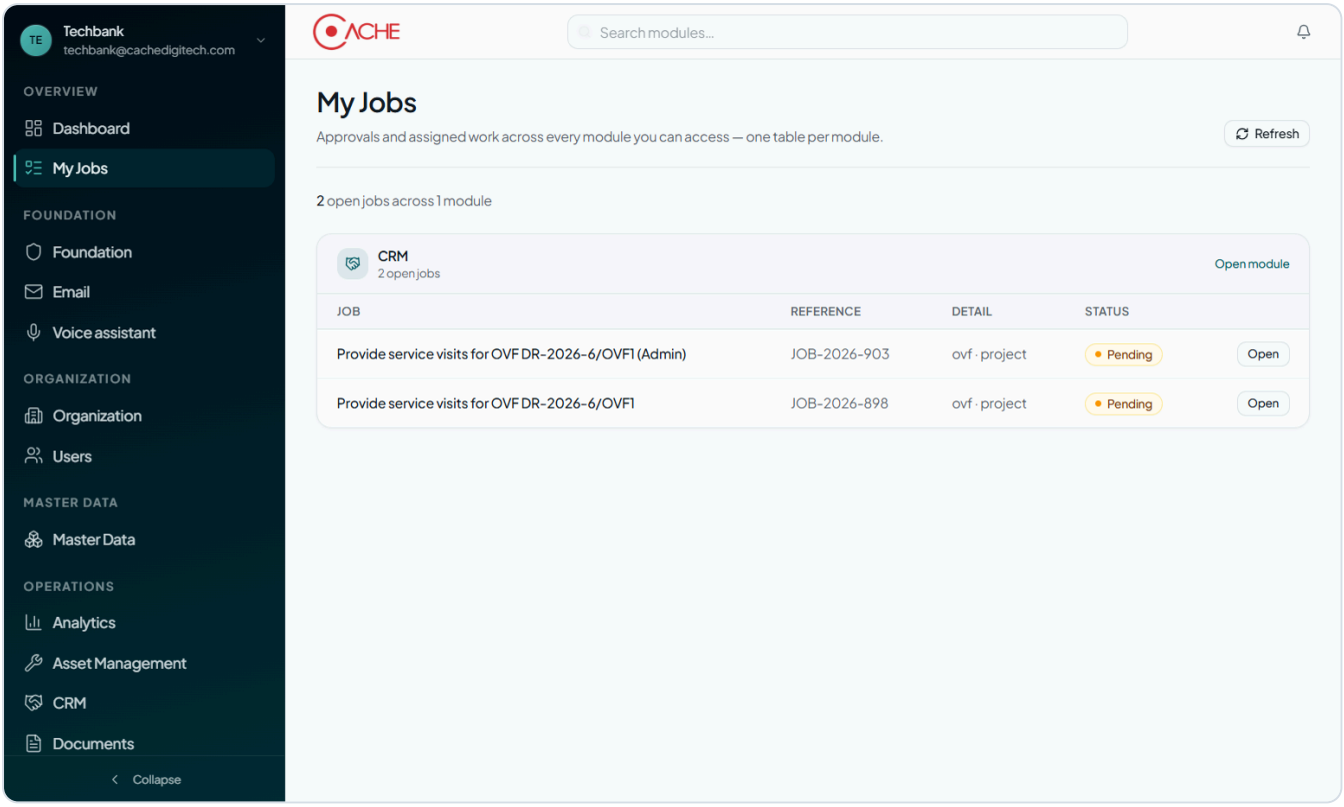

Figure B-03 - My Jobs.

B.04 Foundation

Access, RBAC, workflows, notifications, audit, settings.

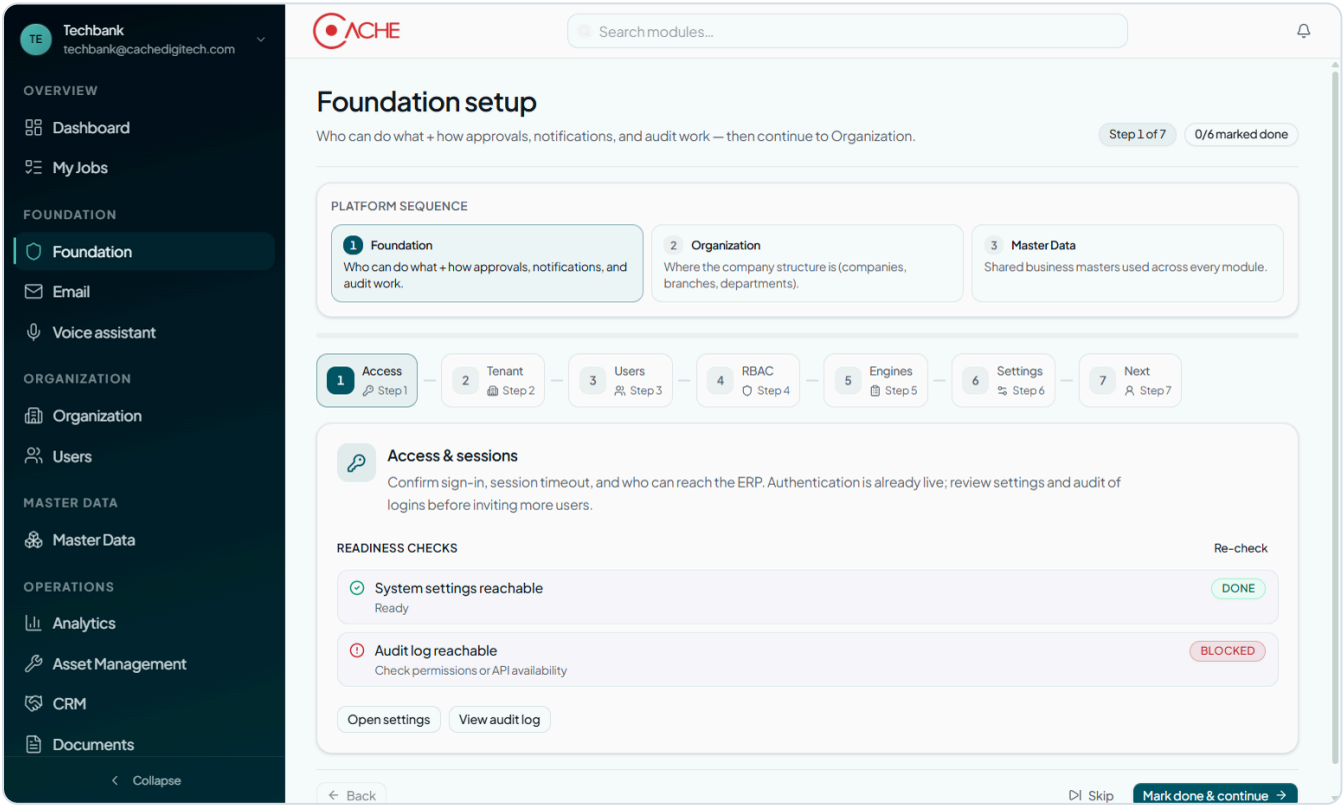

Figure B-04 - Foundation.

B.05 Organization

Companies, branches, departments, org tree.

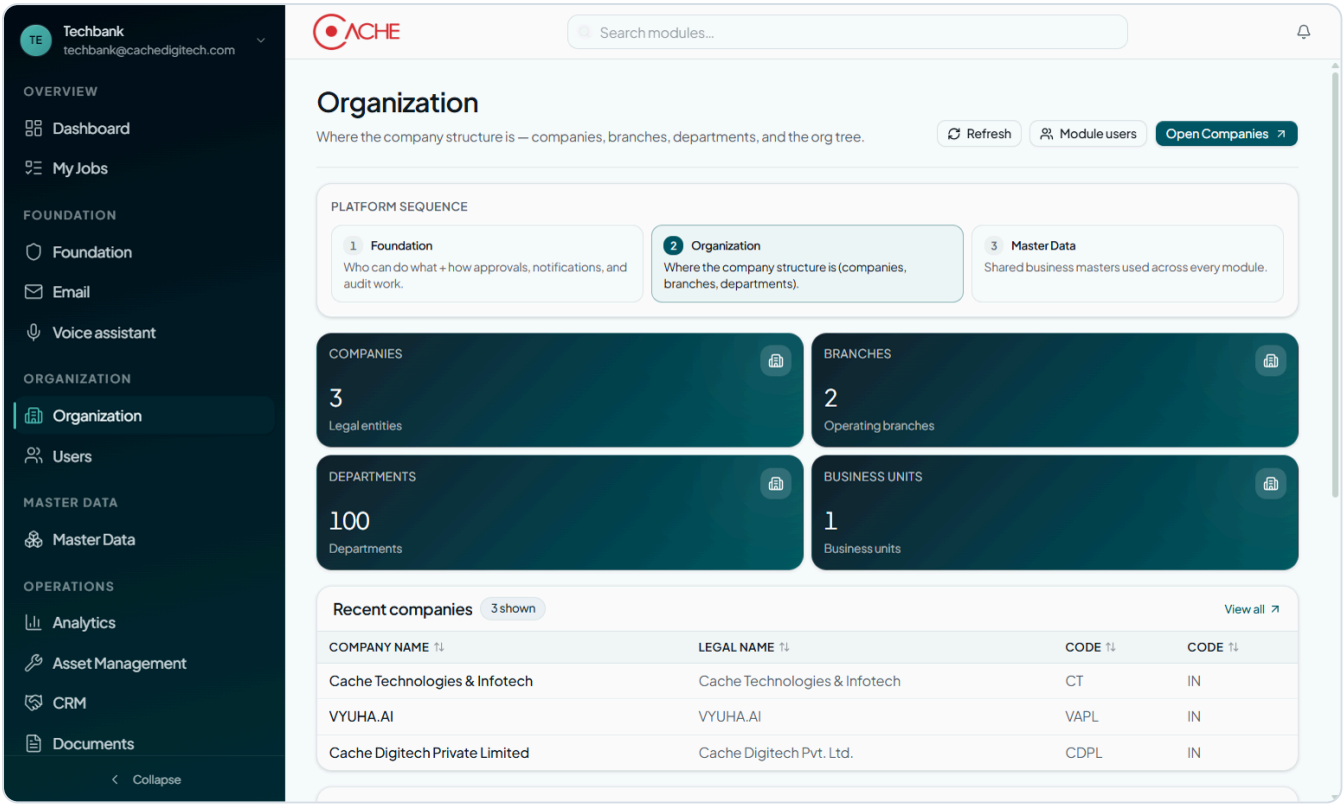

Figure B-05 - Organization.

B.06 Master Data

Shared employees, customers, vendors, products, tax.

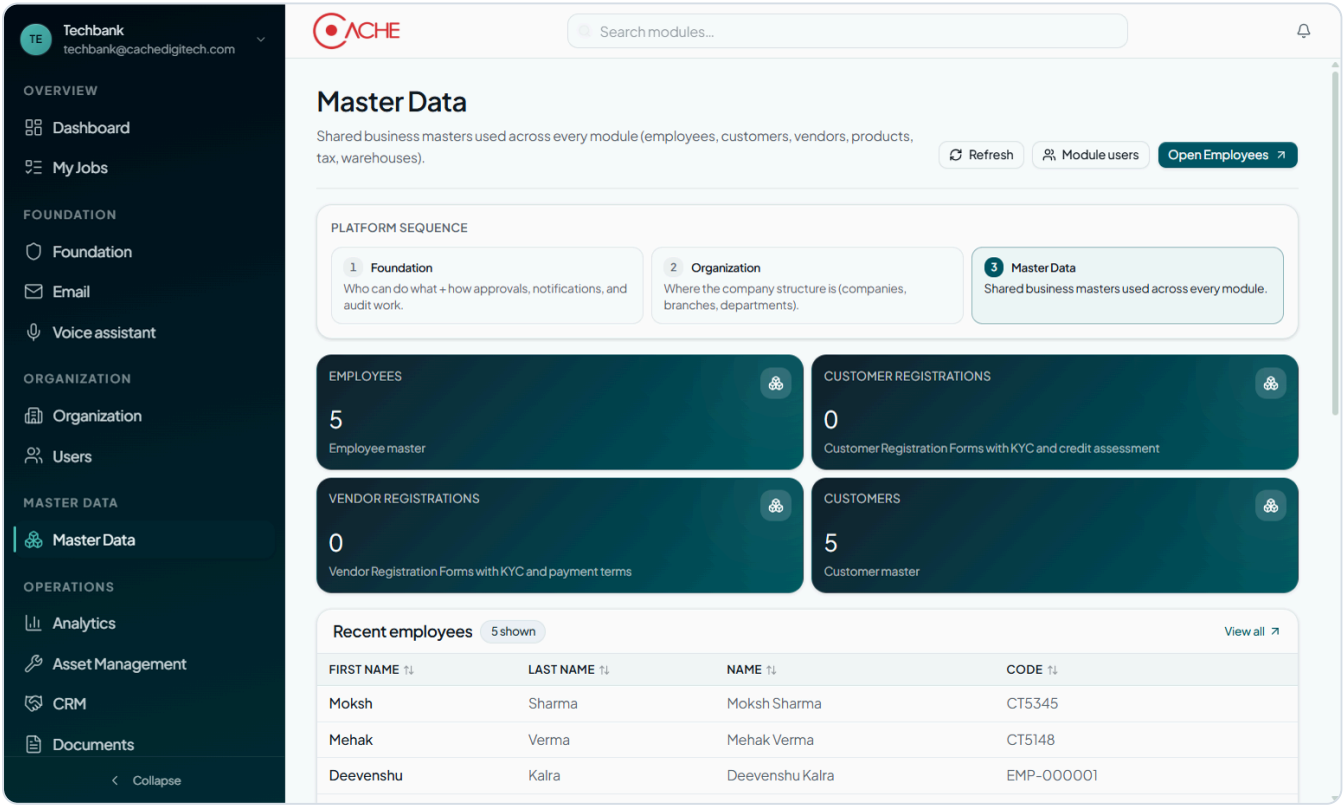

Figure B-06 - Master Data.

B.07 Organization Users

ERP and module access for Entra users.

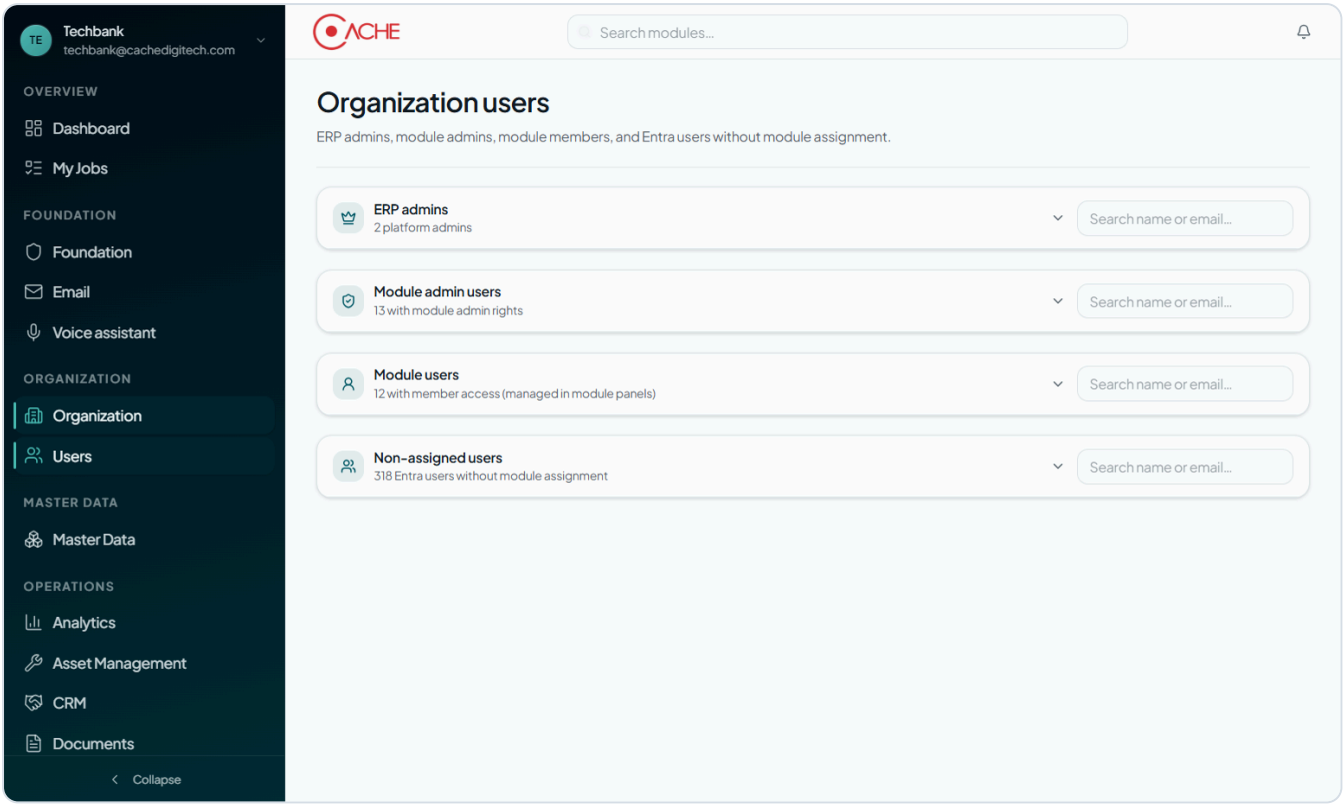

Figure B-07 - Organization Users.

Operations module catalog

Modules you may see under Operations (and on Home Departments), depending on assignment. Hidden from the shell nav but still assignable: Inventory, Payroll, Recruitment.

MODULE	PATH	WHAT IT IS FOR
Analytics	`/analytics`	Cross-domain analytics
Asset Management	`/assets`	IT / Non-IT asset lifecycle
CRM	`/crm`	Companies, leads, quotes, OVF, deals
Documents	`/documents`	Document management
Ecommerce	`/ecommerce`	Online commerce
Finance	`/finance`	GL, AR, AP, fiscal, reports
Helpdesk	`/helpdesk`	IT helpdesk
HRMS	`/hr`	Hire-to-exit workforce
Manufacturing	`/manufacturing`	Production
Marketing & Social	`/marketing`	Campaigns, content, M365
Procurement	`/procurement`	SCM, POs, delivery
Projects	`/projects`	Delivery projects and trackers
Quality	`/quality`	Quality management
Service	`/service`	Service request tickets and SLAs

Related module manuals

Detailed SOP walkthroughs with live screenshots live beside this platform guide under docs/user-manuals/.

MANUAL	FOLDER	FOCUS
CRM	`crm/`	Company to deal-won
Projects	`projects/`	Project delivery lifecycle
Procurement	`procurement/`	SCM / PO / delivery
HRMS	`hrms/`	Hire-to-exit
Assets	`assets/`	IT / Non-IT assets
Marketing	`marketing/`	Campaigns and content
Service	`service/`	Request tickets and SLAs
Platform (this)	`platform/`	Whole-ERP orientation

Roles and typical checkpoints

ERP admin

- Assign users on Organization - Users
- Own Foundation setup and RBAC
- Confirm Master Data readiness
- Grant module admin rights

Module admin

- Manage members inside the module Users pane
- Configure that module's masters and policies
- Monitor My Jobs for that domain
- Train creators / operators

Everyday user

- Sign in with Microsoft
- Work Home KPIs and My Jobs
- Open assigned modules from the sidebar
- Watch Notifications for hand-offs

Typical checkpoints

Tenant policies vary. These are the usual platform checkpoints before day-to-day operations.

STAGE	OWNER	ACTION IN UI
Sign-in	Every user	Sign in with Microsoft (Entra SSO)
Access	ERP admin	Organization - Users - assign modules
Foundation	ERP admin	Foundation setup wizard readiness checks
Structure	ERP admin	Organization - companies / branches / departments
Masters	ERP / data owners	Master Data - employees, customers, vendors, products
Daily work	All users	Home + My Jobs + assigned Operations modules
