ICONNECT PLUS / CACHE DIGITECH

Procurement Module User Manual

SCM Queue from CRM OVF through vendor PO, GRN, delivery challan, and insight panes

Admins | SCM members | Full module reference

Product	iConnect Plus ERP
Module	Procurement (SCM)
Document	User Manual v1.0
Audience	Module admins and assigned members
Demo OVF	DR-2026-8/OVF1
Date	17 October 2026

Part A follows one continuous demo OVF. Part B lists all primary sidebar panes.

Table of contents

1. Who this manual is for and access
2. End-to-end procurement overview
3. Part A - Process walkthrough (steps 01–14)
4. Part B - Sidebar reference (19 panes)
5. Roles and responsibilities
6. Stage checkpoints
7. Demo assets and rebuild

Who this manual is for and access

This manual is for **Procurement module admins** and **assigned SCM members** who work OVFs, vendor POs, GRNs, and delivery.

> Sign in with **Microsoft Entra SSO**. Passwords are not stored in iConnect Plus for Entra users. If Procurement is missing from your module hub, ask an admin to assign you on Procurement - Users.

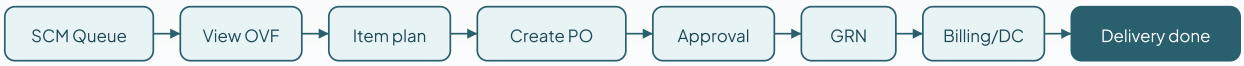

1. Open iConnect Plus and complete Entra sign-in.
2. Open the Procurement module from the ERP module hub.
3. Use the left sidebar (Workspace + Insight). Collapse the sidebar when you need more table space.
4. Start each day from **SCM Queue** and **Approval**.

> Business rule: customer OVFs enter Procurement from CRM. Vendor POs are raised from the OVF item plan (or inventory Create PO). GRN and Billing/DC close the physical delivery loop.

End-to-end procurement overview

Part A walks one CRM OVF from SCM Queue through PO, receipt, and delivery tracking. Later screens use an issued example PO when the Walkthrough OVF is still open.

Procurement path (demo walkthrough)

Story: Walkthrough Demo Systems Pvt Ltd - DR-2026-8/OVF1
CRM OVF shared to SCM - optional stock allocation - vendor PO - GRN - DC - delivery
Optional path: Fulfill from inventory before Create PO when units are on hand

Part A - Process walkthrough

Follow these steps in order. Use the demo names below so your captures match this manual.

- **Customer:** Walkthrough Demo Systems Pvt Ltd
- **Project:** Walkthrough Demo - Campus WiFi FY26
- **OVF:** `DR-2026-8/OVF1`
- **Customer PO:** `WDS-PO-FY26-001`
- **Vendor / OEM:** Redington / Cisco
- **Example issued PO (GRN path):** `PO/CDT/068`

Upstream: complete the CRM walkthrough so the OVF is approved and shared to SCM before you open Procurement.

Step 01 – SCM Queue

Open **SCM Queue**. Find the OVF shared from CRM: `DR-2026-8/OVF1` for **Walkthrough Demo Systems Pvt Ltd** (vendor **Redington**). Filter Open when the list is long.

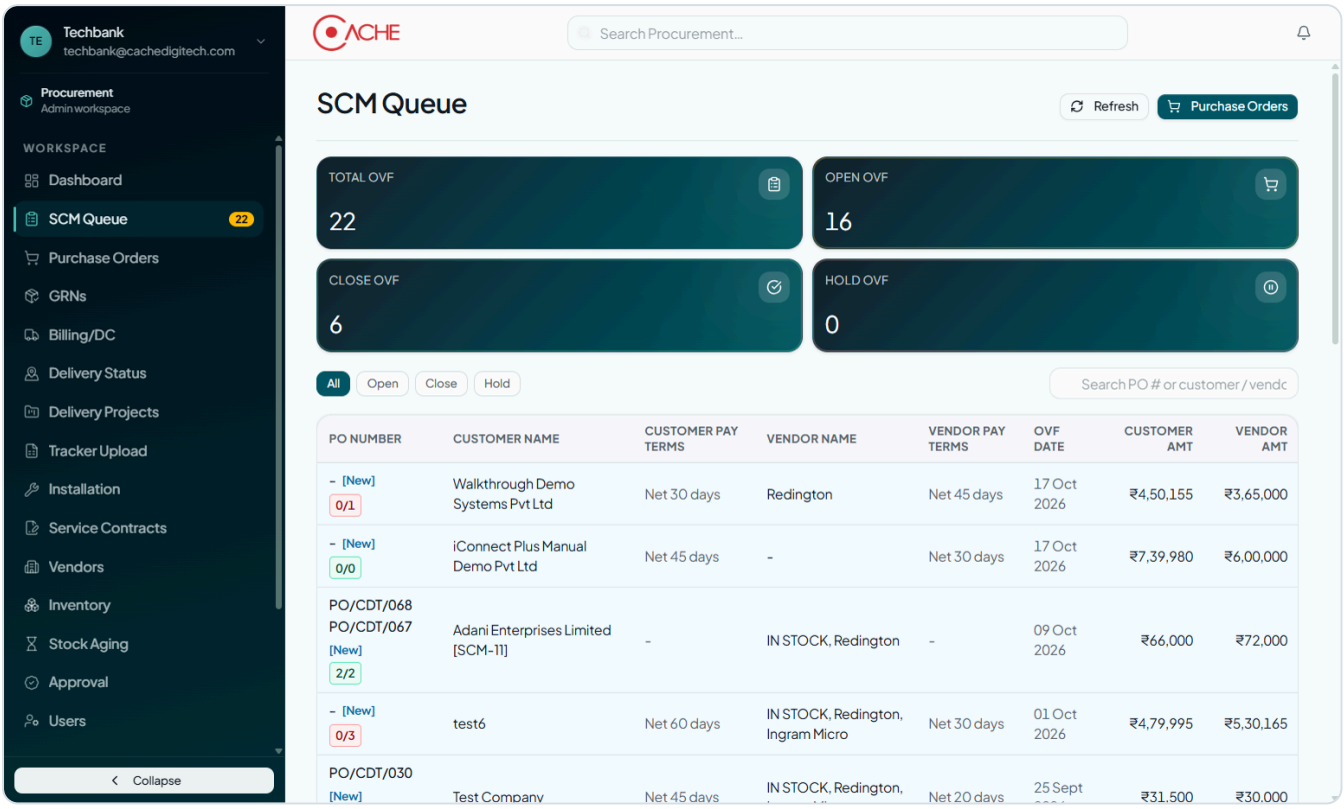

Figure A-01 - SCM Queue with Walkthrough Demo OVF awaiting PO.

Step 02 – View OVF

Open **View OVF**. Confirm customer PO `WDS-PO-FY26-001`, project **Walkthrough Demo – Campus WiFi FY26**, OEM **Cisco**, margin, and attached sales documents. Use Hold only when procurement must pause.

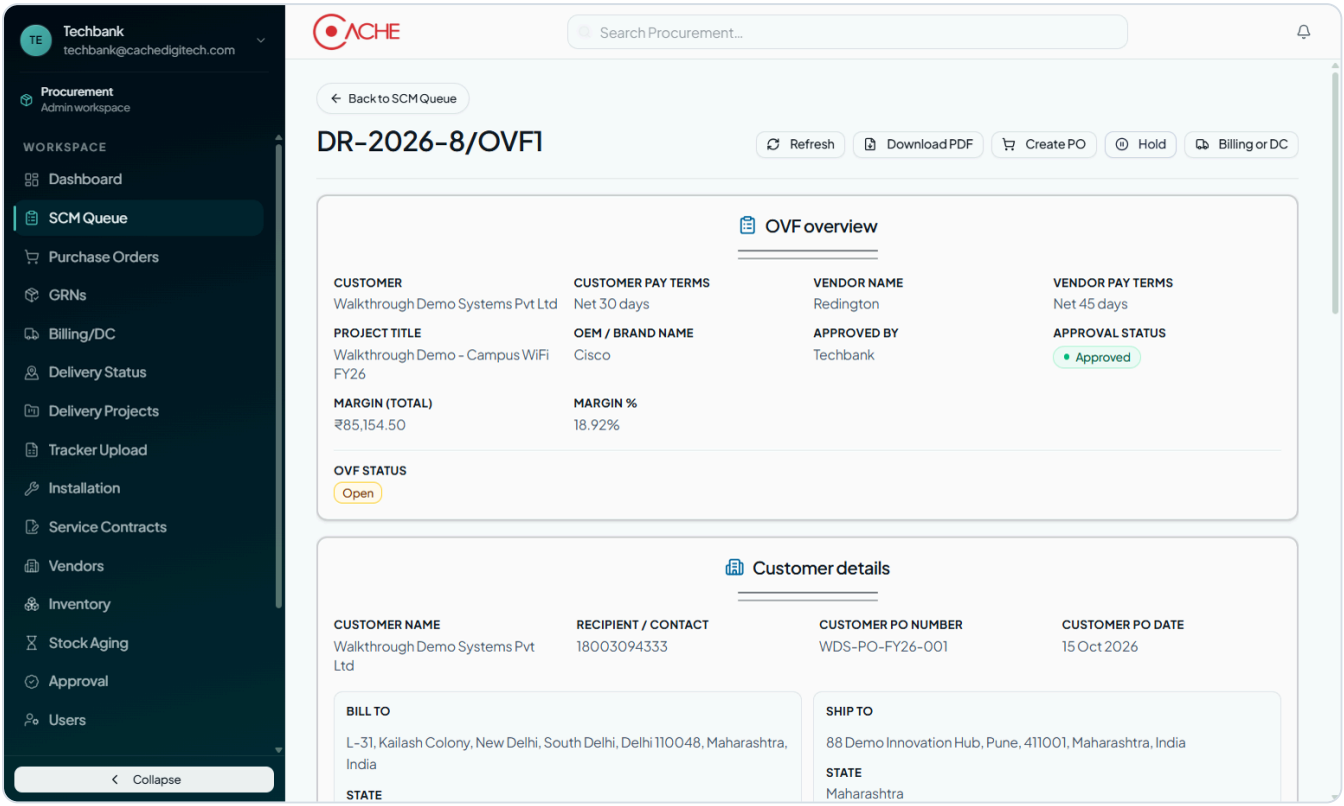

Figure A-02 - OVF detail for DR-2026-8/OVF1 after CRM handoff.

Step 03 – Item plan

Choose **Create PO** to open the item plan. Select distributor per line (demo: **Redington**) and review quantities before raising the vendor PO.

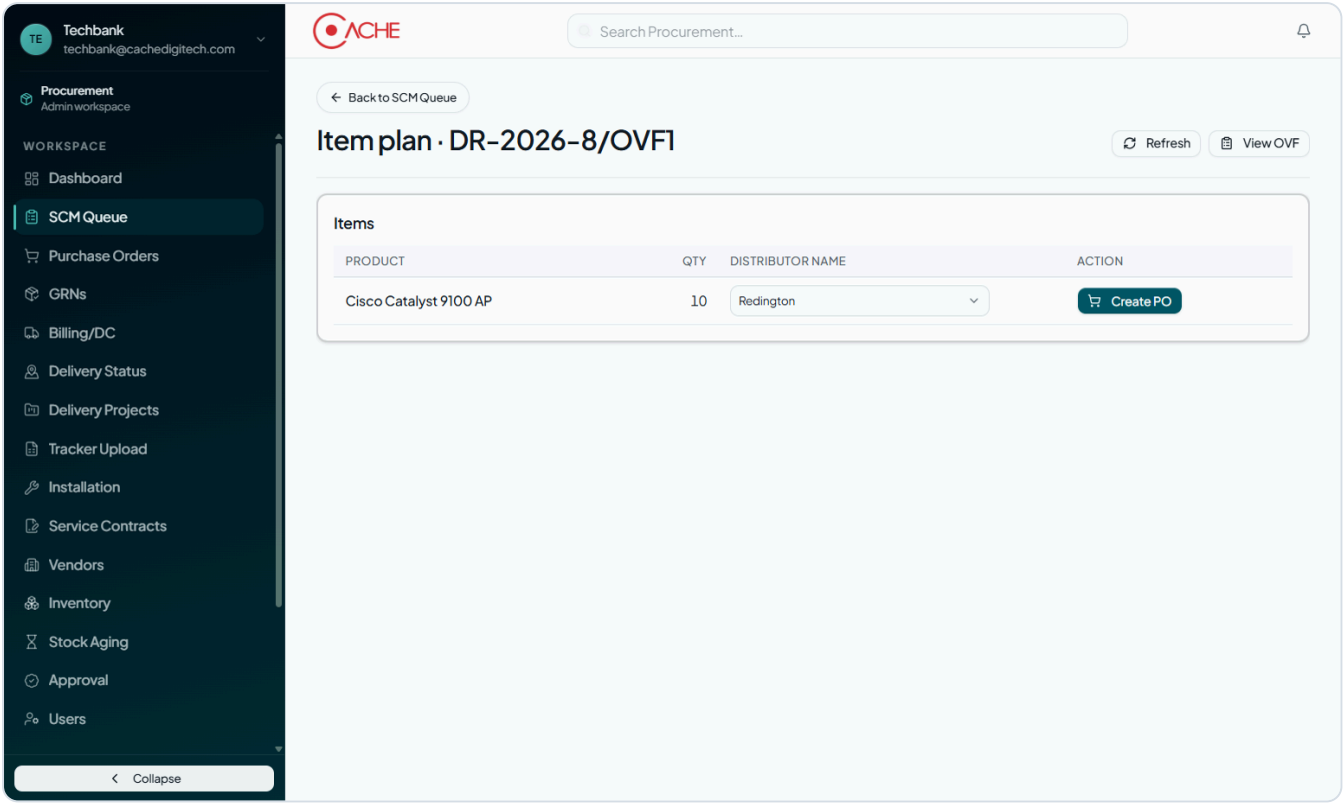

Figure A-03 - Item plan lines with distributor and Create PO action.

Step 04 – Fulfill from stock (optional)

When stock covers demand, open **Fulfill from inventory**. Reserve units against the OVF first - this does not create a delivery challan by itself.

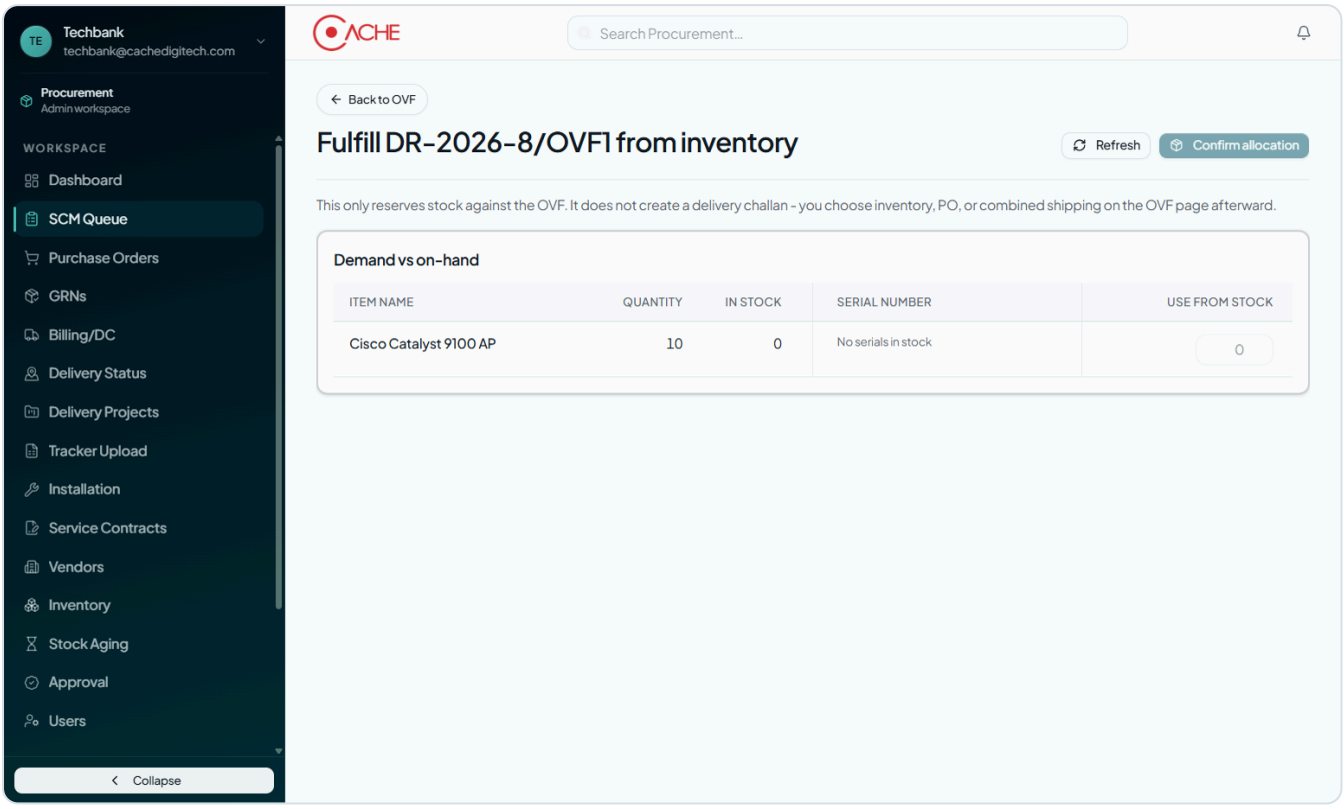

Figure A-04 - Demand vs on-hand allocation for the Walkthrough OVF.

Step 05 – Create purchase order

Complete the Create PO form: vendor, entity, billing and shipping addresses, company PO number, and purchase date. Save to open the draft or pending-approval PO.

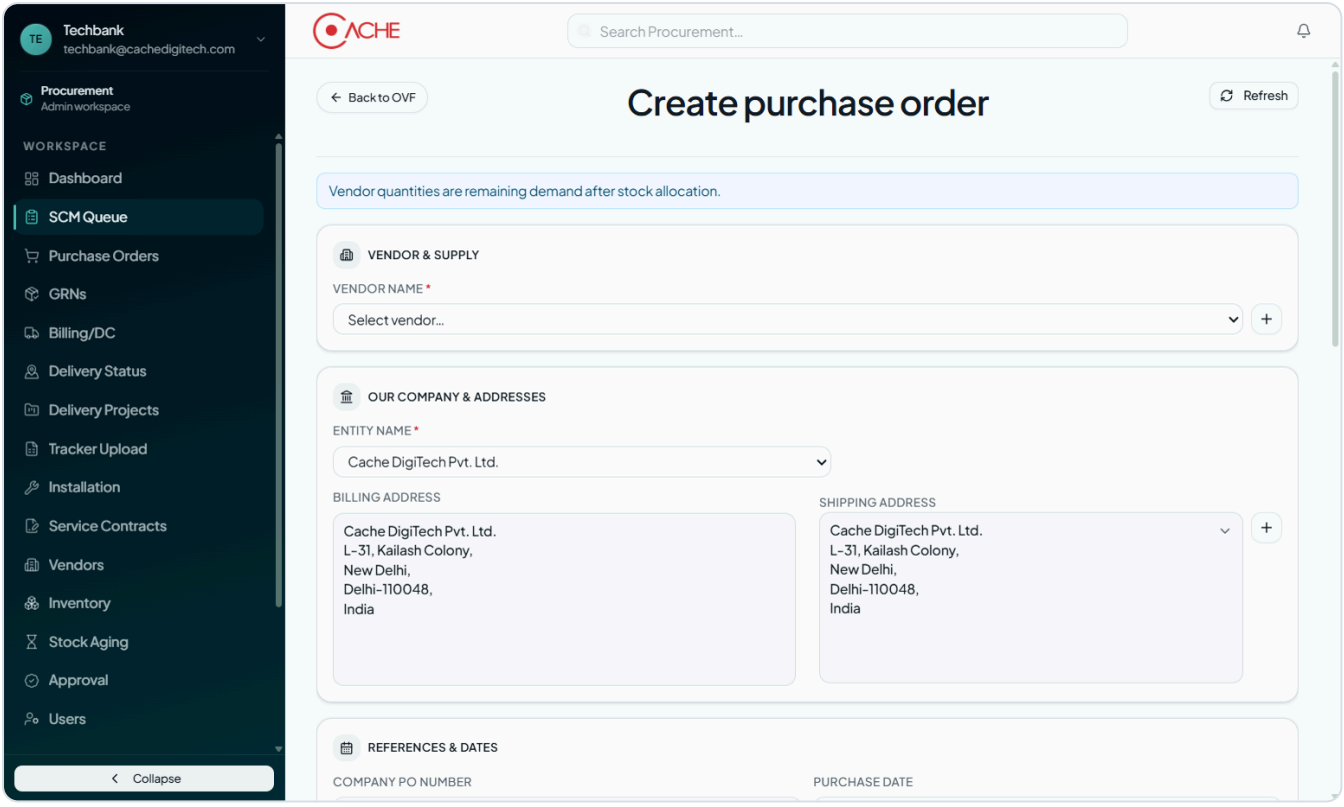

Figure A-05 - Create purchase order form after item plan.

Step 06 – Purchase Orders register

Open **Purchase Orders** to track draft, open, partial, and closed vendor POs. Later steps in this manual use an issued example PO (`PO/CDT/068`) for GRN and delivery screens.

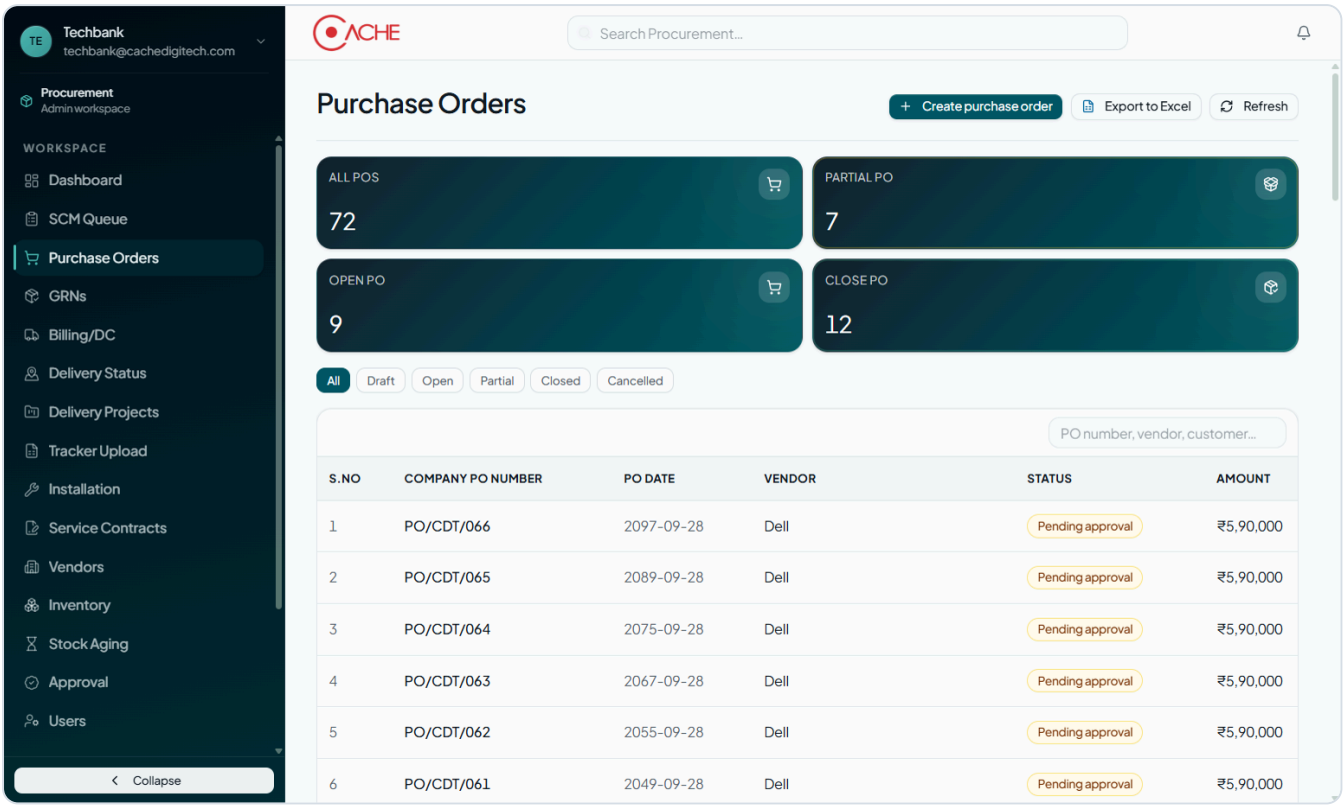

Figure A-06 - Purchase Orders list with status filters and KPI cards.

Step 07 – PO detail and delivery tracking

Open a PO row (demo example `PO/CDT/068`). Capture expected delivery date, run correspondence, download the PO PDF, and use **Record GRN** when goods arrive.

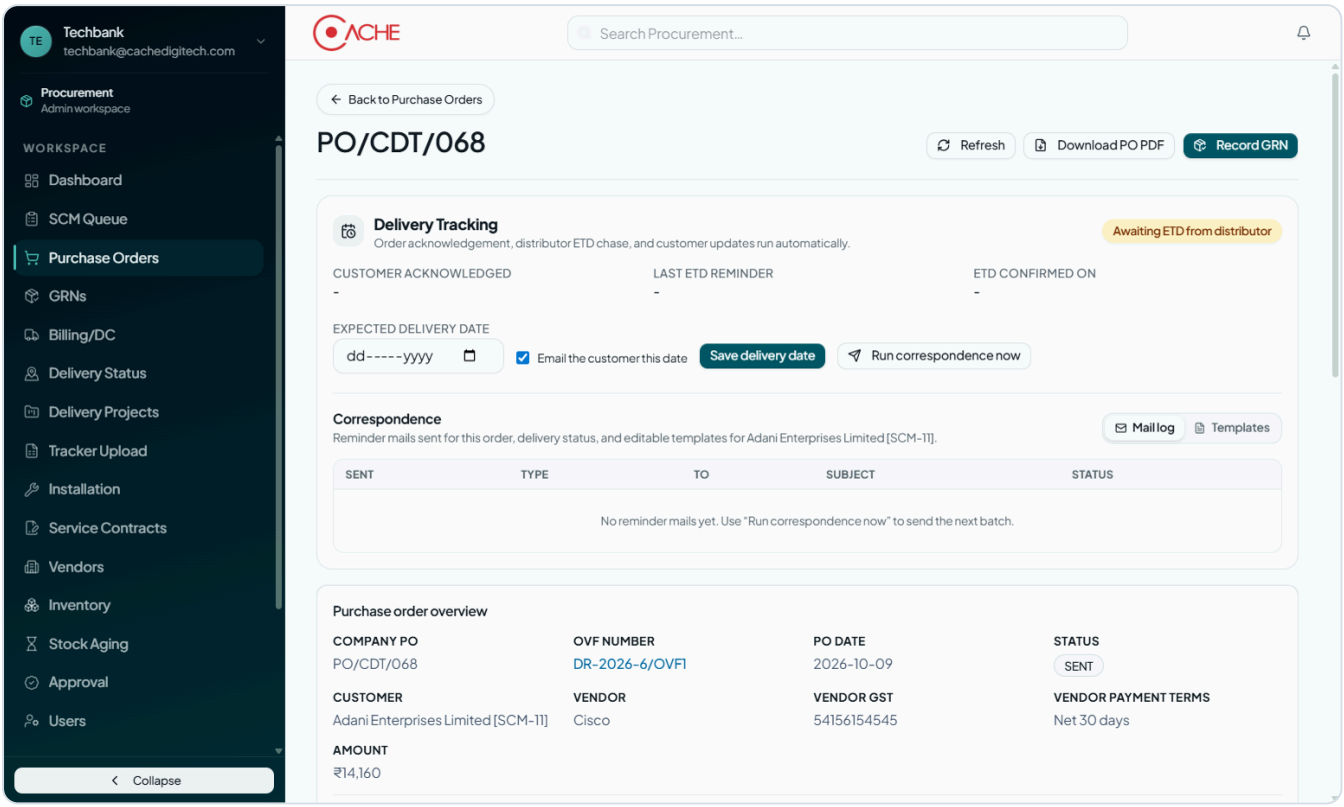

Figure A-07 - PO detail with delivery tracking and correspondence.

Step 08 – Approval

Admins use **Approval** for Create PO (IN STOCK) and finalize-PO requests. Accepting a request issues the draft PO - sharing to Projects happens later from Installation.

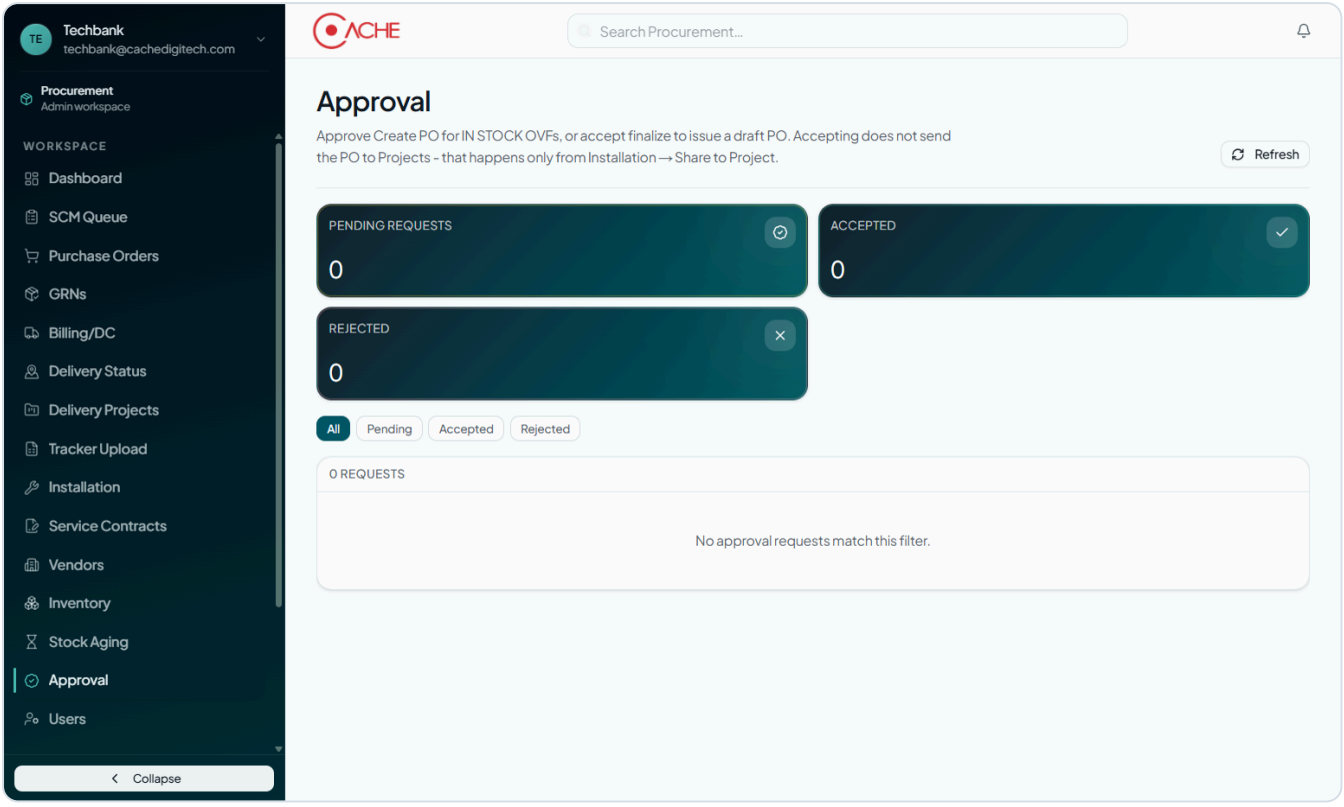

Figure A-08 - Procurement approval queue for stock and finalize requests.

Step 09 – GRNs

Record receipts on **GRNs**. Partial vs delivered status drives Delivery Status and Installation handoff. Export Excel when auditors need a snapshot.

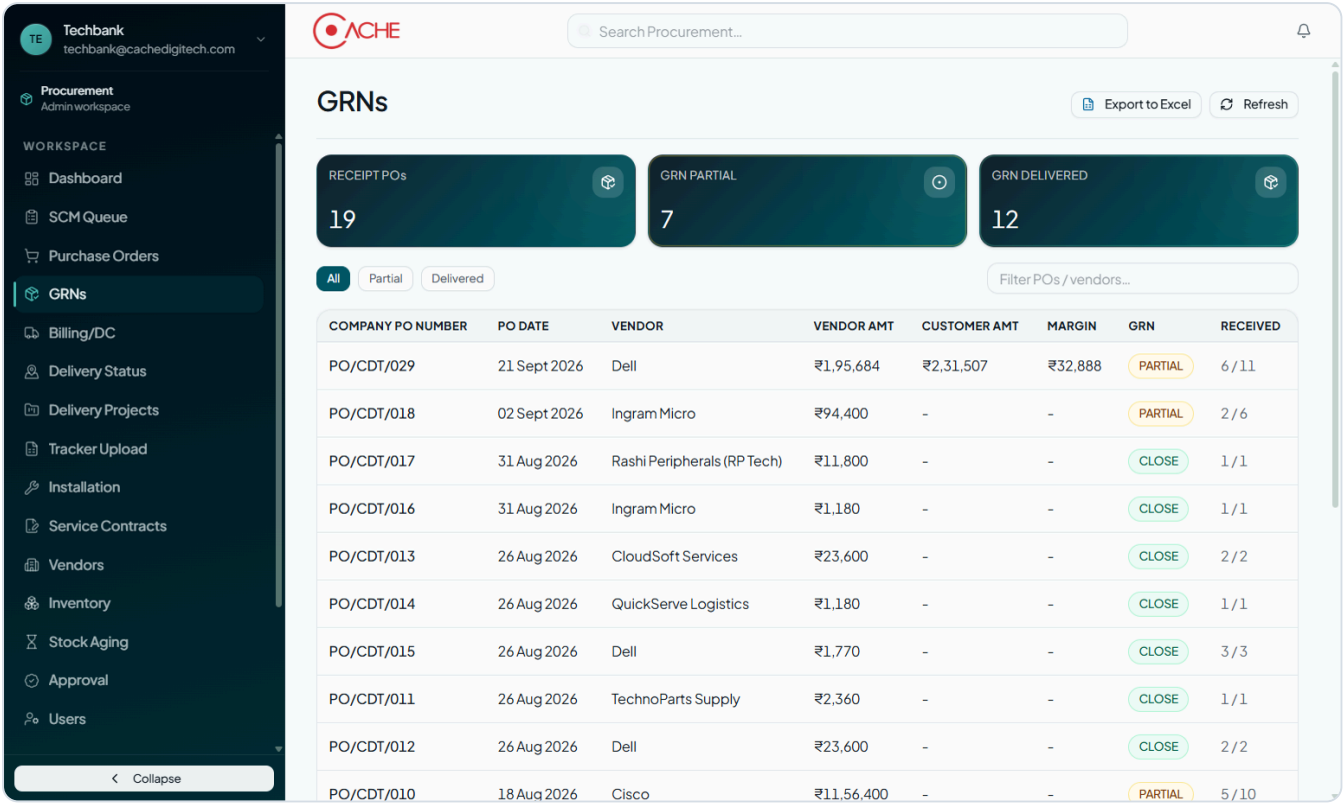

Figure A-09 - GRN register with partial and closed receipt rows.

Step 10 – Billing / delivery challan

Use **Billing/DC** to create delivery challans (deliver without a bill) or billing rows. Update bill taken on saved DCs at any time.

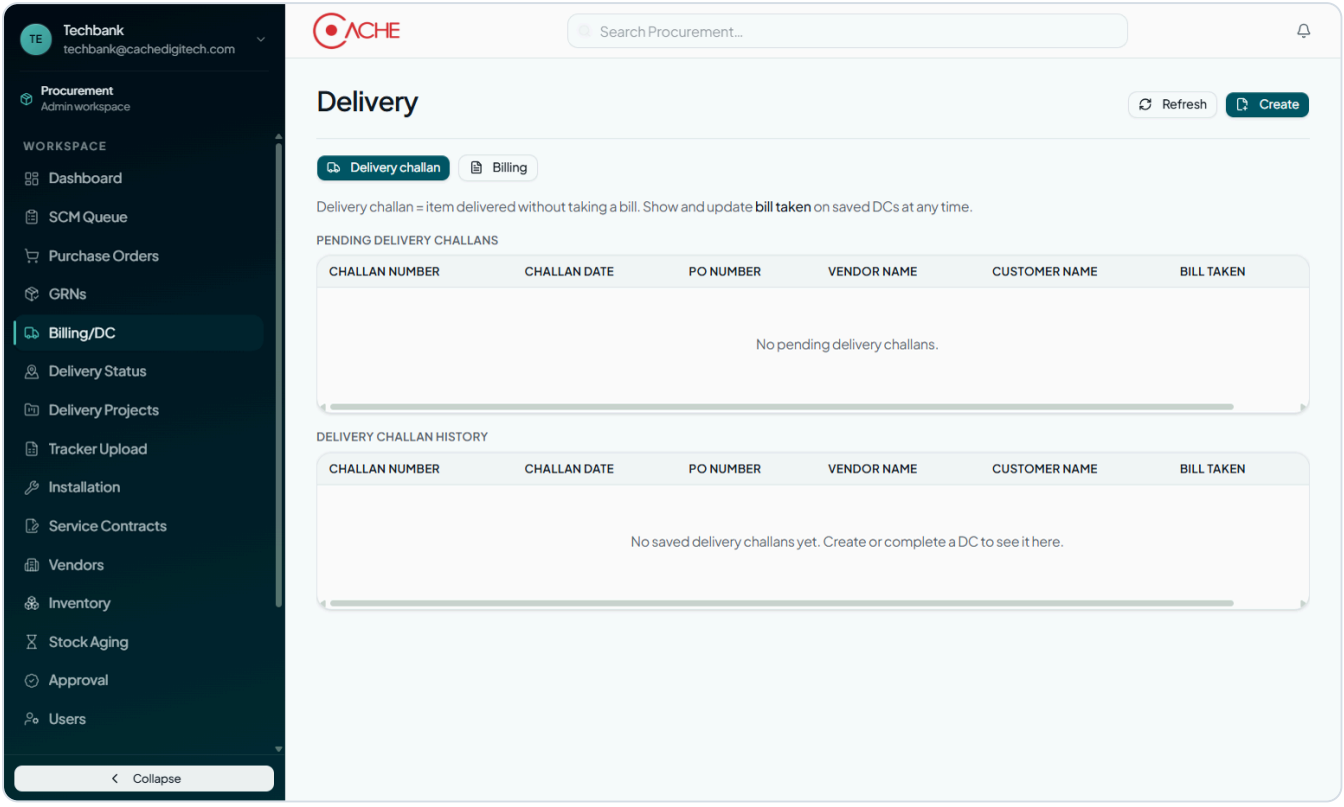

Figure A-10 - Delivery challan pending and history panes.

Step 11 – Delivery status

After dispatch is saved, open **Delivery Status** and use Update status to mark Delivered or Failed. Bill update is available only for fully billed DCs.

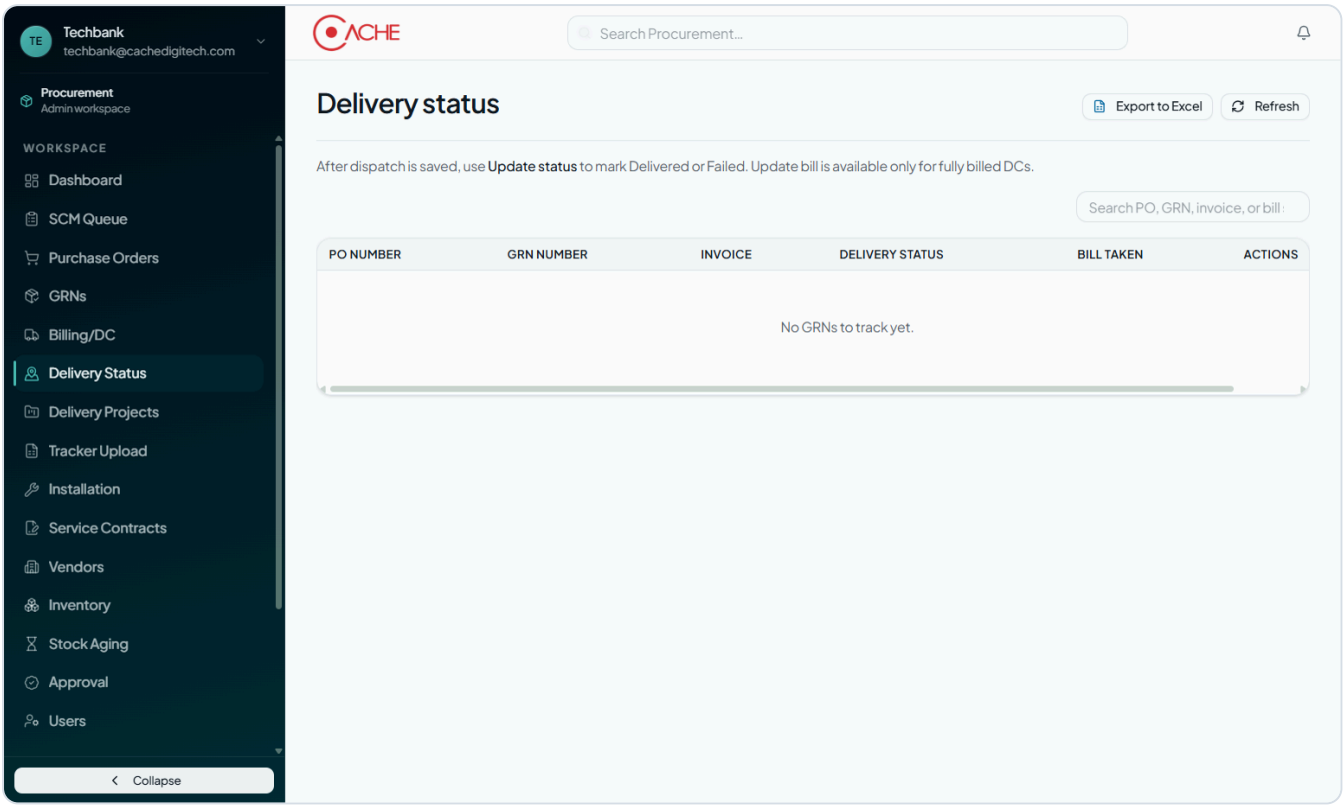

Figure A-11 - Delivery status tracker linked to GRNs.

Step 12 – Inventory

Check **Inventory** for units, OEM coverage, and stock value before allocating from stock on an OVF. Add stock or import Excel when warehouse balances change.

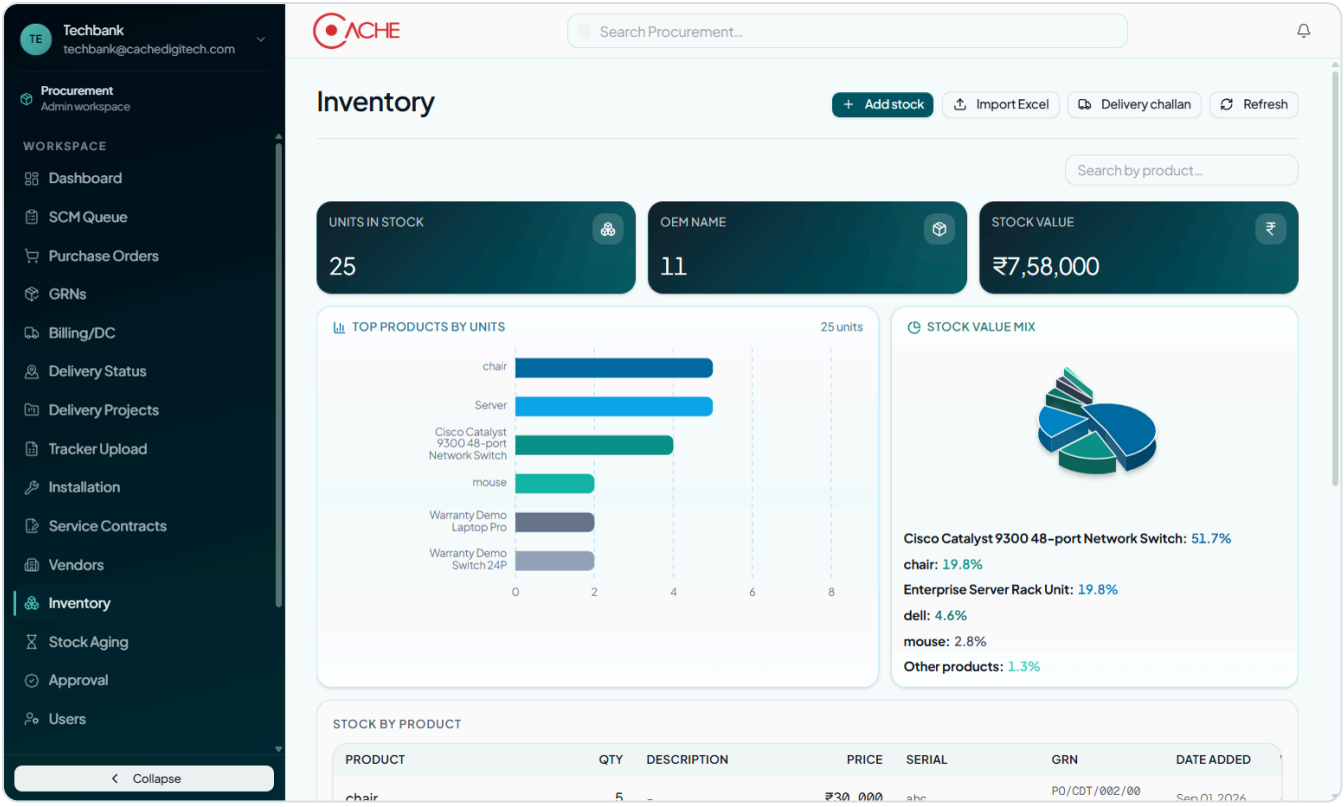

Figure A-12 - Inventory dashboard with stock value and product mix.

Step 13 – Timeline list

Open Insight - **Timeline** for every OVF from SCM handoff through GRN, challan, dispatch, and delivery completion.

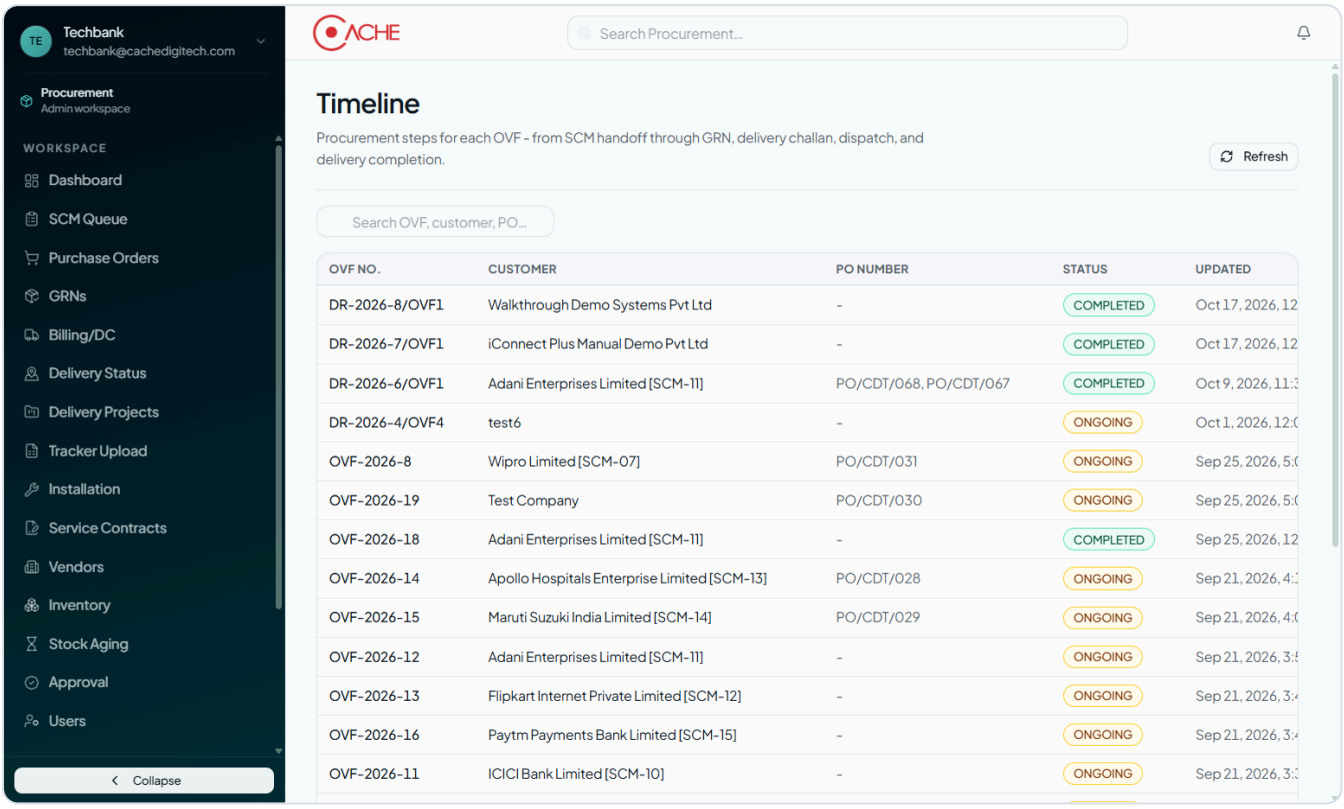

Figure A-13 - Timeline register showing ongoing and completed OVFs.

Step 14 – OVF timeline detail

Open the timeline for `DR-2026-8/OVF1` to audit actors and timestamps (shared to SCM, vendor PO, GRN, challan, dispatch, billing).

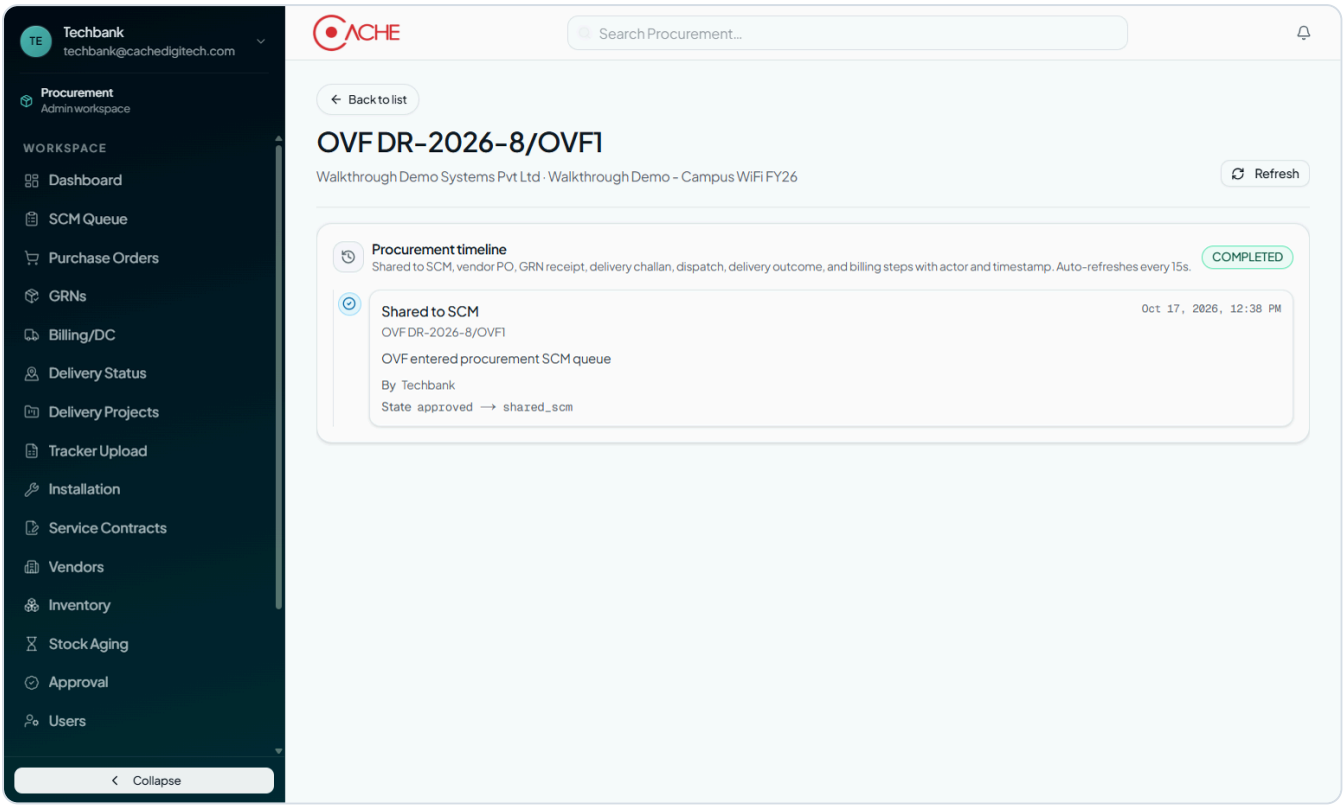

Figure A-14 - Procurement timeline detail for the Walkthrough OVF.

Part B – Sidebar reference

Use this section as a pane-by-pane glossary. Screenshots use the Procurement left navigation labels (Workspace then Insight).

B.01 Dashboard

Open / partial / closed PO KPIs, inventory value, and product mix charts.

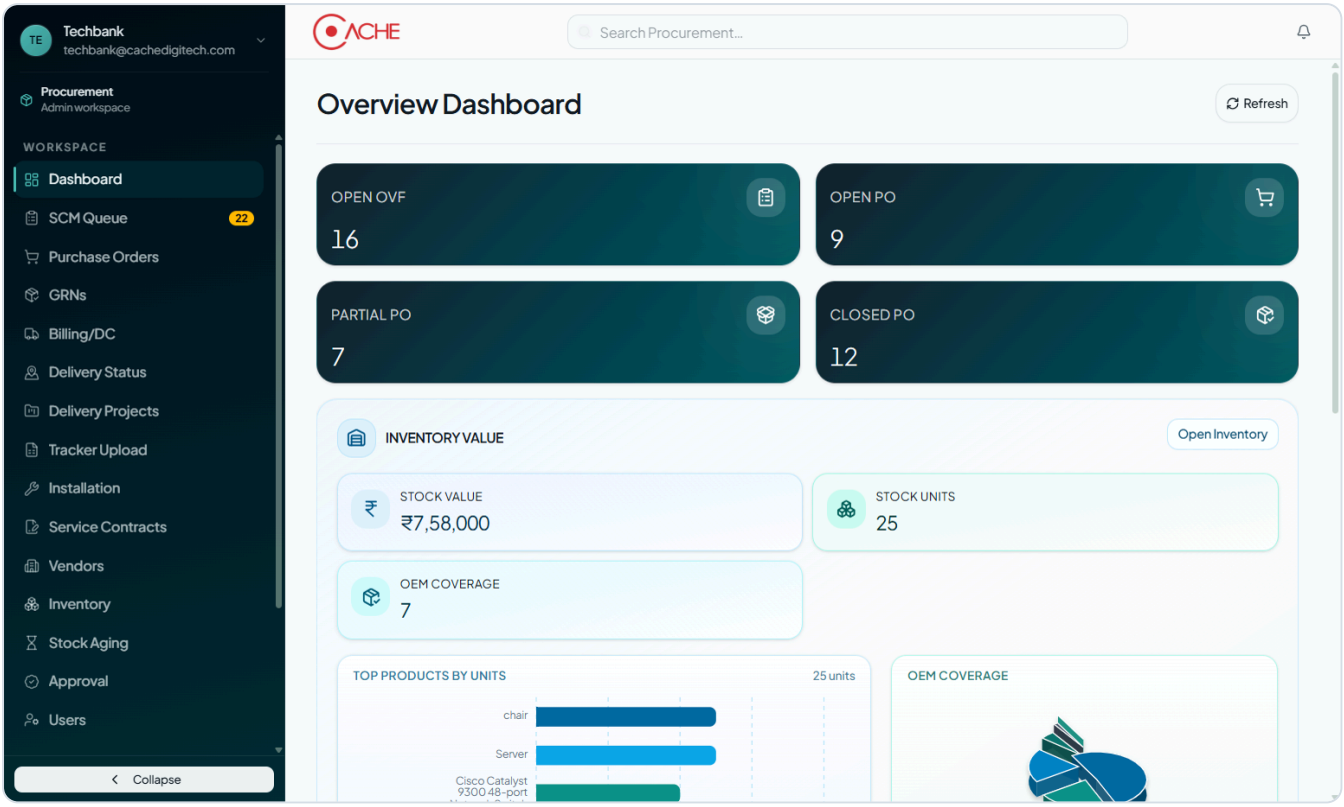

Figure B-01 - Dashboard pane.

B.02 SCM Queue

OVFs handed from CRM - open, close, or hold and start Create PO.

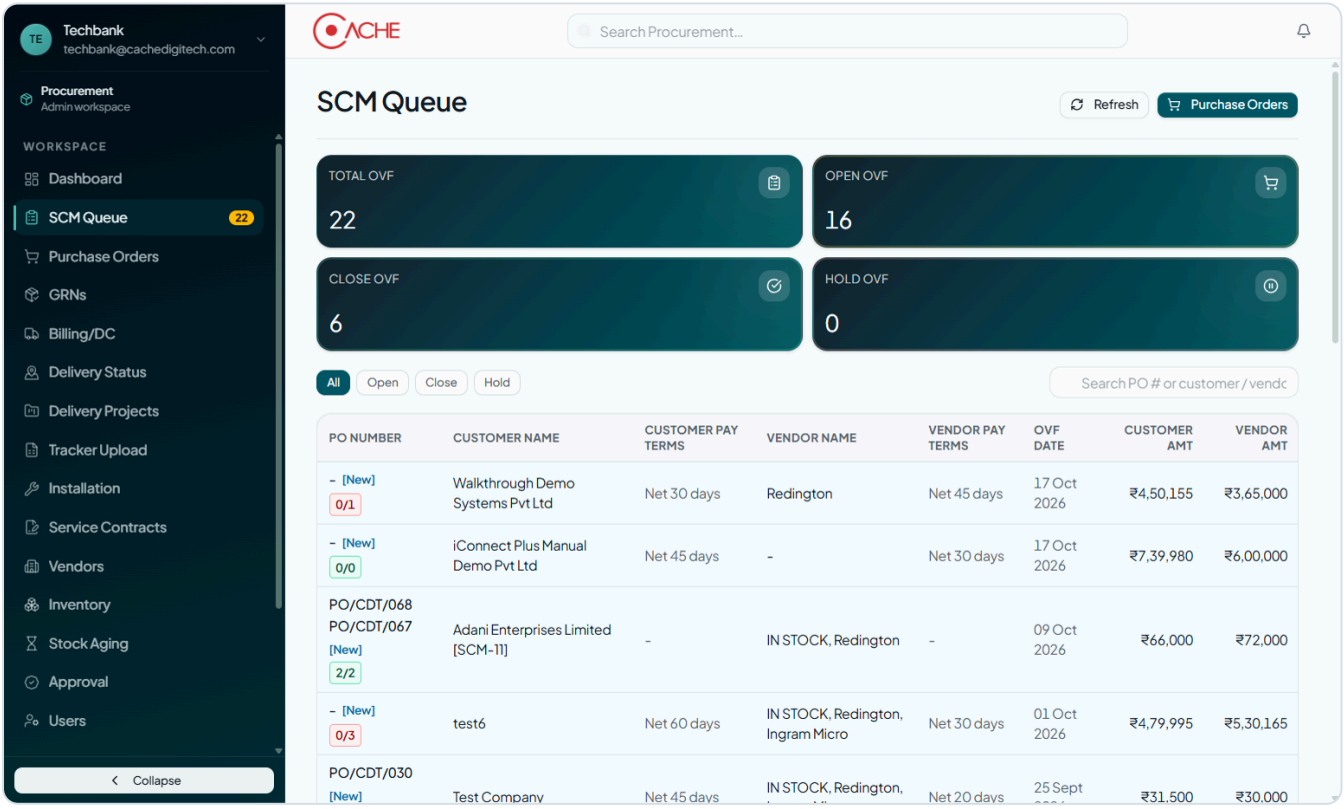

Figure B-02 - SCM Queue pane.

B.03 Purchase Orders

Vendor PO register with status filters and export.

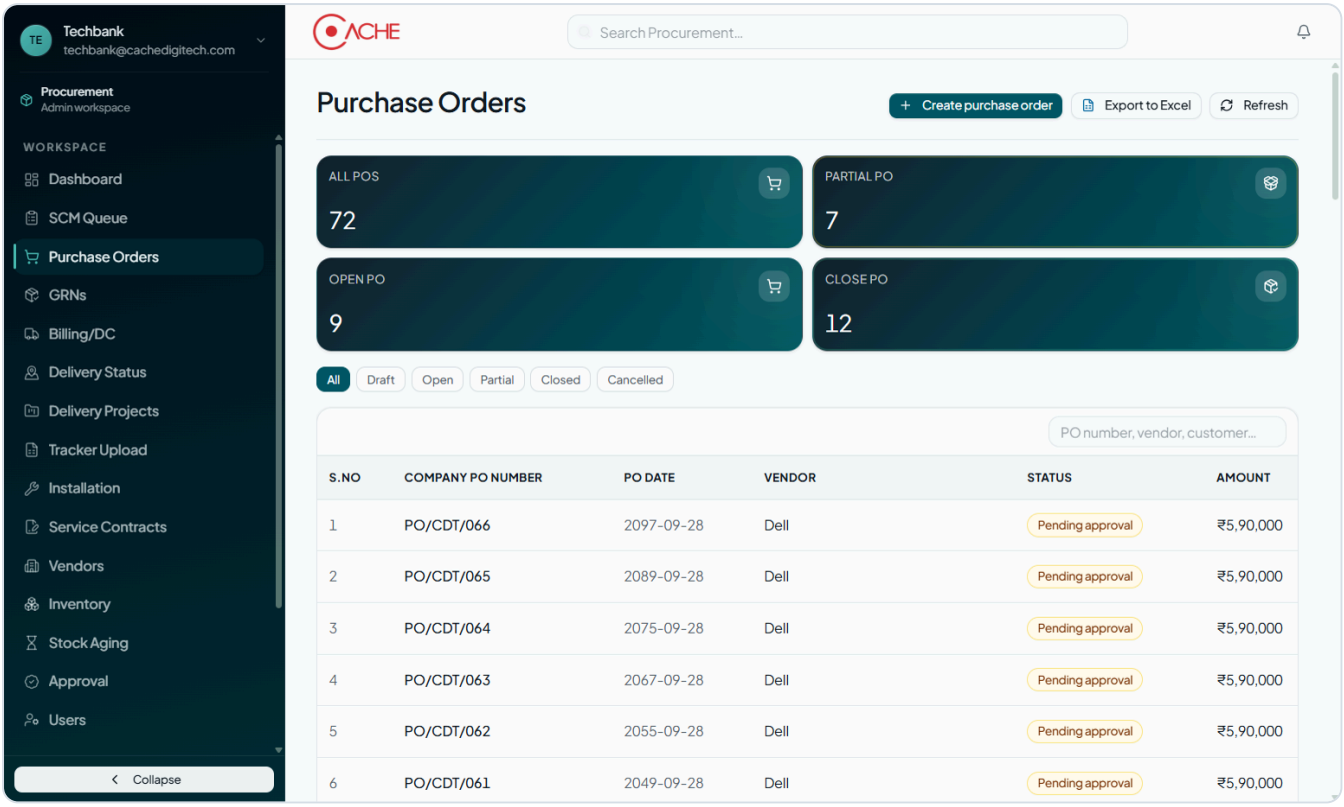

Figure B-03 - Purchase Orders pane.

B.04 GRNs

Goods receipt against company POs - partial vs delivered.

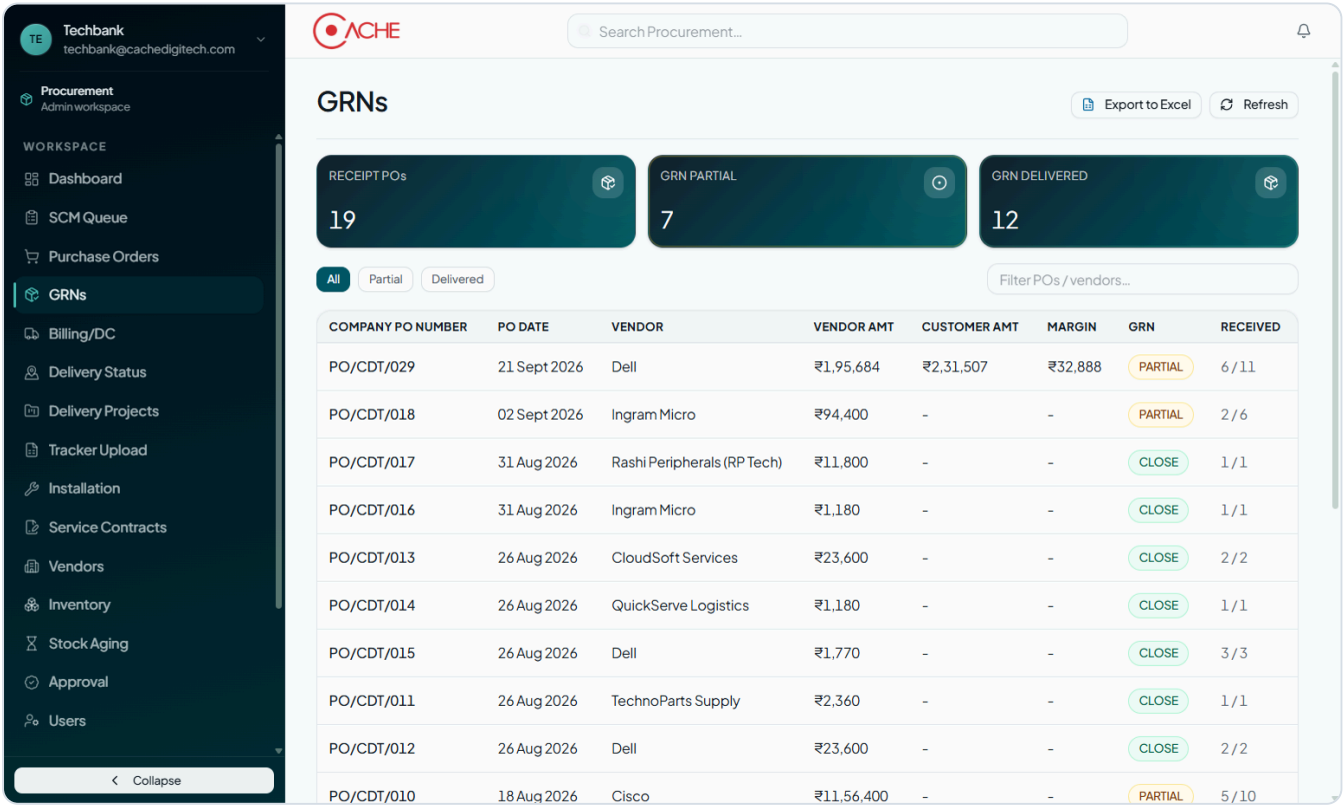

Figure B-04 - GRNs pane.

B.05 Billing/DC

Delivery challans and billing tabs after receipt.

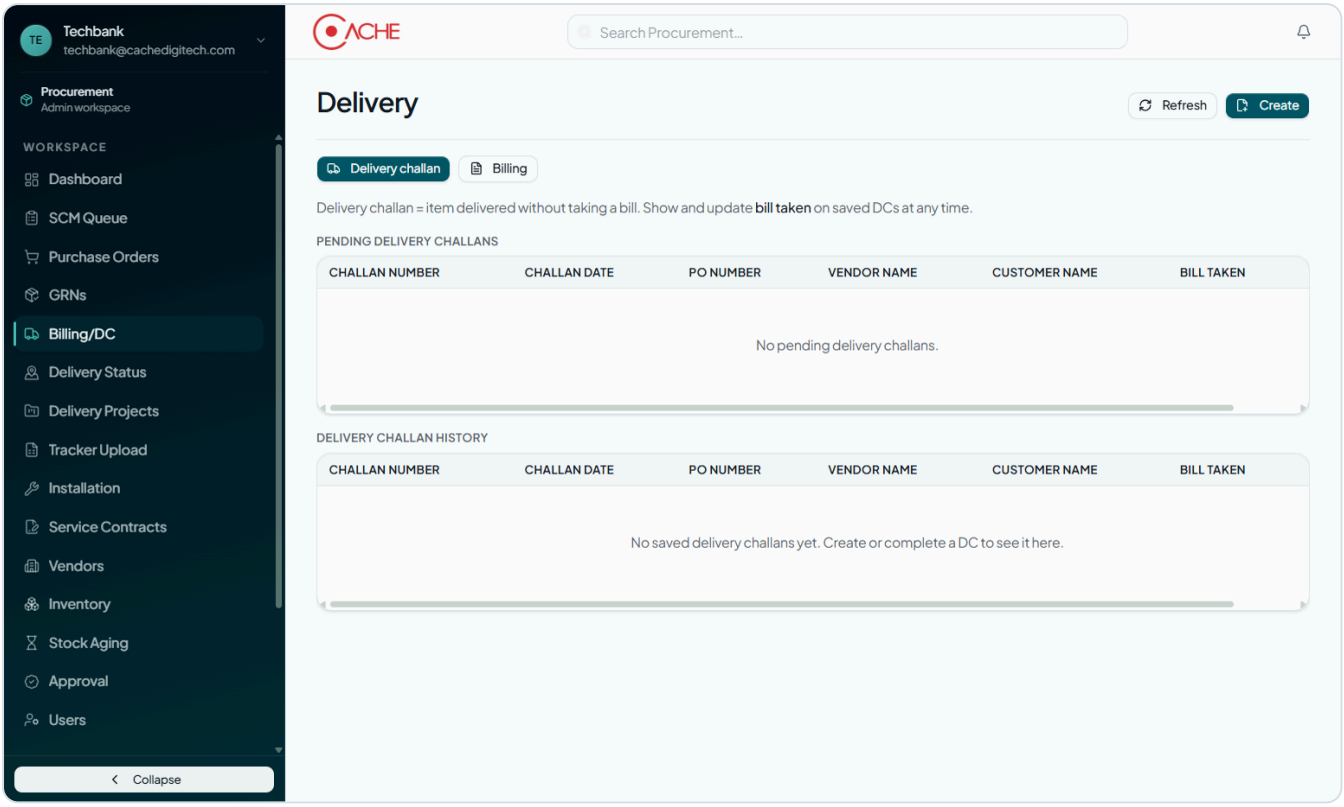

Figure B-05 - Billing/DC pane.

B.06 Delivery Status

Post-dispatch Delivered / Failed updates.

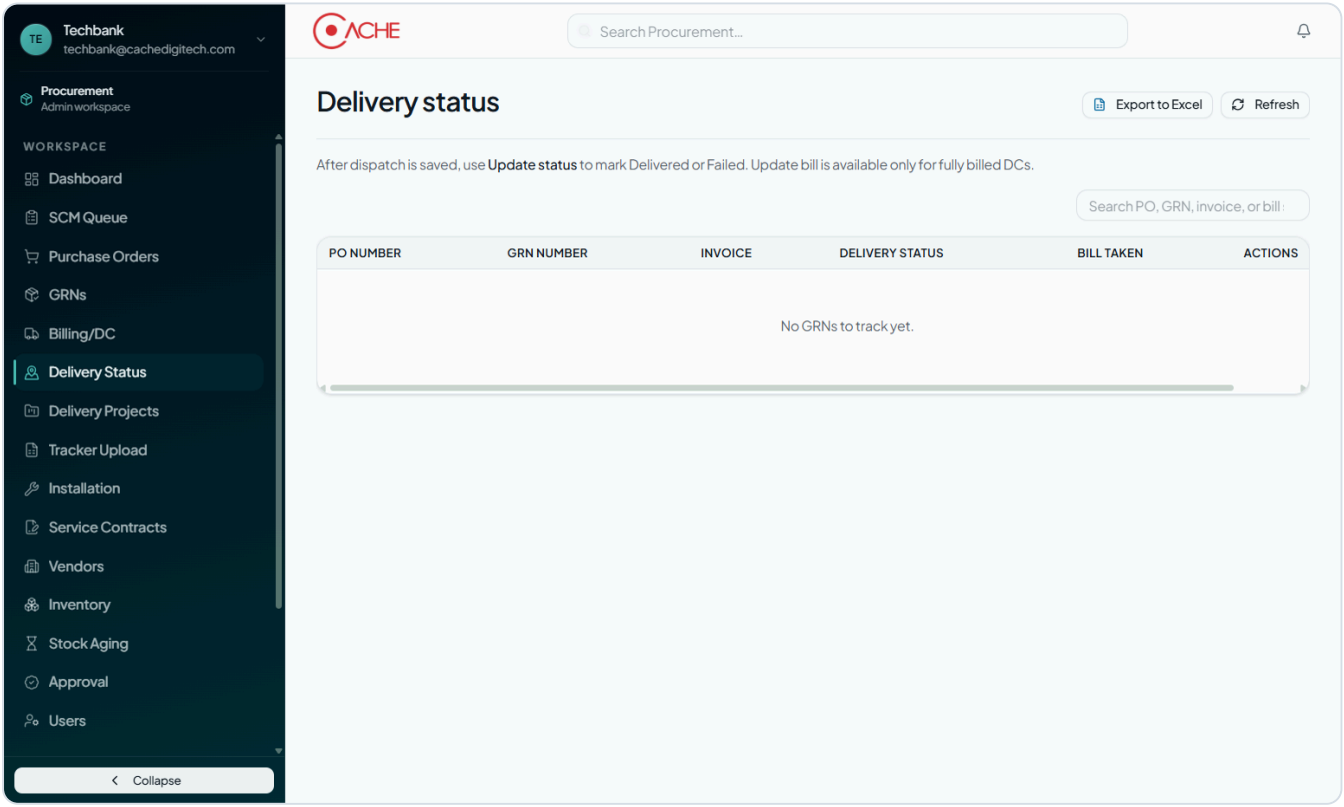

Figure B-06 - Delivery Status pane.

B.07 Delivery Projects

Multi-site rollout trackers with customer links.

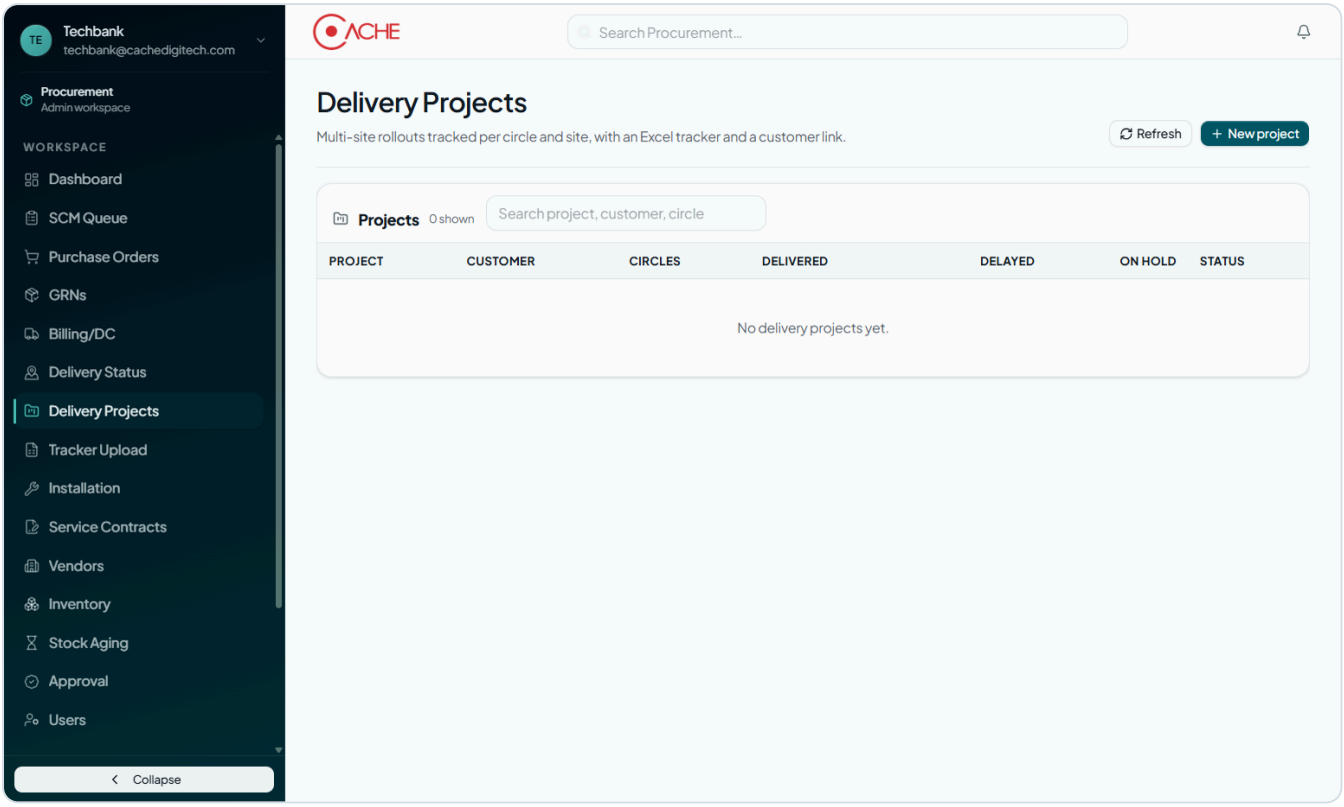

Figure B-07 - Delivery Projects pane.

B.08 Tracker Upload

Upload Excel sheets into versioned tracker tables.

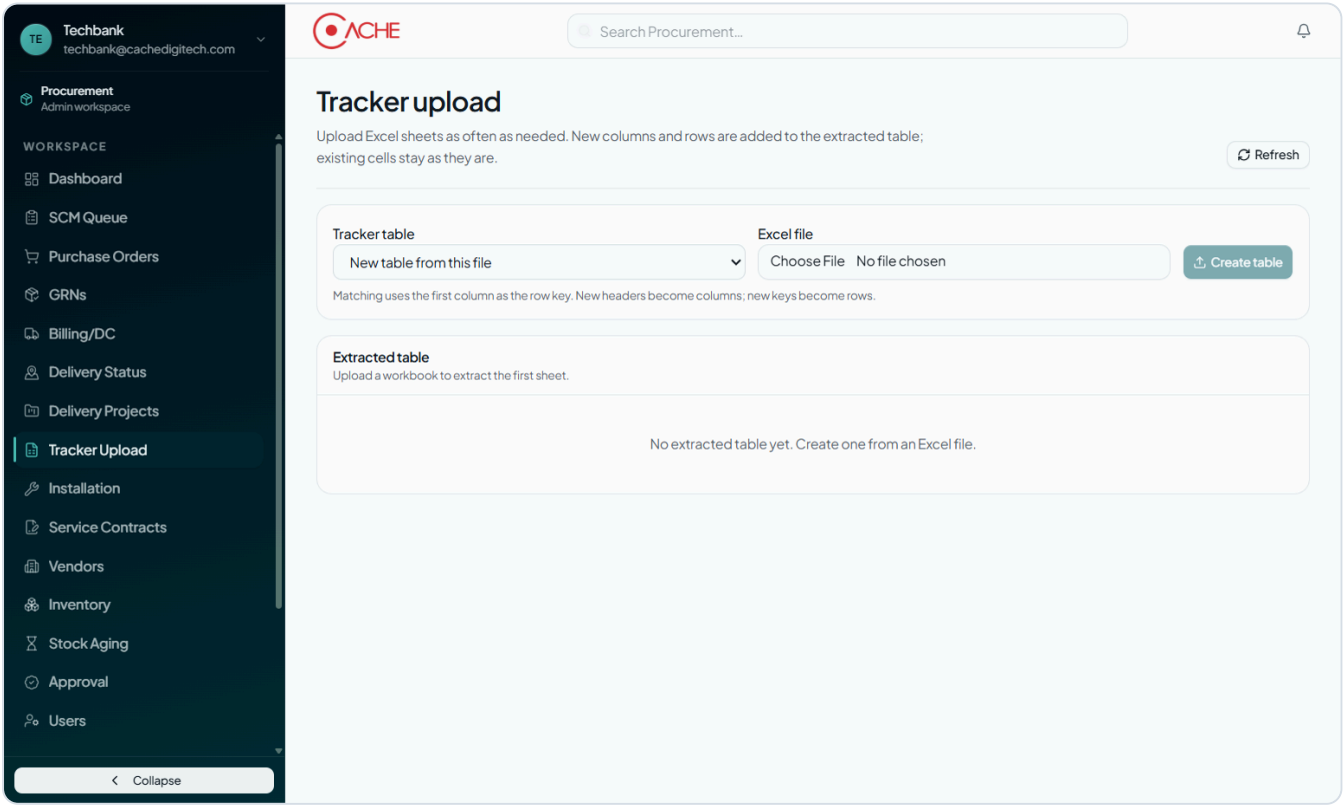

Figure B-08 - Tracker Upload pane.

B.09 Installation

Site installation rows - share to Projects from detail, not the list.

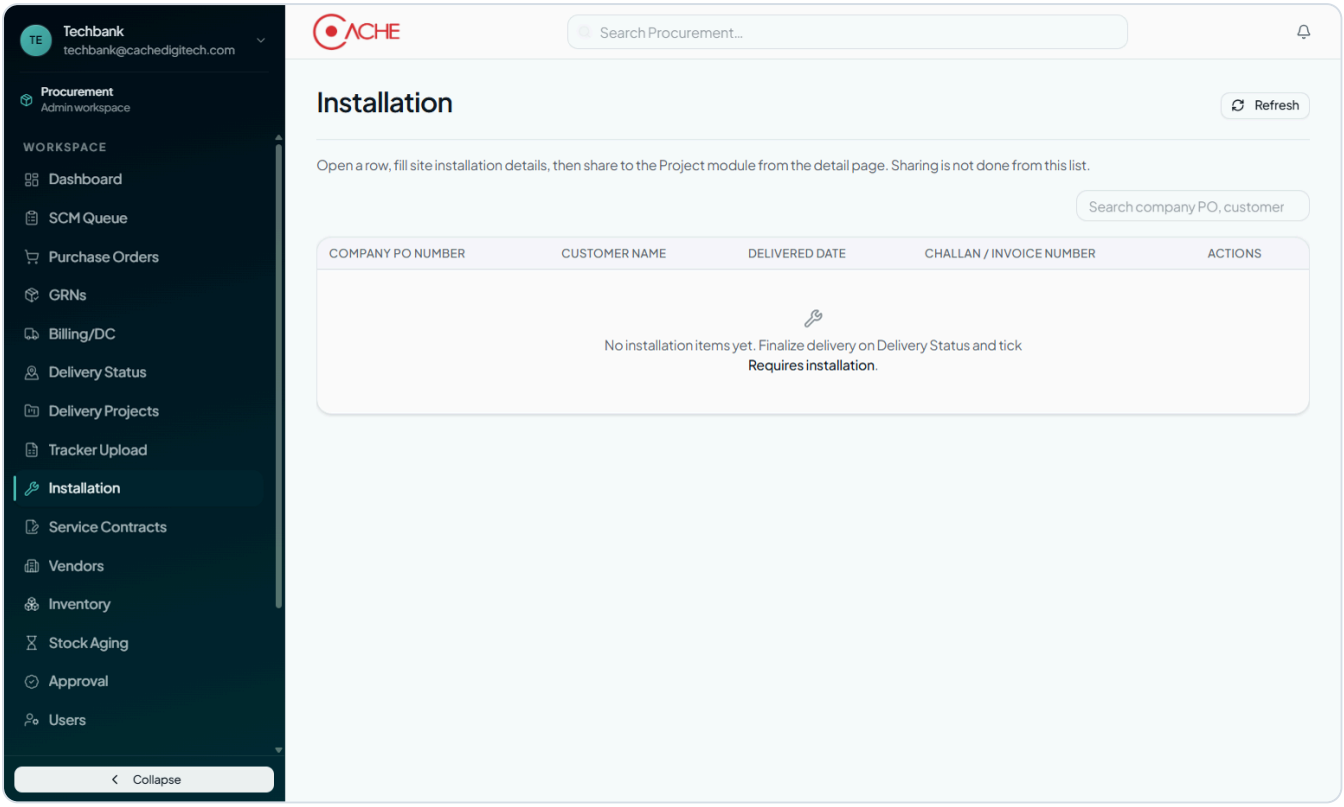

Figure B-09 - Installation pane.

B.10 Service Contracts

Field partner rate contracts used to price OVF service plans.

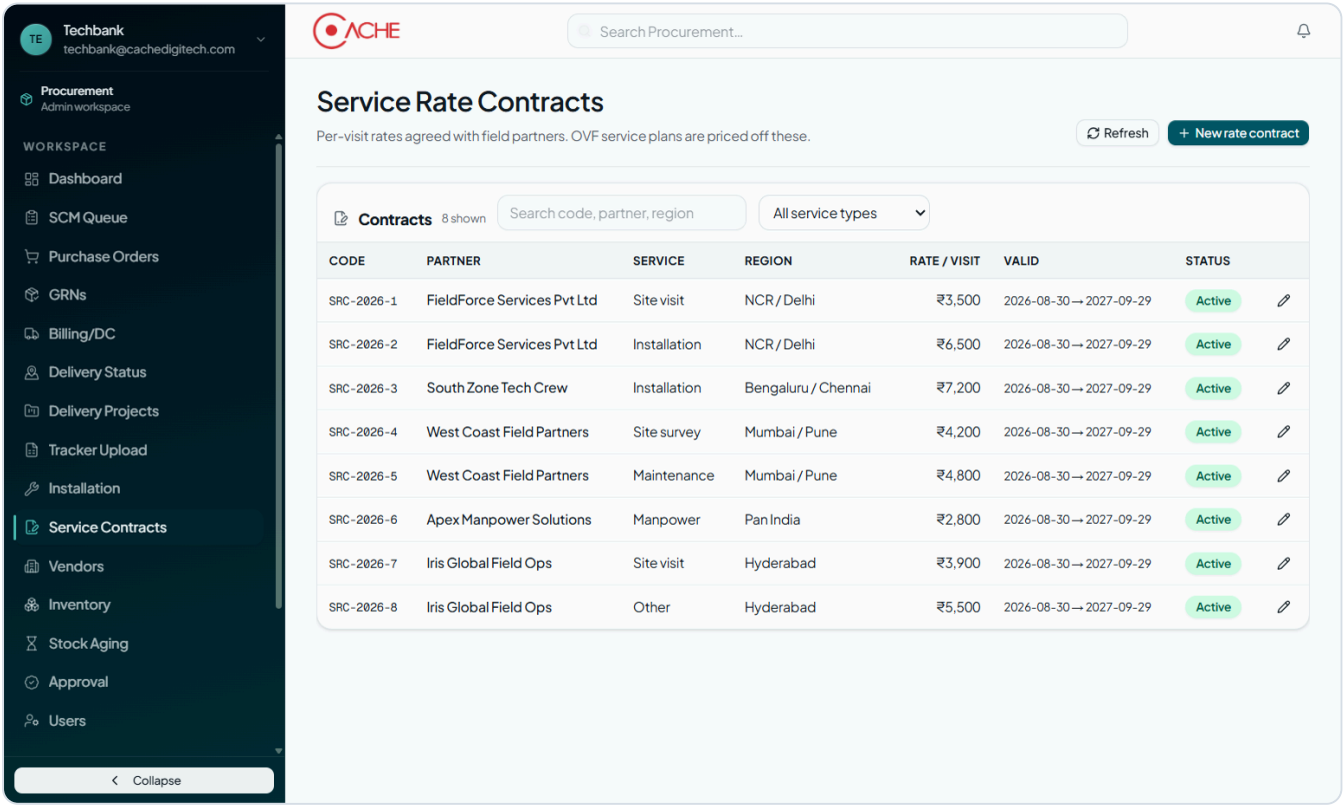

Figure B-10 - Service Contracts pane.

B.11 Vendors

Vendor master and linked PO counts.

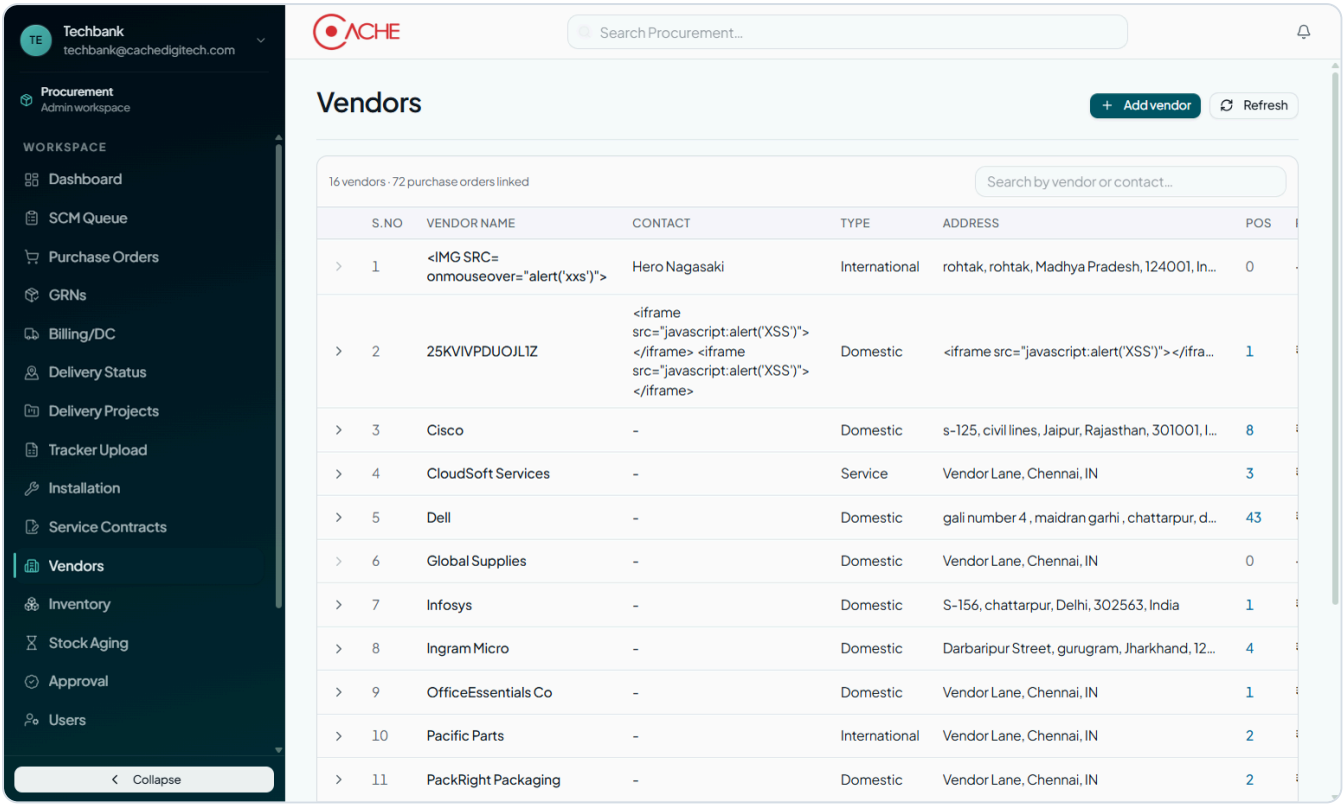

Figure B-11 - Vendors pane.

B.12 Inventory

On-hand stock, value, and product breakdown.

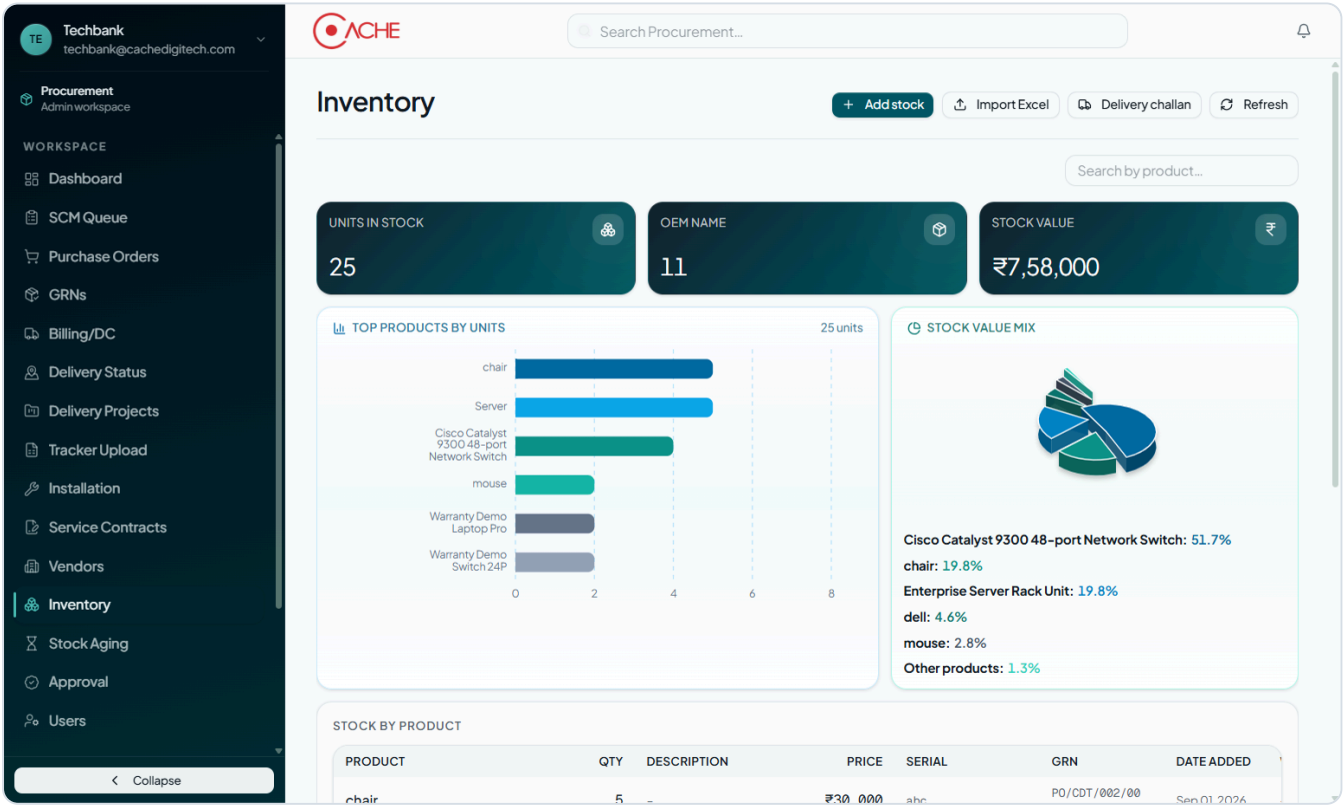

Figure B-12 - Inventory pane.

B.13 Stock Aging

Aging buckets, carrying cost, warranty expiry, ownership.

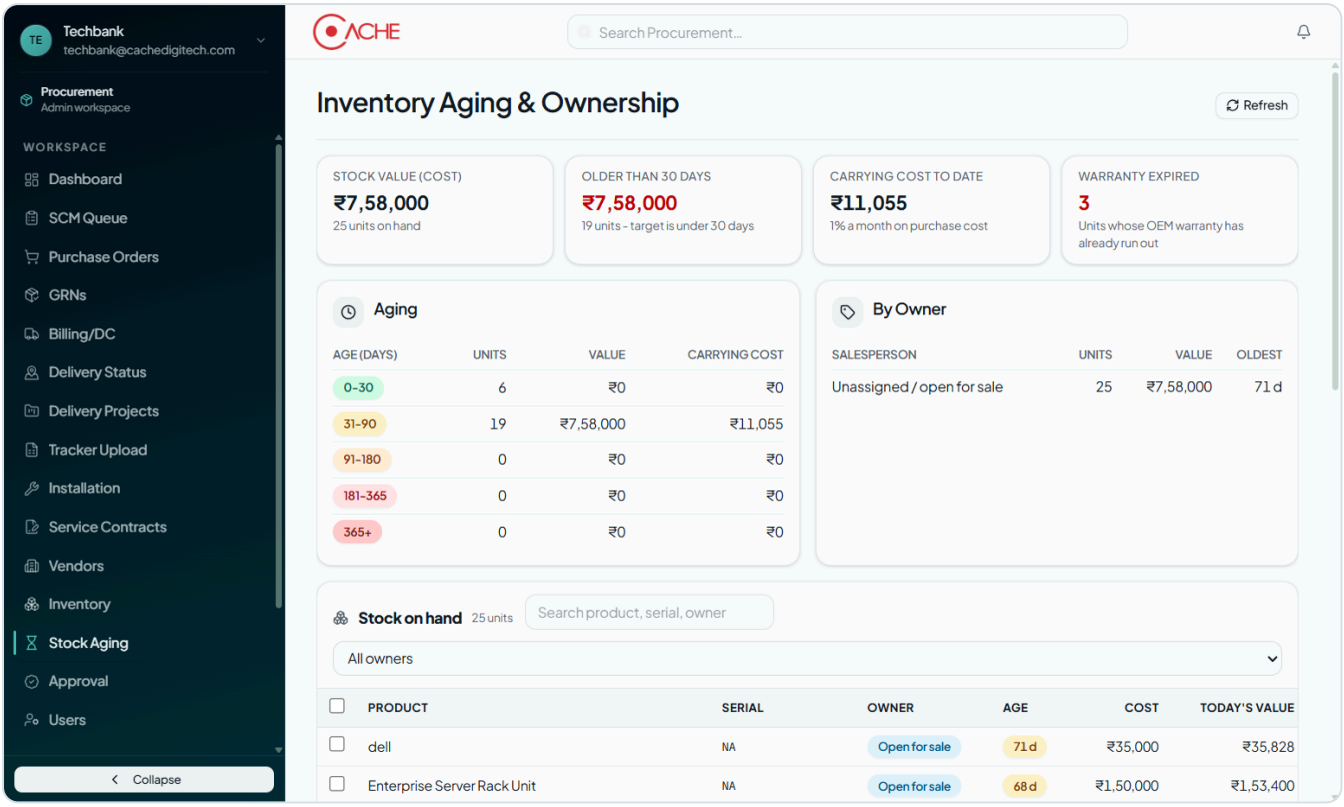

Figure B-13 - Stock Aging pane.

B.14 Approval

IN STOCK Create PO and finalize-PO approval requests.

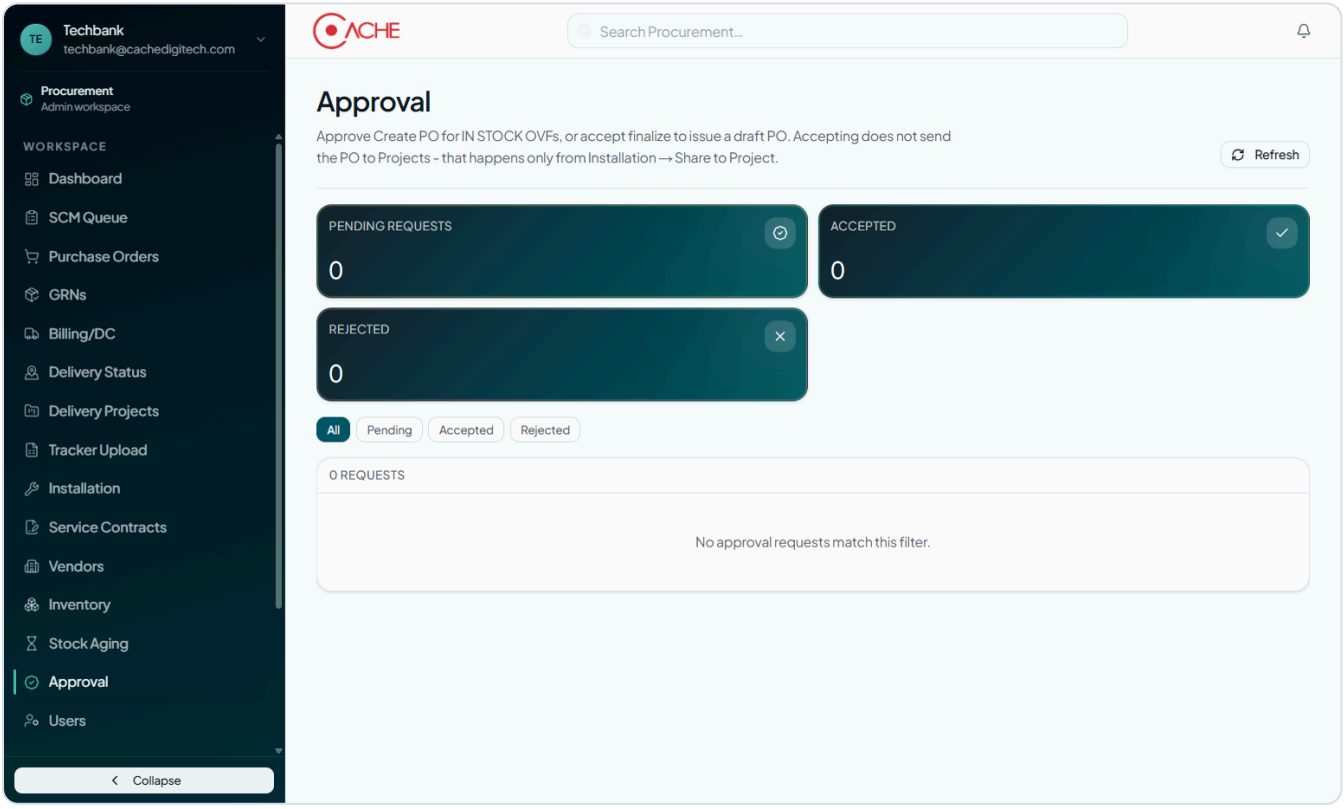

Figure B-14 - Approval pane.

B.15 Users

Assign Microsoft Entra users to Procurement (admin).

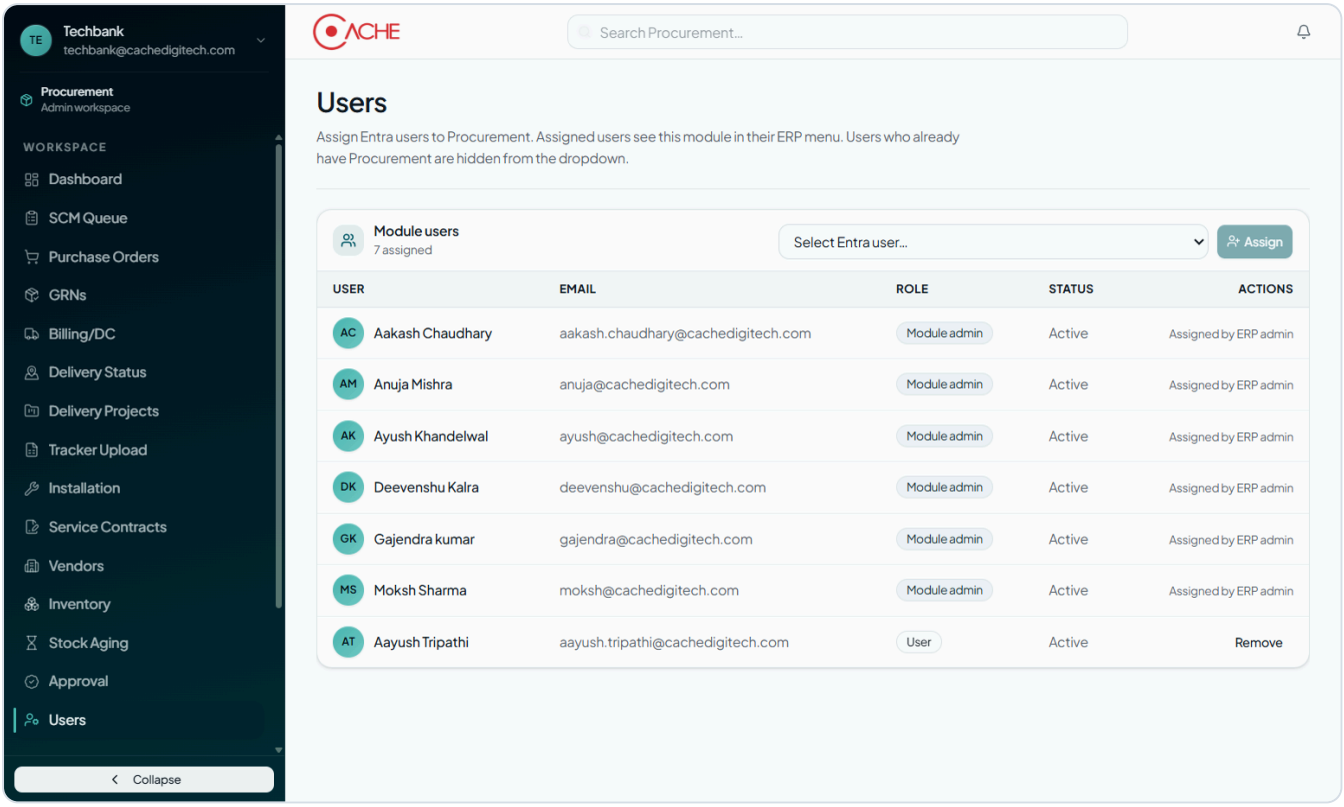

Figure B-15 - Users pane.

B.16 Mails

Order acknowledgement, ETD reminder, and delivery update mail log.

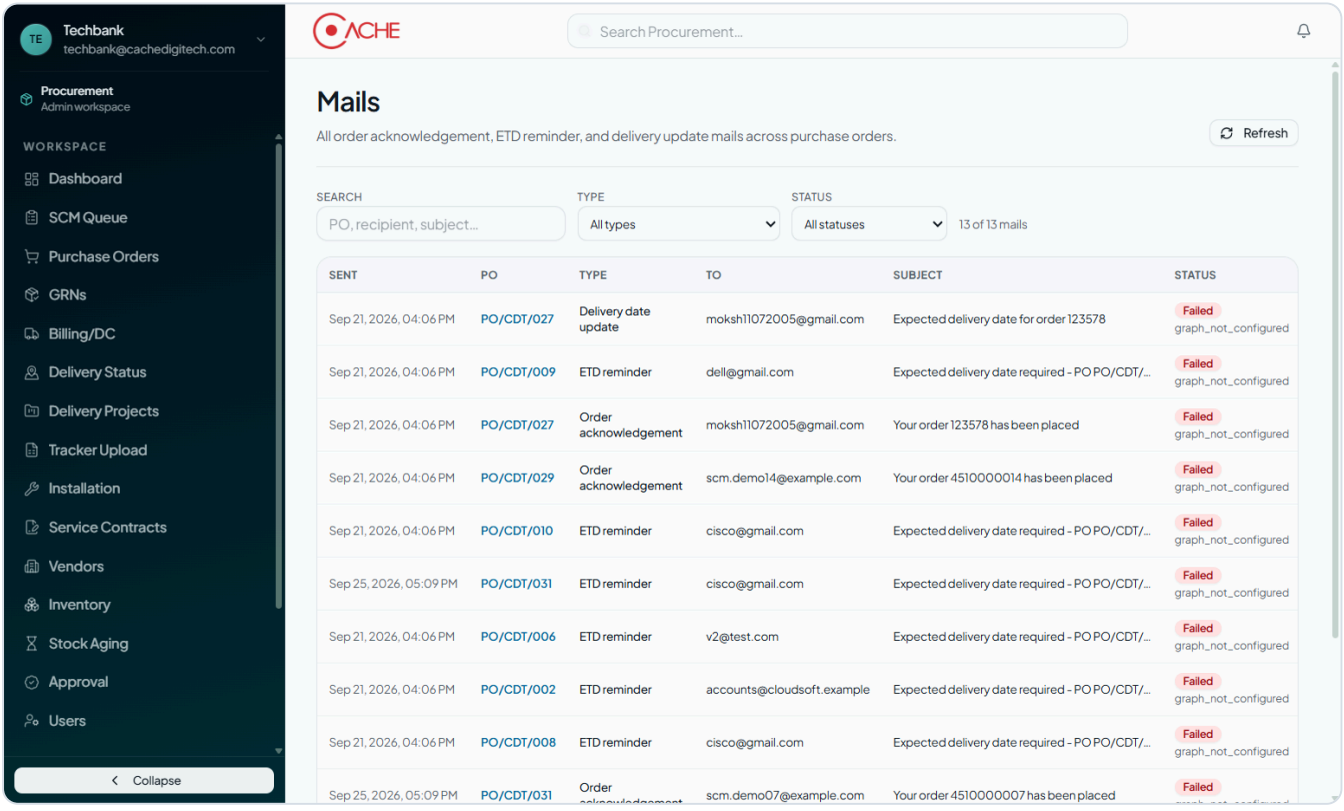

Figure B-16 - Mails pane.

B.17 Reports

PO fulfillment, inventory, and GRN receipt report cards.

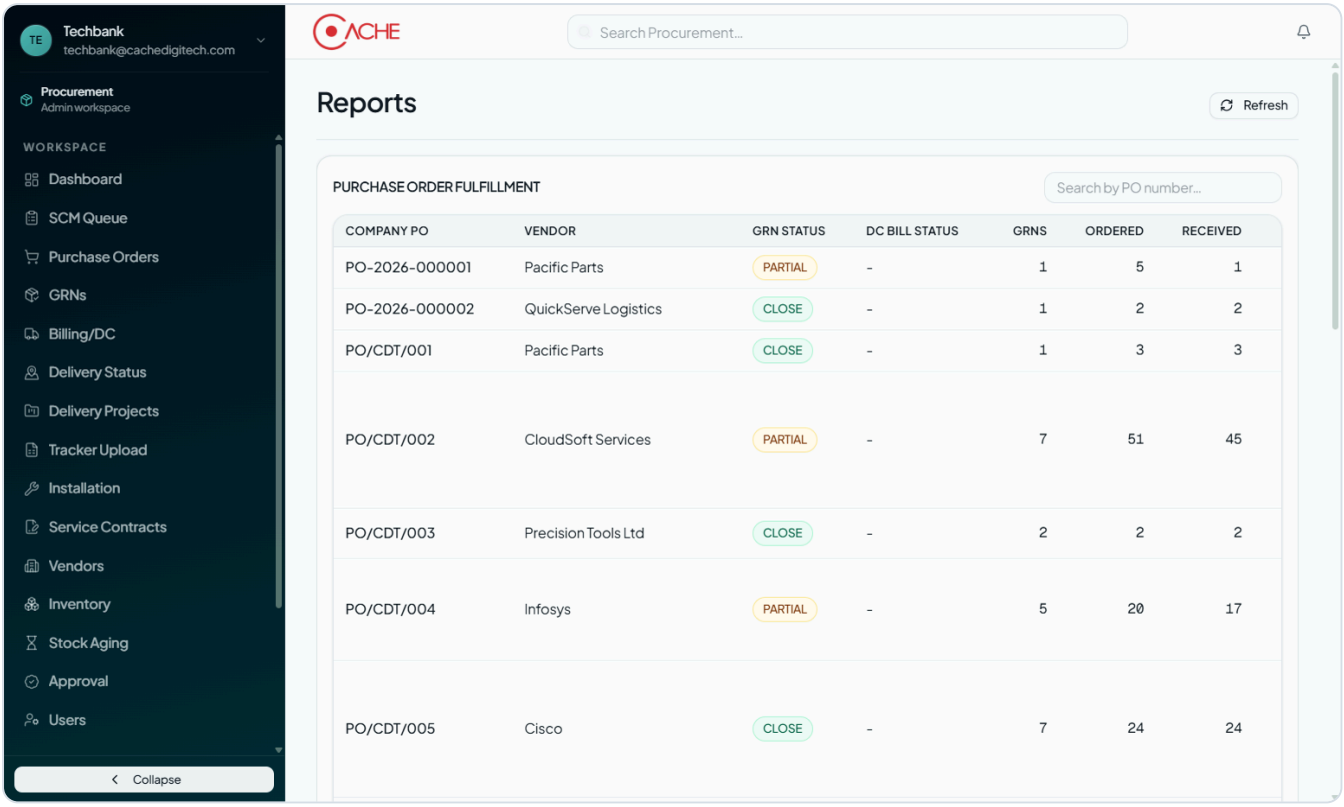

Figure B-17 - Reports pane.

B.18 Analytics

Open OVF / PO / GRN / stock value with vendor spend mix.

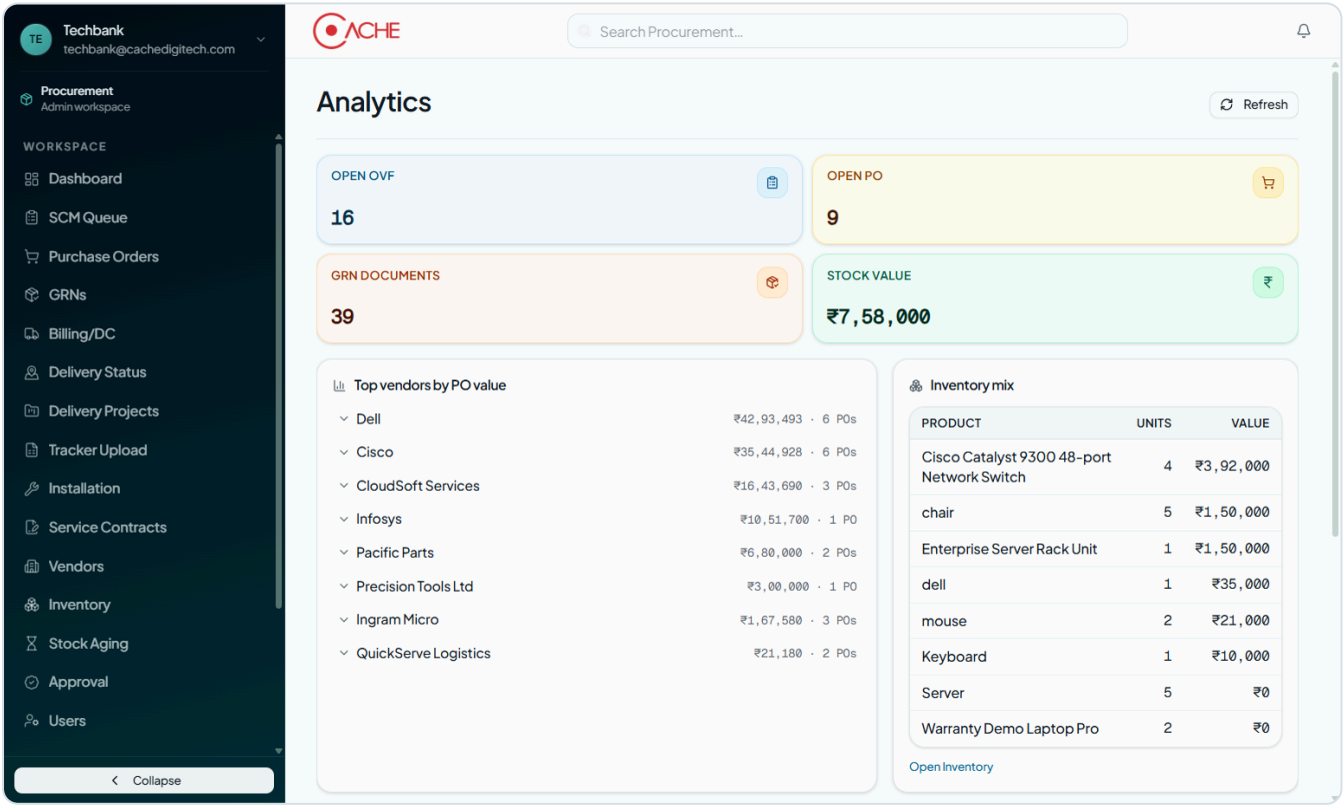

Figure B-18 - Analytics pane.

B.19 Timeline

Per-OVF procurement step history.

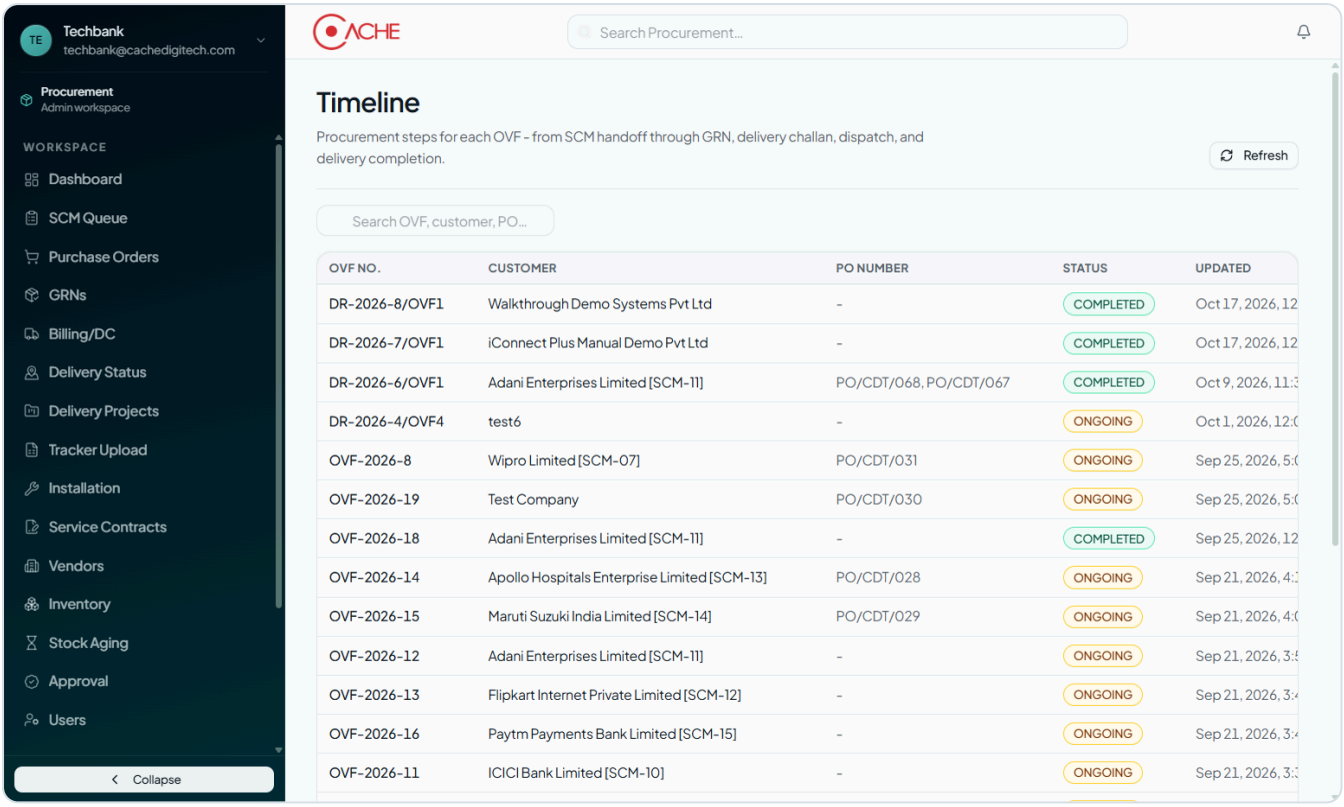

Figure B-19 - Timeline pane.

Roles and responsibilities

Module admin

- Monitor Dashboard, Analytics, and Reports
- Approve Create PO / finalize requests
- Manage Vendors, Inventory, and Users
- Hold / unhold OVFs when needed
- Own Delivery Projects and Tracker Upload

SCM buyer

- Work SCM Queue and item plans
- Create vendor POs and chase ETD
- Record GRNs and delivery challans
- Update Delivery Status after dispatch
- Use Mails / Timeline for audit

Warehouse / logistics

- Maintain Inventory balances
- Allocate from stock on OVFs
- Confirm serials on GRN
- Prepare Billing/DC paperwork
- Flag stock aging and warranty risks

Stage checkpoints (typical)

Your tenant may vary assignee lists. These are the usual checkpoints in the demo story.

STAGE	TYPICAL OWNER	ACTION IN UI
SCM Queue / OVF	SCM buyer	Open OVF, set freight if needed, start Create PO
Item plan / stock	SCM buyer + warehouse	Pick distributor; optionally fulfill from inventory
Create PO / Approval	Buyer + admin	Save PO; accept approval requests when required
GRN	Warehouse	Record receipt on PO - partial or close
Billing/DC + Delivery	Logistics	Create DC / billing; update delivery status
Installation share	Admin / PM	From Installation detail, share to Projects when required

Document control - iConnect Plus Procurement User Manual v1.0 - HTML generated by `_build_procurement_manual.py` .

Regenerate after UI changes: run the build script, refresh screenshots under `assets/screenshots/process/` and `assets/screenshots/sidebar/` , then print to PDF from the HTML file path (see README).

Prerequisite: an approved CRM OVF shared to SCM (demo `DR-2026-8/OVF1`).
