ICONNECT PLUS / CACHE DIGITECH

# Service Module User Manual

SOP service request tickets - Service Head assigns engineers; engineers work tickets, SLAs, and mailbox

Service Head | Service Engineer | Full module reference

| | |
|---|---|
| Product | iConnect Plus ERP |
| Module | Service |
| Document | User Manual v1.0 |
| Audience | Service Head, engineers, field engineers |
| Demo ticket | SR-2026-000007 |
| Date | 17 October 2026 |

Part A follows ticket lifecycle. Part B lists workspace panes.

## Table of contents

1. Who this manual is for and access
2. End-to-end ticket path overview
3. Part A - Process walkthrough (steps 01-09)
4. Part B - Sidebar reference
5. Roles and responsibilities
6. Typical checkpoints
7. Demo assets and rebuild

## Who this manual is for and access

This manual is for **Service Heads (module admins)**, **Service Engineers**, and **Field Engineers** who intake, assign, work, and close service request tickets under SLA.

> Sign in with **Microsoft Entra SSO**. Passwords are not stored in iConnect Plus for Entra users. If Service is missing from your module hub, ask a Service Head or ERP admin to assign you on Users.

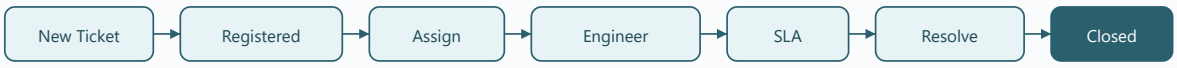

1. Open iConnect Plus and complete Entra sign-in.
2. Open Service from the ERP module hub.
3. Use the left sidebar: Dashboard, Request Tickets, SLAs, Resolved, Users (and Mailbox / Field Engineer when your role allows).
4. Service Heads assign engineers on Users before routing tickets.

> Pane visibility: **Mailbox** needs service.request update/approve permission. **Field Engineer** appears only for Field Engineer roles (field-only users see a reduced workspace). Demo screenshots use a Service Head session with five primary panes plus Mailbox via direct URL.

## End-to-end ticket path overview

Part A walks New Ticket through assignment, engineer work, SLA monitoring, and resolved history.

**Service request ticket path (demo walkthrough)**

Demo: SR-2026-000007 - Email test - automatic ticket
Engineer Working · Remote Support · P3 · Contact Test Customer · Owner Anita Rao
Mailbox and Field Engineer panes appear by permission / role; Service Head assigns engineers on Users

## Part A - Process walkthrough

Follow these steps in order. Demo ticket used in screenshots:

- **Ticket:** `SR-2026-000007`
- **Subject:** Email test - automatic ticket
- **Status:** Engineer Working
- **Priority / Mode:** P3 · Remote Support
- **Contact:** Test Customer
- **Owner:** Anita Rao
- **Service Head:** Techbank

### Step 01 - Service Dashboard

Open **Dashboard** for ticket status mix, SLA breach vs within-SLA, and remote vs onsite support mode. Service Heads start here before working the queue.

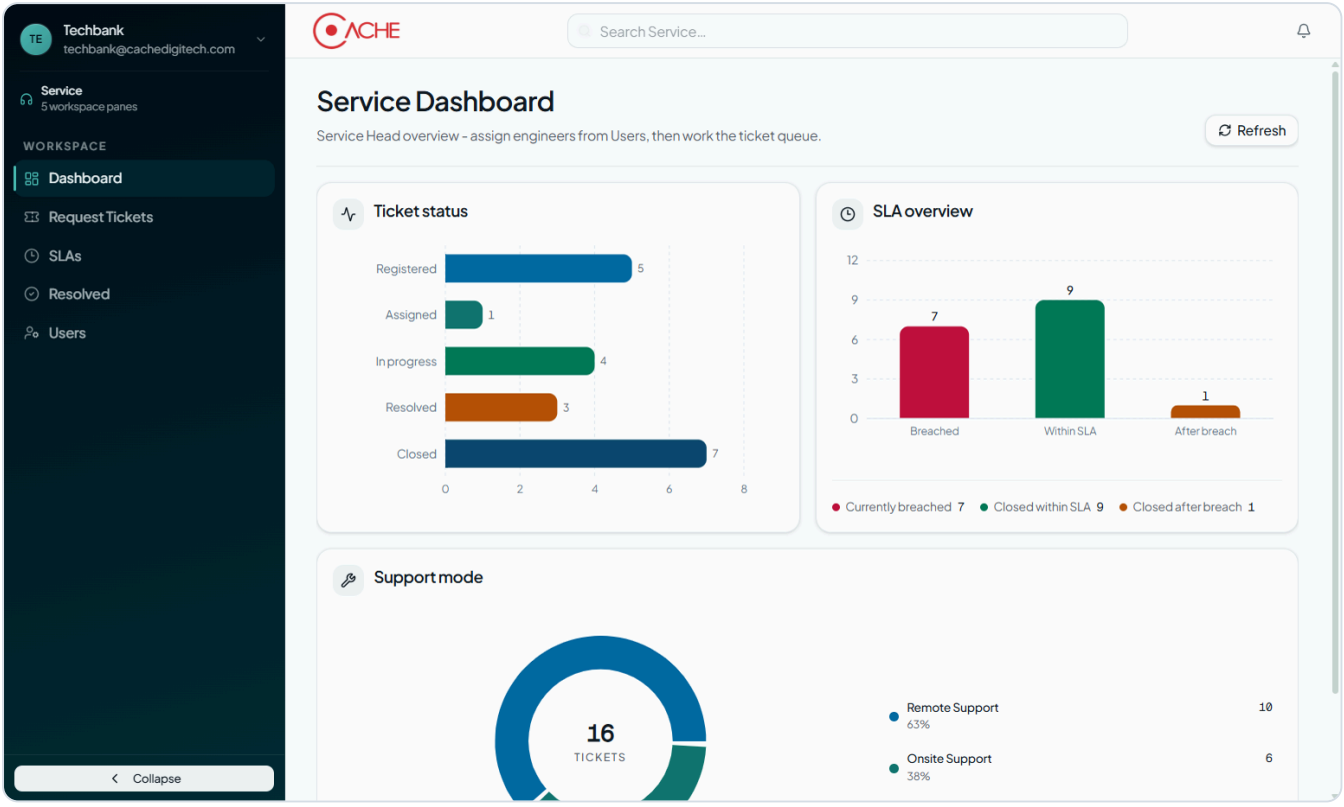

*Figure A-01 - Service Dashboard with ticket status, SLA, and support mode charts.*

### Step 02 - Request Tickets queue

Use **Request Tickets** for the Service Head queue. Filter by priority, status, and mode. Toggle All Tickets vs My Assigned Tickets. Export Excel or CSV as needed.

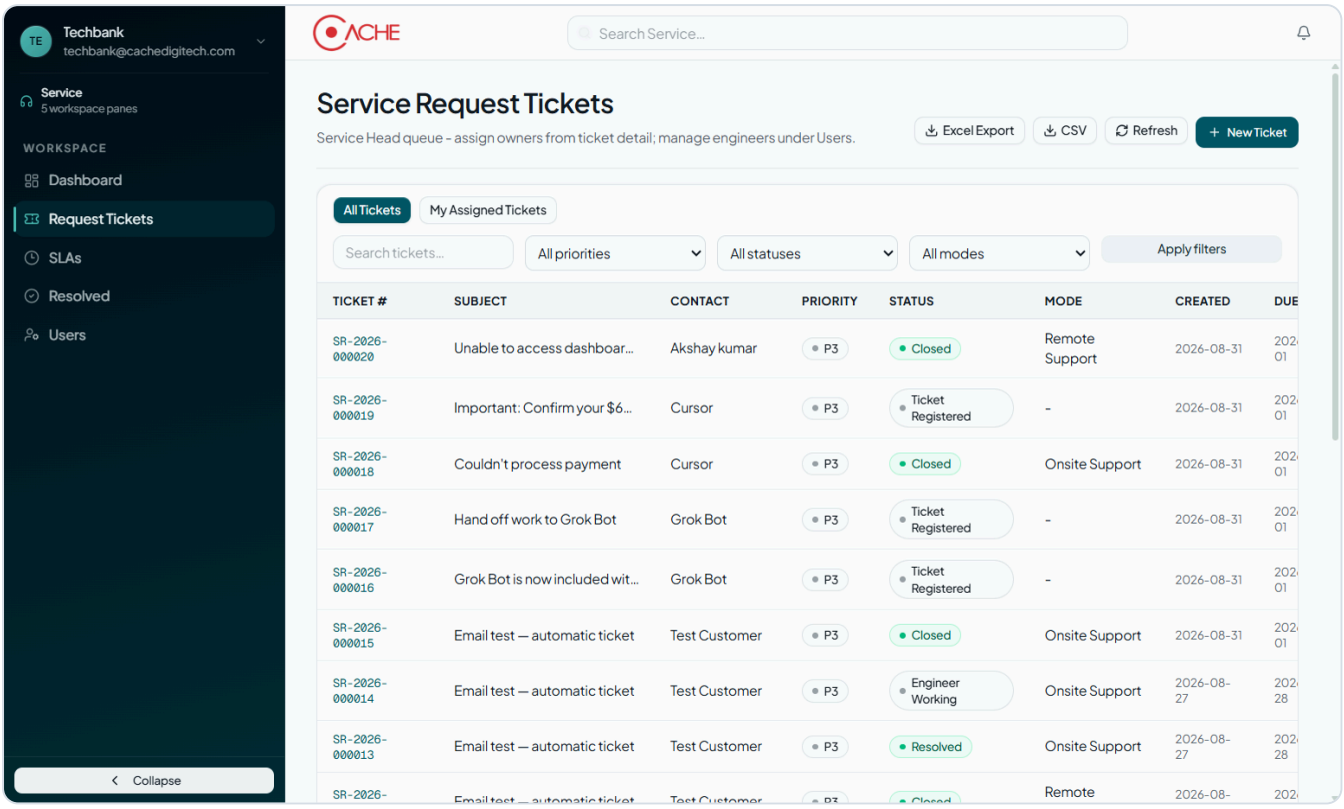

*Figure A-02 - Service Request Tickets list with SR-2026 numbers.*

### Step 03 - Active Ticket SLAs

Open **SLAs** - Active Ticket SLAs to watch live clocks: started, due, elapsed, and remaining (negative remaining means breached).

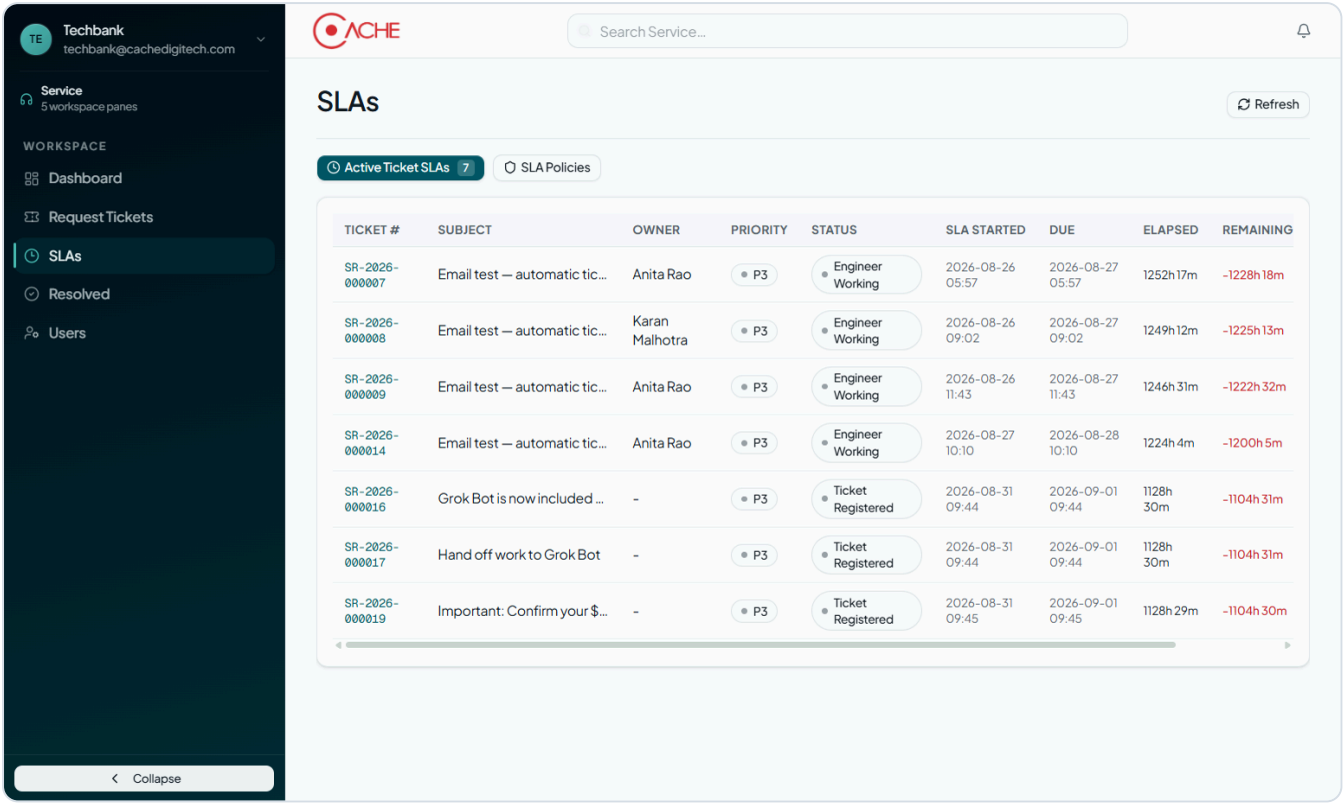

*Figure A-03 - Active Ticket SLAs with breached remaining times.*

### Step 04 - Resolved Tickets

Review closed and resolved work on **Resolved**. Search by ticket #, subject, or solution summary. Columns include solution type and resolved date.

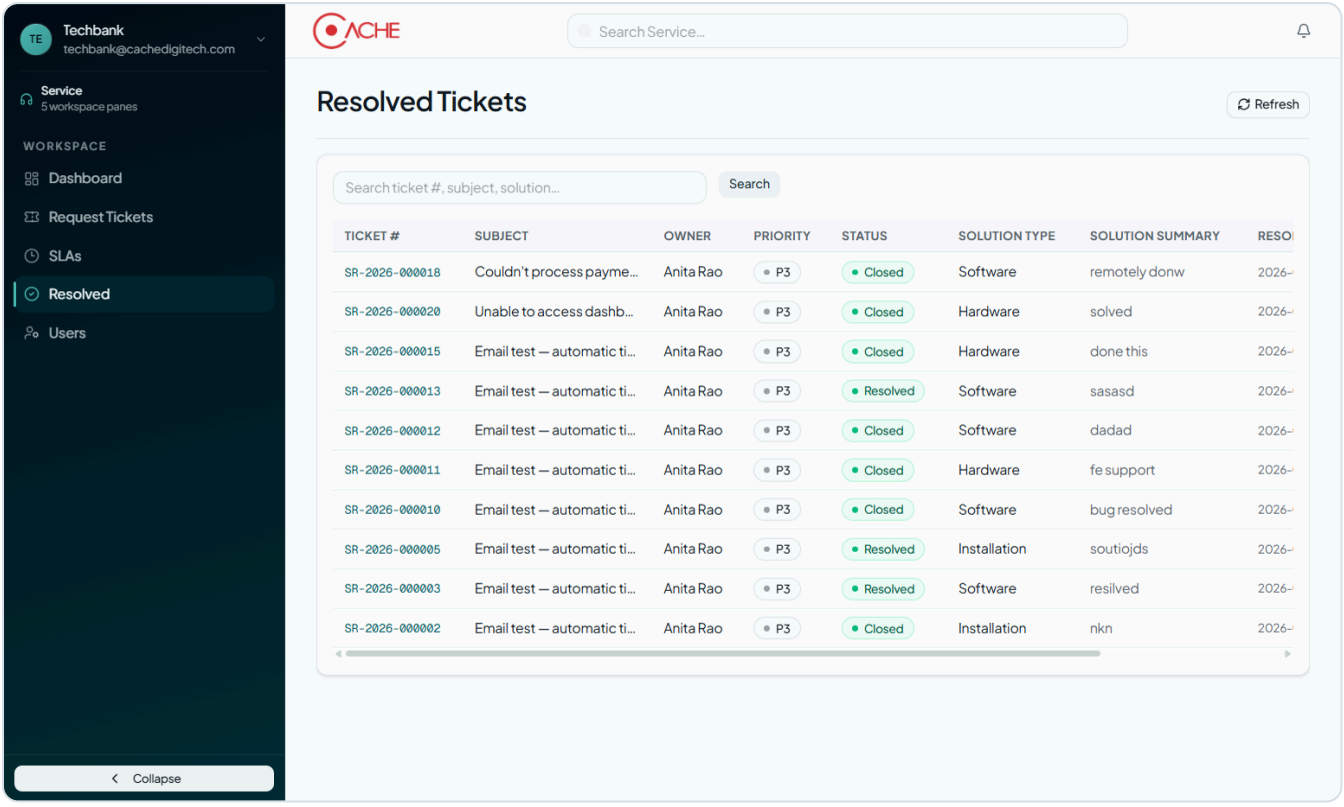

*Figure A-04 - Resolved Tickets register.*

### Step 05 - Service team Users

On **Users**, assign Entra users as Service Engineer or Field Engineer. Module admins (Service Head) are set by the ERP admin under Organization - Users.

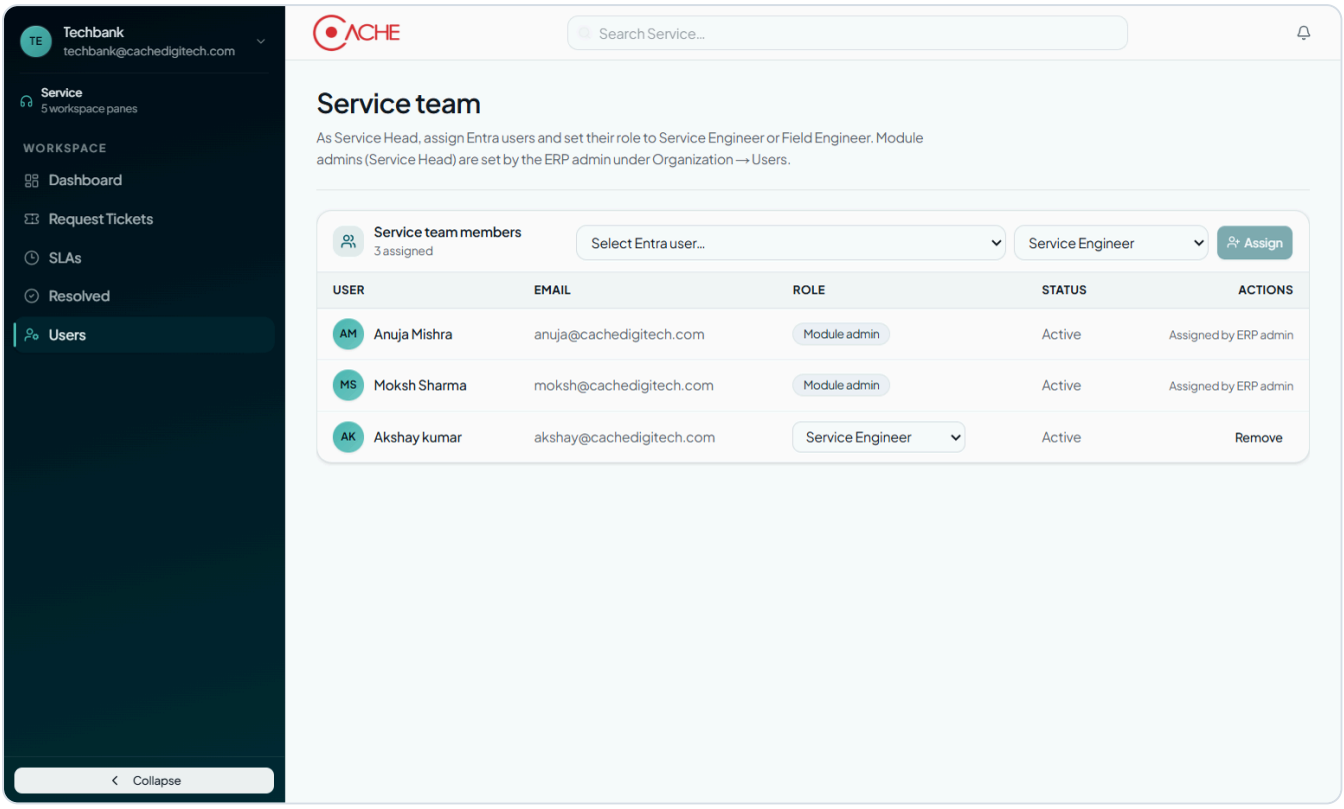

*Figure A-05 - Service team membership assignment.*

### Step 06 - Create New Ticket

Click **+ New Ticket** and complete Section 1 Basic Information per SOP: subject, status, customer, contact, priority, branch, category, and request type. Mode of action is set later from ticket detail after Open Ticket.

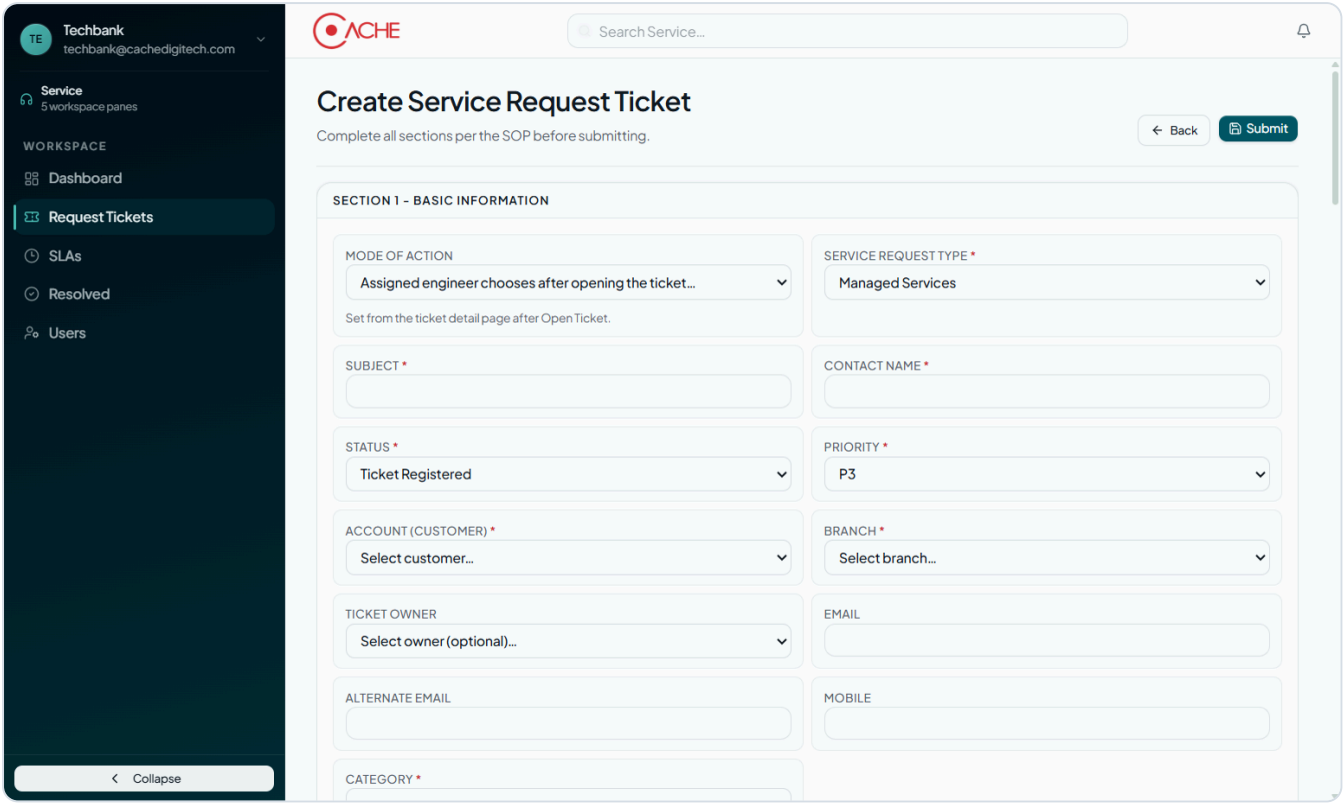

*Figure A-06 - Create Service Request Ticket form.*

### Step 07 - Ticket detail and timeline

Open a ticket (demo: `SR-2026-000007` - Email test - automatic ticket). Review basic info, issue description, assets, attachments, and the Ticket Timeline (Registered - Assigned - Engineer Working). Demo status: **Engineer Working**, Remote Support, P3.

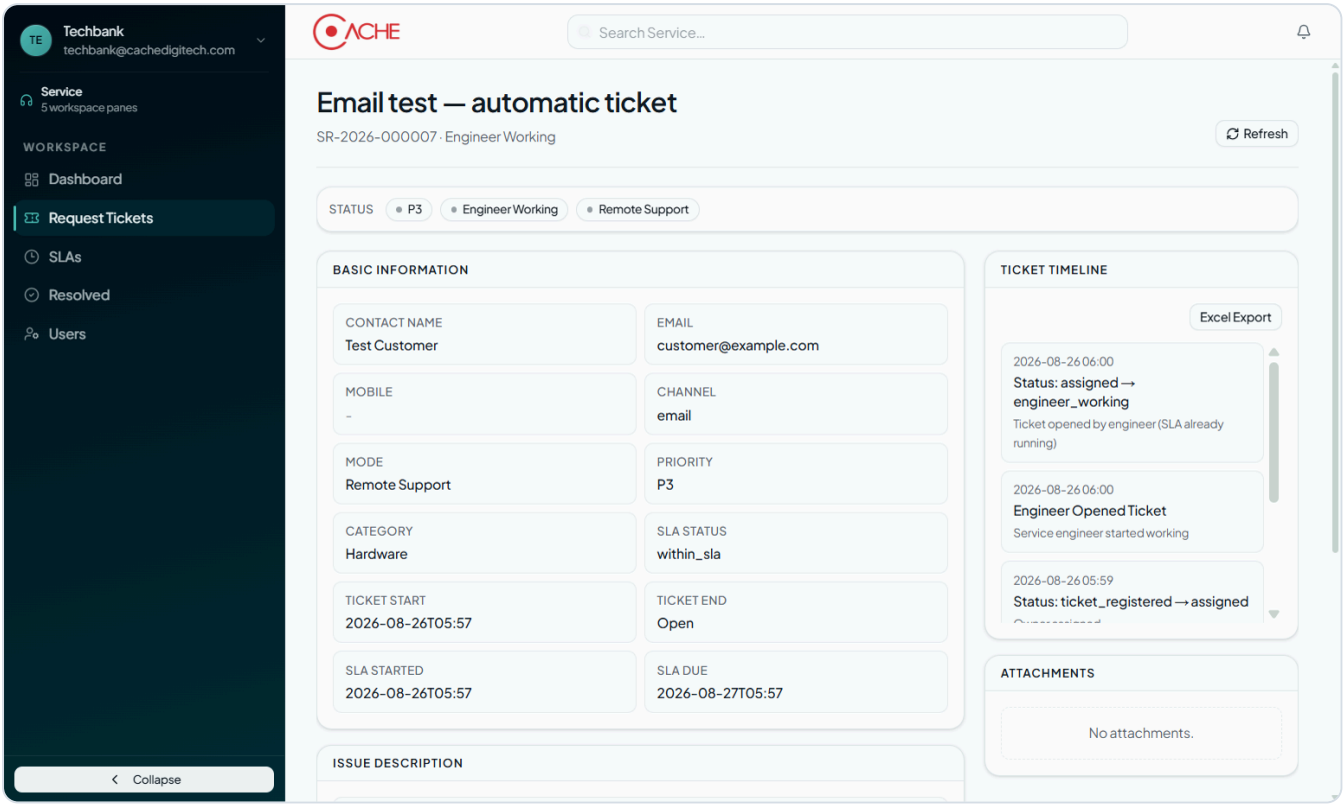

*Figure A-07 - Ticket detail for SR-2026-000007 with timeline.*

### Step 08 - Support Mailbox

Users with mailbox permissions open **Mailbox** to read inbound support mail that can become tickets. Configure mail credentials before the inbox populates.

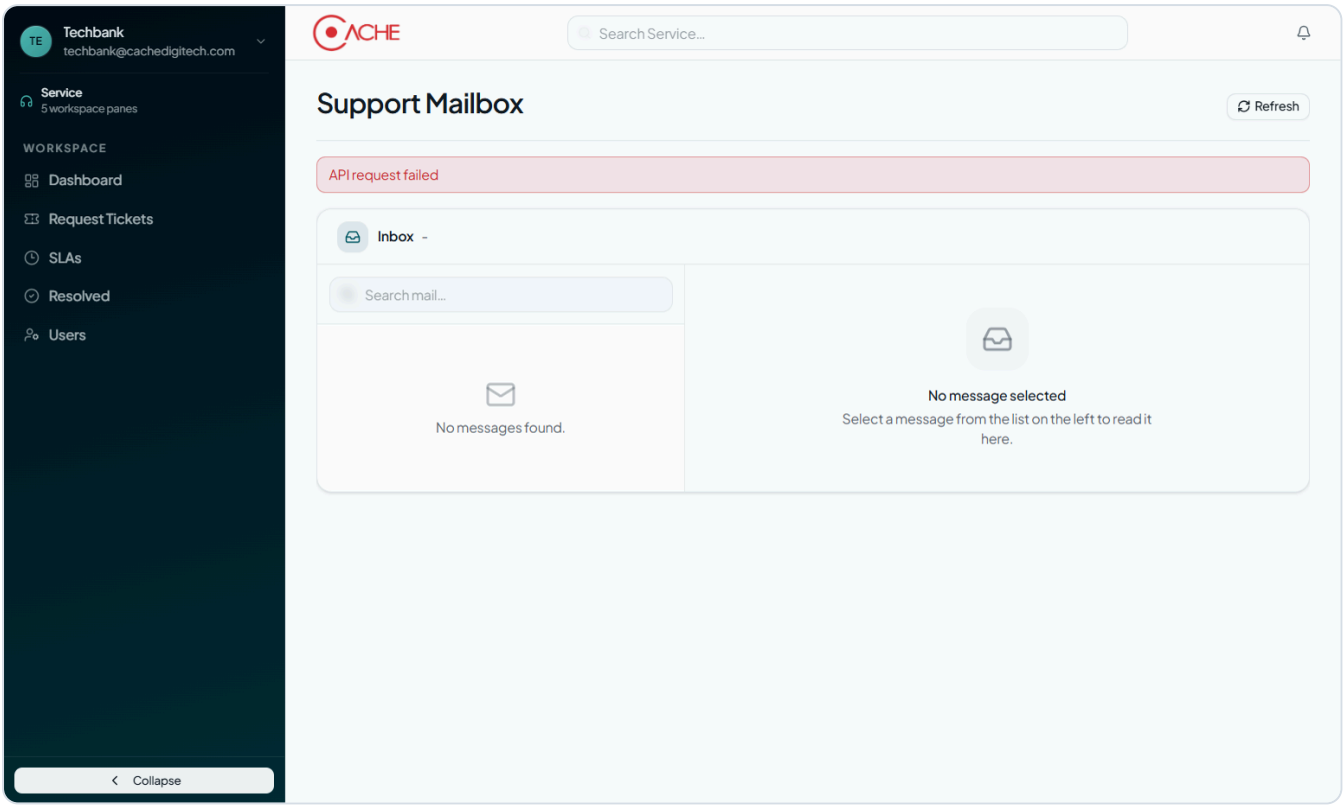

*Figure A-08 - Support Mailbox inbox UI.*

### Step 09 - SLA Policies

On SLAs, switch to **SLA Policies** for master definitions applied when tickets are opened. Create policies before high-volume intake.

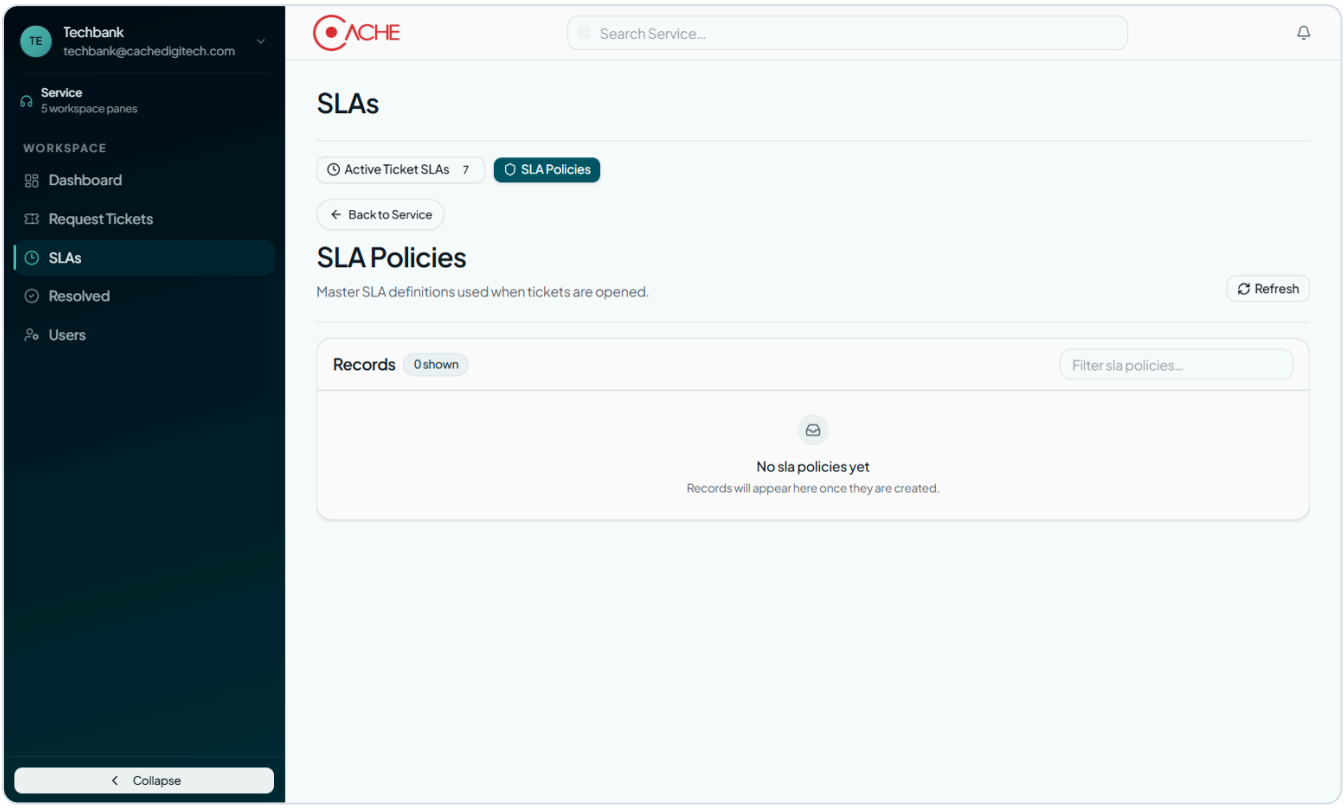

*Figure A-09 - SLA Policies master list.*

## Part B - Sidebar reference

Pane-by-pane glossary matching the Service left navigation. Mailbox is role-gated; Field Engineer is role-gated and not shown for Service Head-only sessions.

## B.01 Dashboard

Service Head overview - status, SLA, support mode.

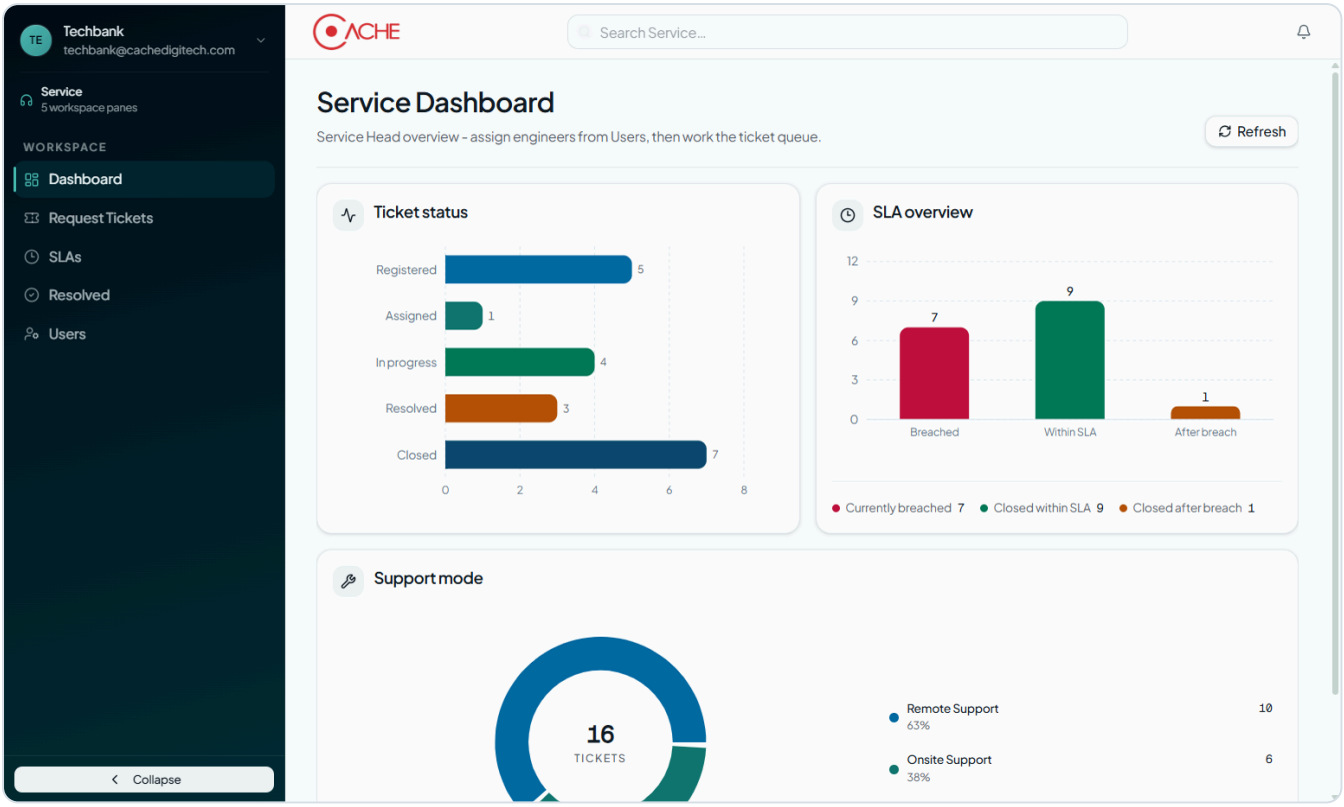

*Figure B-01 - Dashboard pane.*

## B.02 Request Tickets

SOP ticket queue and New Ticket.

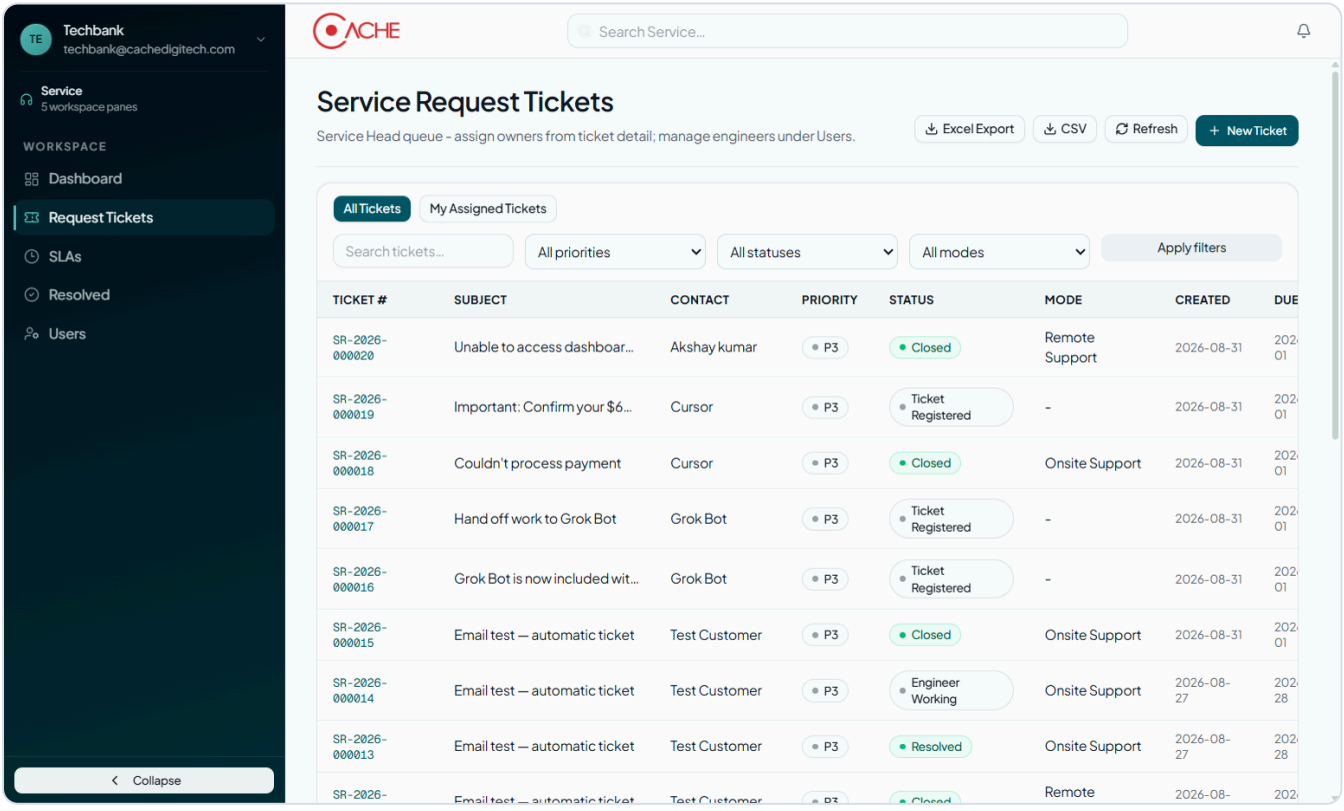

*Figure B-02 - Request Tickets pane.*

## B.03 SLAs

Active ticket SLA clocks and SLA Policies tab.

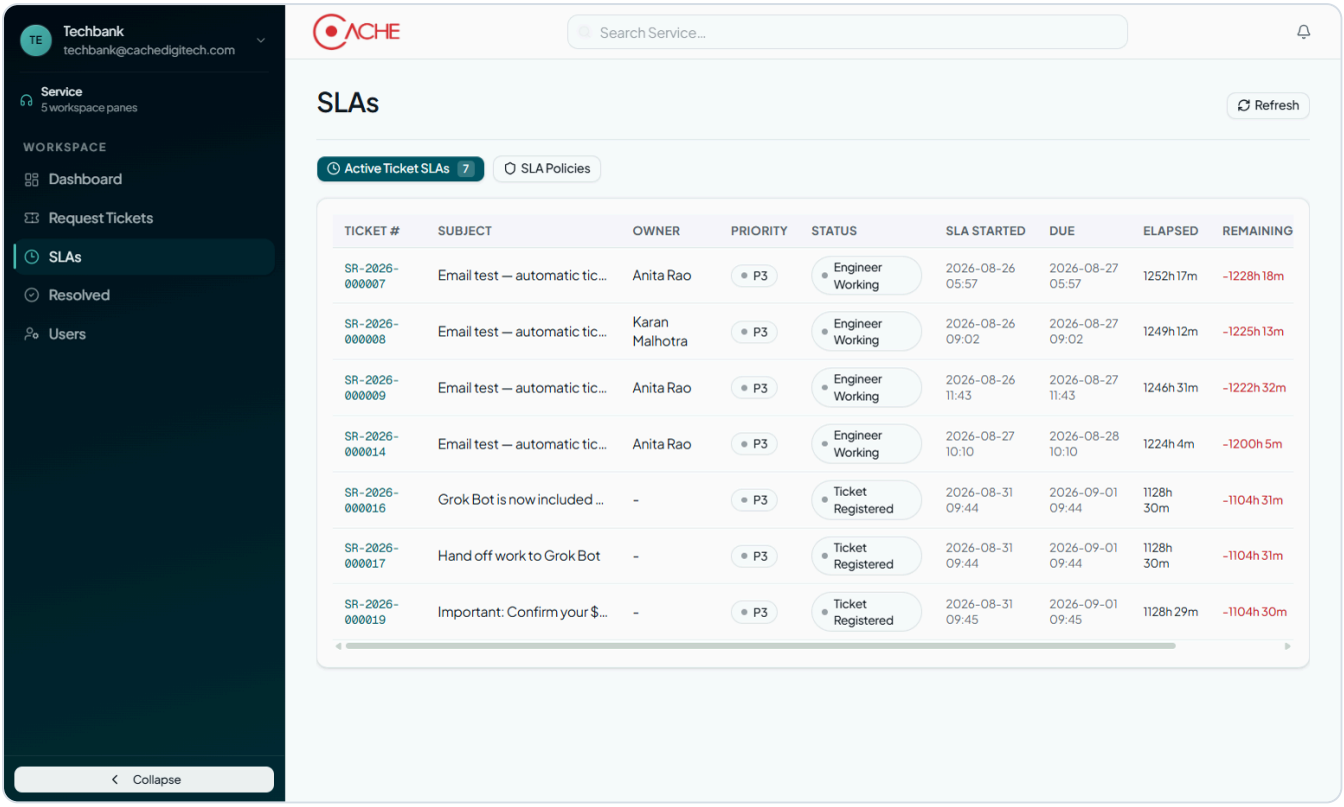

*Figure B-03 - SLAs pane.*

## B.04 Resolved

Closed and resolved ticket history.

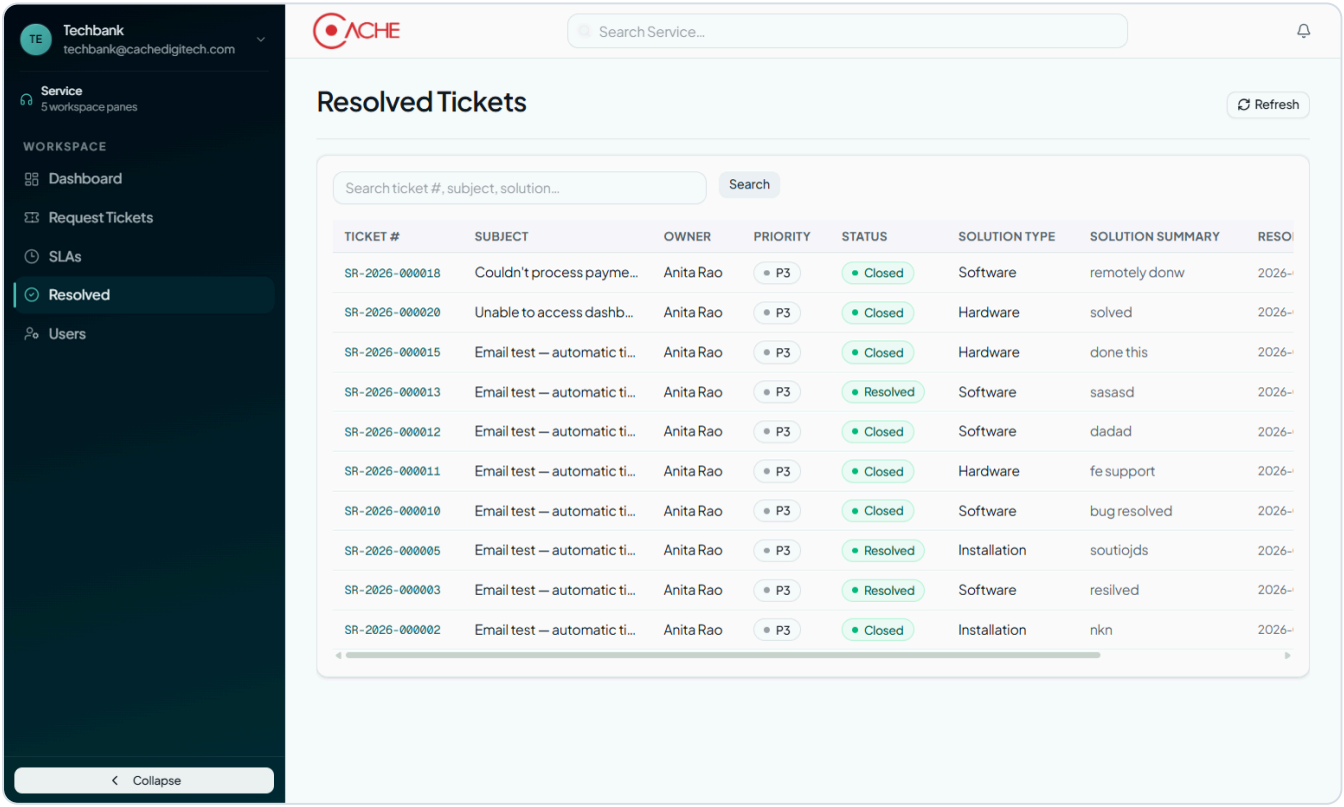

*Figure B-04 - Resolved pane.*

## B.05 Users

Assign Service / Field Engineers from Entra.

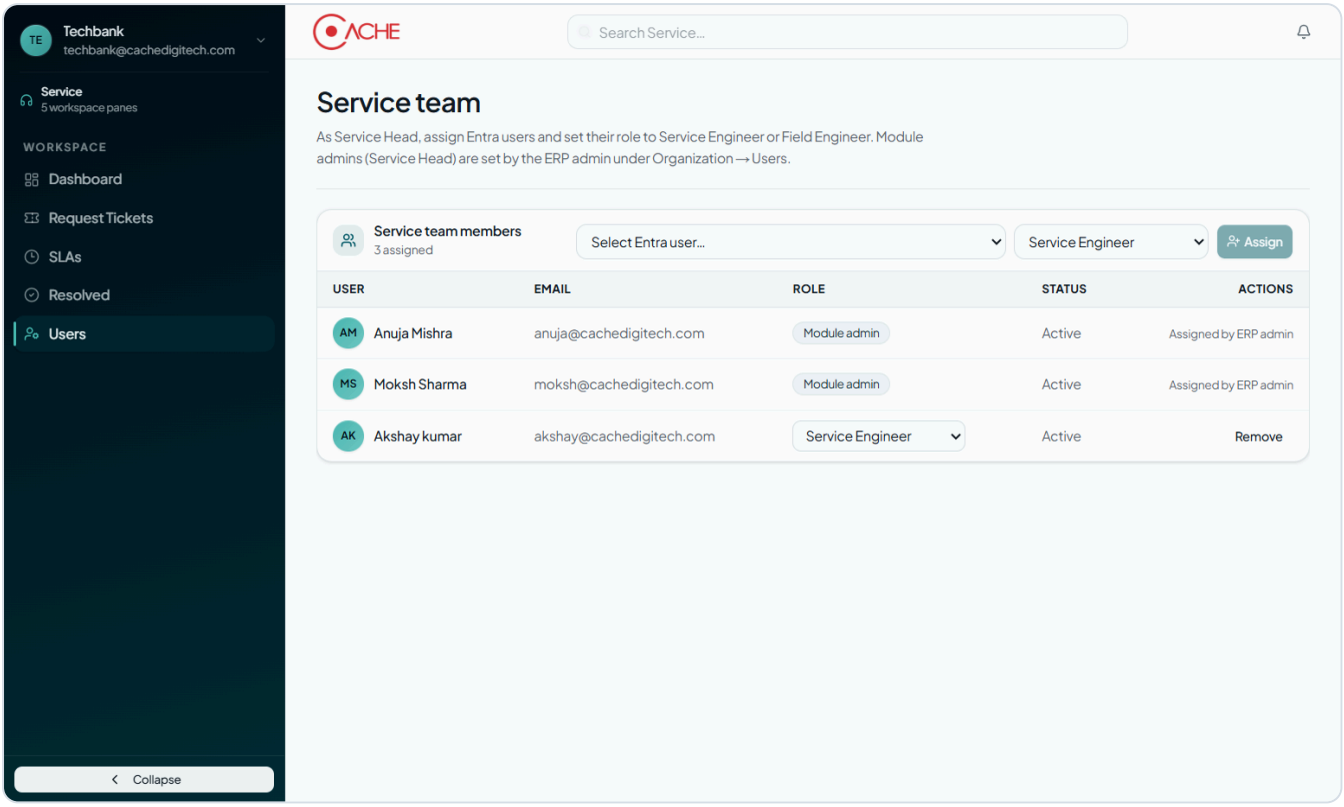

*Figure B-05 - Users pane.*

## B.06 Mailbox

Support inbox (shown when mailbox permission is granted).

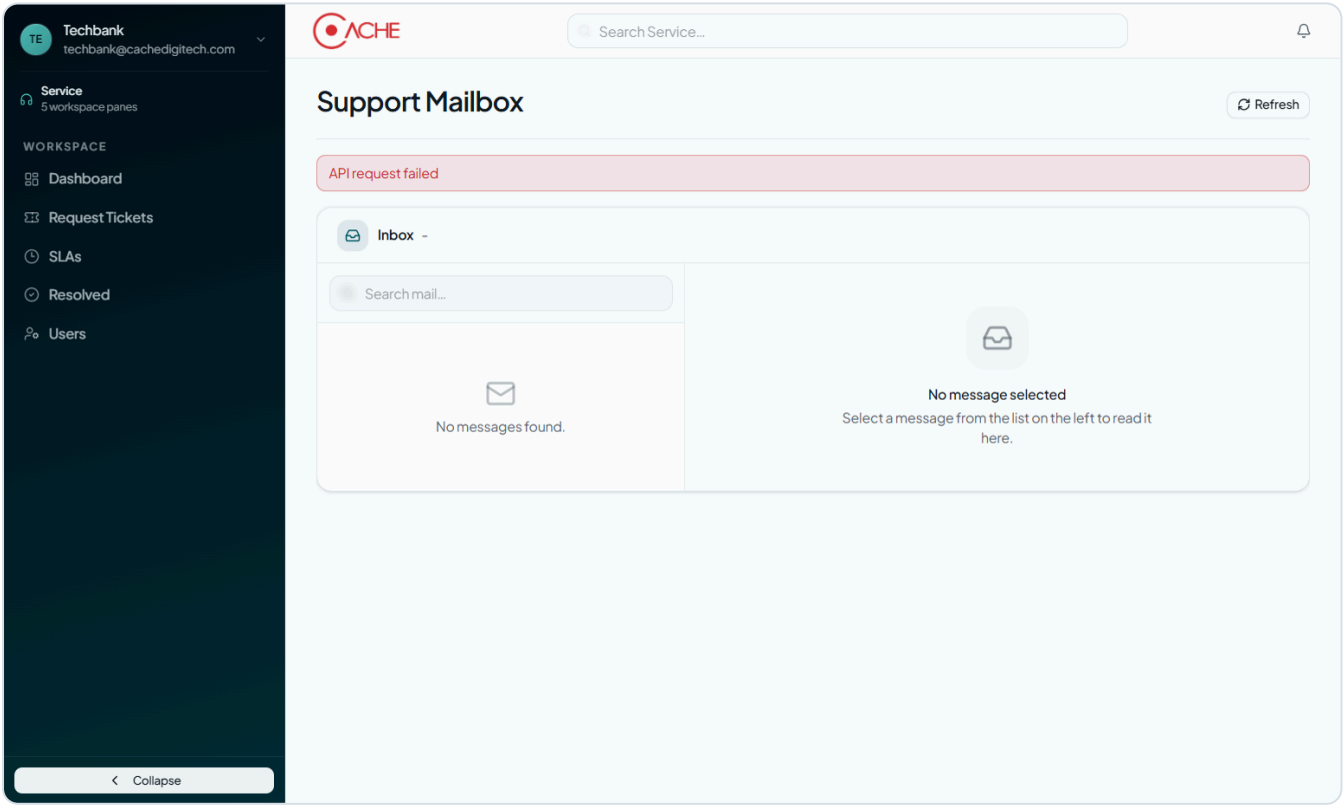

*Figure B-06 - Mailbox pane.*

## Roles and responsibilities

### Service Head / Module admin

- Assign engineers on Users
- Own SLA Policies and Dashboard
- Create tickets and assign owners
- Monitor breaches on Active SLAs

### Service Engineer

- Work My Assigned Tickets
- Open ticket, set mode, update status
- Log solution and resolve / close
- Use Mailbox when granted

### Field Engineer

- See Field Engineer workspace when assigned
- Work onsite visits and open tickets
- Update timeline and attachments
- Hand off to remote / OEM when needed

## Typical checkpoints

Your tenant policies may vary. These are the usual Service checkpoints.

| STAGE | OWNER | ACTION IN UI |
|---|---|---|
| Team setup | Service Head | Users - assign Service / Field Engineer |
| SLA master | Service Head | SLAs - SLA Policies |
| Intake | Service Head / Mailbox | New Ticket or convert from Mailbox |
| Assign | Service Head | Ticket detail - set Ticket Owner |
| Work | Engineer | Open Ticket - set Mode - update timeline |
| Close | Engineer / Head | Resolve - Closed; appears on Resolved |
